HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **full stack applications** using **React** and **Node.js**, integrating with **AWS Lambda** for event-driven processing.
- Built and deployed **REST APIs** with **Python** and **FastAPI** to support enterprise AI initiatives, handling approximately **1,500 requests per minute** during peak loads.
- Engineered **Retrieval-Augmented Generation (RAG)** solutions, developing custom knowledge-grounding frameworks and integrating with enterprise data sources.
- Developed user experiences and platform capabilities in **TypeScript**, simplifying AI solution delivery across multiple internal teams.
- Containerized AI services using **Docker** and deployed them to an **AWS EKS** cluster, improving deployment consistency and scaling efficiency.
- Collaborated with architecture and security teams to define and implement **responsible AI standards** and governance protocols for platform adoption.
- Created **dashboards** and **observability tools** using **Splunk** to monitor AI model performance, adoption rates, and operational costs.

SKILLS

AI/ML – Generative AI, AI Platforms, Retrieval-Augmented Generation (RAG), Model Orchestration, Prompt Engineering, AI Evaluation Frameworks, Copilots, Chatbots, Agents, Machine Learning

Frontend – React, TypeScript, JavaScript, Node.js

Backend – Python, Java, Spring Boot, REST APIs, FastAPI

Cloud – AWS (EC2, S3, Lambda, CloudWatch, EKS), Cloud-Native Services

Data & AI Infra – Vector Search, Knowledge Grounding, Agent Marketplaces, Skills Marketplaces, Enterprise Search

DevOps & Tools – Docker, Kubernetes, Git, Jenkins, CI/CD, Observability Tools, Dashboards

Methodologies – Agile, Scrum, Software Architecture, API Design, Security, Governance

PROJECTS

Enterprise AI Platform Development

- Developed core platform capabilities for an enterprise AI initiative using **React** and **TypeScript**, enabling faster delivery of AI-enabled experiences.
- Built **Node.js** microservices to manage an agent marketplace, allowing teams to discover and deploy approved AI capabilities across the organization.
- Integrated with **AWS S3** for storing and retrieving knowledge base documents used in **RAG** pipelines, supporting AI-driven enterprise search.

AI-Powered Knowledge Grounding System

- Designed and implemented a **Python**-based system for knowledge grounding, connecting enterprise data sources to LLMs for more accurate responses.
- Developed a **FastAPI** inference service for custom AI models, achieving p95 latencies below **200ms** for real-time query processing.
- Utilized **vector search** techniques to efficiently retrieve relevant information for augmenting AI model context, improving data relevance by an estimated **30%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
