HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core financial services, handling over **1,500 requests per minute** during peak trading hours.
- Implemented complex data transformations and persistence logic using **Hibernate**, ensuring data integrity across multiple financial transaction tables within the PostgreSQL database.
- Wrote and executed unit tests using **JUnit** and **Mockito** for new Java features, achieving **85% code coverage** for critical business logic modules.
- Collaborated with Risk Management and Front Office teams to gather reporting requirements and translate them into technical specifications for new analytics features.
- Designed and built reusable reporting components and templates in **Sigma**, adhering to best practices for report development and performance optimization.
- Contributed to the development of a new enterprise web-based reporting application, integrating with backend services and supporting dashboard interactivity with basic **JavaScript**.
- Deployed containerized Python ETL services to a **Docker** environment on **AWS EC2**, configuring basic resource limits and monitoring via **CloudWatch**.

SKILLS

Languages – Python, Java, SQL, JavaScript, R

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, Databricks SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Analytics Tools – Power BI, Tableau, Sigma, R/RStudio, DAX, Power Query

Financial Domain – Risk Analytics, Fund Performance Reporting, Transaction Monitoring, Reconciliation Workflows

PROJECTS

Risk Analytics Infrastructure Modernization (HCL Technologies)

- Engineered a Python-based data pipeline using **pandas** and **SQLAlchemy** to ingest and transform large volumes of market data from disparate sources into a unified format for risk analysis.
- Developed **Databricks SQL UDFs** to implement custom risk calculation logic, improving query performance by an average of **30%** for complex reporting needs.
- Collaborated with the analytics team to define data schemas and build reusable data modules within the medallion architecture framework on **Databricks**.

Enterprise Reporting Platform Development (HCL Technologies)

- Built interactive dashboards and reports using **Power BI** and **DAX** measures to visualize key performance indicators for financial operations, enabling stakeholders to track transaction volumes and processing times.
- Developed RESTful APIs in **Java Spring Boot** to serve aggregated data to a front-end reporting interface, ensuring efficient data retrieval and system integration.
- Managed CI/CD pipelines using **Jenkins** and **Git** for automated testing and deployment of reporting services, reducing manual deployment efforts by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
