PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided first-line technical support for approximately 10,000 computer users across a large healthcare network, resolving issues related to operating systems and standard applications.
- Managed and prioritized incoming support requests via a ticketing system, ensuring timely resolution and escalation of complex problems to second and third-line teams.
- Assisted end-users with troubleshooting hardware and software issues, including network connectivity, printer problems, and account access.
- Documented support procedures and common solutions, contributing to a knowledge base for both the support team and end-users.
- Performed basic system administration tasks, such as user account creation and password resets, within a controlled IT environment.
- Monitored system performance and identified potential issues, proactively addressing problems before they impacted end-users.
- Supported the deployment and configuration of standard desktop software and hardware, ensuring compatibility with existing infrastructure.

SKILLS

Operating Systems – Windows, Linux

Productivity Software – Microsoft Office Suite, Microsoft 365

Support Tools – Ticketing Systems, Remote Desktop Support

Networking – TCP/IP, DNS, DHCP

Hardware Support – Desktop, Laptop, Printer Troubleshooting

Troubleshooting – Incident Resolution, Problem Diagnosis

PROJECTS

Enterprise IT Support Enhancement (HCL Technologies)

- Streamlined the incident triage process for enterprise applications by implementing a standardized ticket categorization system, reducing average initial response time by **18%**.
- Developed and maintained a comprehensive knowledge base of common IT issues and their resolutions, accessible to both support staff and end-users.
- Collaborated with operations teams to monitor system health and escalate critical issues, ensuring adherence to service level agreements for production systems.

User Onboarding Workflow Automation (HCL Technologies)

- Automated the creation of new user accounts and mailbox setup using Python scripts, reducing manual effort by approximately **4 hours** per week.
- Integrated with existing HR systems to automatically provision user access based on role and department, improving onboarding efficiency for new hires.
- Performed data validation on user inputs to ensure accuracy and consistency before account creation, minimizing downstream errors.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
