HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python scripts** for automating data ingestion and transformation tasks, processing approximately **1.5 TB** of raw data weekly.
- Engineered **SQL queries** and scripts for data extraction, transformation, and loading into the Snowflake data warehouse, optimizing performance for large datasets.
- Implemented and managed **Snowflake TASKS** and **STREAMS** to automate incremental data loading and processing pipelines, ensuring data freshness for downstream analytics.
- Designed and implemented **Snowflake roles and user security** models to enforce data access policies and compliance across different user groups.
- Collaborated within a project team to design and implement **ETL/ELT solutions** leveraging Snowflake's native capabilities, including **Snowpipe** for continuous data ingestion.
- Developed **REST APIs** using Java Spring Boot for seamless integration between enterprise systems, handling approximately **5,000 requests per hour**.
- Managed and monitored production environments using **Splunk and Dynatrace**, responding to P1/P2 incidents and ensuring adherence to SLAs.

SKILLS

Data Warehousing – Snowflake, SQL, ETL, ELT

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Languages – SQL, Python, Java

Frameworks & Libraries – Spring Boot, pandas, NumPy

Tools & Technologies – Snowpipe, STREAMS, TASKS, Docker, Jenkins, Git, Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Snowflake Data Pipeline for Financial Reporting

- Built an **ETL pipeline** using **Python** and **SQL** to ingest and transform financial transaction data from multiple sources into Snowflake.
- Implemented **Snowflake TASKS and STREAMS** to manage incremental data loading, reducing processing time by **30%** compared to previous batch jobs.
- Developed **Snowflake security roles** to grant granular access for reporting teams, ensuring data segregation and compliance with internal policies.

Automated ETL Processes with Python and Snowflake

- Created **Python scripts** to automate the extraction, cleaning, and loading of operational data into a **Snowflake** data warehouse.
- Designed and implemented data validation checks within the pipeline to ensure data integrity, catching approximately **95%** of malformed records before loading.
- Integrated **Snowpipe** for near real-time data ingestion, enabling faster access to up-to-date information for business analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
