HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed Python scripts for data extraction and transformation from client-specific financial formats into a unified internal system, processing approximately **15,000 records** daily.
- Designed and implemented routines for **exception detection and handling** in financial data feeds, reducing manual review time by **30%**.
- Analyzed portfolio positions and NAV data, identifying and escalating **breaches or anomalies** in financial datasets requiring risk analysis for UCITS/AIFMD compliance.
- Enriched financial data by integrating external sources to provide additional information essential for **UCITS/AIFMD risk analysis**, supporting regulatory reporting.
- Wrote **SQL queries** to validate data integrity and perform ad-hoc analysis on large financial datasets stored in PostgreSQL and MySQL.
- Collaborated with senior management and cross-functional teams to gather requirements for new data processing workflows and support related tasks.
- Containerized data processing routines using **Docker** and deployed them to AWS EC2 instances managed via Jenkins CI/CD pipelines.

SKILLS

Programming Languages – Python, SQL, Java

Data Analysis & Tools – Pandas, NumPy, Power BI, Tableau, R

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

DevOps & CI/CD – Docker, Jenkins, Git

Financial Domain – UCITS, AIFMD, Financial Risk Management, Portfolio Analysis, NAV Data

PROJECTS

Financial Data Transformation and Enrichment Pipeline

- Developed a Python-based ETL pipeline to ingest and transform varied client-specific portfolio position and NAV data into a standardized internal format, handling approximately **18,000 records** daily.
- Integrated external data feeds using pandas and SQL to enrich the financial data with market indicators and counterparty information, crucial for UCITS/AIFMD risk calculations.
- Implemented automated data validation checks and exception reporting mechanisms, reducing the rate of data quality issues by **22%** before ingestion into the risk analysis system.

Automated Financial Anomaly Detection System

- Built Python routines to analyze transaction flows and identify deviations from expected patterns, flagging potential breaches for further investigation by the risk team.
- Designed and deployed a monitoring dashboard using Power BI that visualized key financial metrics and highlighted anomalies, enabling faster response times for operational teams.
- Wrote SQL queries against PostgreSQL to extract historical data for baseline analysis and model tuning, improving the accuracy of anomaly detection algorithms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
