# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and deployed **Python** scripts for automating ETL processes, reducing manual data processing time by approximately **40%**.
- Engineered **Java Spring Boot** microservices for internal business systems, implementing **REST APIs** for cross-service data exchange and achieving <0xC2><0xA0>**p95 latency** under **150ms**.
- Managed production incidents for enterprise **Java/.NET** applications, performing root cause analysis and implementing fixes to maintain service level agreements (SLAs) for critical financial operations.
- Designed and implemented **Kubernetes** deployments for containerized applications, defining resource requests/limits and configuring ingress controllers for improved application resilience.
- Automated infrastructure provisioning and configuration management using **Terraform** and **Bash scripting**, enabling faster environment setup and reducing manual configuration errors.
- Contributed to the development of CI/CD pipelines using **Jenkins** and **Git**, integrating automated testing stages and code reviews to streamline the software delivery lifecycle.
- Analyzed system logs and performance metrics using **Splunk** and **Dynatrace** to identify bottlenecks and proactively address potential issues in production environments.

## SKILLS

**Languages** – Python, Java, SQL, Bash

**Frameworks/Libraries** – Spring Boot, pandas, NumPy, Flask, FastAPI

**Cloud/DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Terraform, Jenkins, CI/CD

**Databases** – PostgreSQL, MySQL, Oracle

**Monitoring/Observability** – Splunk, Dynatrace, CloudWatch

**Tools** – Git, Jira, Confluence, Linux

## PROJECTS

### Automated Infrastructure Deployment Platform

- Developed a **Terraform**-based infrastructure-as-code solution to automate the provisioning of **AWS** resources, including EC2 instances and S3 buckets, for development and testing environments.
- Created **Bash scripts** to integrate Terraform deployments into a **Jenkins** CI/CD pipeline, enabling automated environment builds and teardowns, reducing deployment time by **55%**.
- Containerized core platform services using **Docker** and orchestrated them on a **Kubernetes** cluster, ensuring consistent deployment and scaling across different environments.

### Python-based ETL and Reporting Automation

- Built **Python** data pipelines utilizing **pandas** to extract, transform, and load data from multiple sources into a central data warehouse, handling approximately **50,000** records daily.
- Developed scheduled **Python** scripts to generate operational reports from the data warehouse, automating the delivery of insights to business stakeholders via email attachments.
- Implemented data validation checks within the ETL process using **SQL** queries against **PostgreSQL** to ensure data integrity and accuracy before reporting.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
