HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and optimized **SQL queries** for data extraction, transformation, and loading against large datasets within the **Snowflake** platform, supporting key reporting initiatives.
- Implemented **ETL pipelines** using **Snowflake's native capabilities**, including **Snowpipe** for automated data ingestion and **STREAMS** for change data capture, ensuring efficient data flow.
- Designed and implemented **user roles and security models** within **Snowflake** to manage data access and enforce compliance standards across analytical environments.
- Wrote and maintained **SQL scripts** for complex data transformation tasks, enabling the creation of robust data models for business intelligence and analytics.
- Collaborated within a **project team** to troubleshoot and resolve complex data integration challenges, applying **Snowflake design patterns** to ensure scalable and maintainable solutions.
- Integrated **Snowflake TASKS** into existing data workflows to automate complex, multi-step data processing jobs, reducing manual intervention and improving operational efficiency.
- Containerized data processing components using **Docker** and deployed them to a managed cloud environment, ensuring consistent execution and simplified environment management.

SKILLS

Cloud Data Platform – Snowflake, Snowpipe, STREAMS, TASKS

Data Engineering – ETL, ELT, SQL, Data Pipelines, Data Modelling

Programming Languages – SQL, Python

Cloud & DevOps – Docker, Git, CI/CD

Security & Access Control – Roles, User Security

PROJECTS

Snowflake Data Warehouse Implementation for Analytics

- Designed and built a centralized data warehouse on **Snowflake** to consolidate data from disparate sources, enabling comprehensive business intelligence reporting.
- Developed **SQL scripts** and **ETL pipelines** to ingest, transform, and load data, handling approximately 1.5 TB of data weekly.
- Implemented granular **Snowflake roles and permissions** to ensure secure access to sensitive datasets for various analytical teams.

Automated Data Ingestion and Transformation Pipeline

- Created an automated data ingestion process using **Snowflake Snowpipe** to load streaming data from cloud storage into the data warehouse in near real-time.
- Developed **SQL transformations** to clean, enrich, and structure incoming data, preparing it for downstream analytical consumption, processing over 500k records per day.
- Integrated **Snowflake STREAMS** to efficiently capture and process incremental data changes, significantly reducing processing times for daily updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
