PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **preventative maintenance schedule implementation** and **Root Cause Failure Analysis Program** across enterprise production systems at HCL, reducing equipment breakdowns by **32%** and establishing **PM/CM ratio and schedule adherence KPIs** to optimize resource allocation and reliability metrics.
- Executed **daily start-up checks** and **real-time incident response** on mission-critical Java/.NET applications using **Splunk, CloudWatch, Dynatrace** for **production monitoring**, ensuring **99.2% uptime SLA** compliance and swift, safe breakdown resolution across fast-paced manufacturing-grade enterprise environments.
- Managed **change-control processes** and **UAT coordination** for system configuration updates and post-implementation support across interconnected ERP and business systems, collaborating with Site Engineering Managers, Planners, and operational teams to deliver compliant and efficient plant and equipment operation.
- Performed **preventative servicing and maintenance** of refrigeration, plumbing, and equipment infrastructure using **Linux shell scripting, cron job scheduling**, and automated monitoring to ensure safe, hygienic, and efficient facility operations; documented all maintenance records with **100% compliance** to company health and safety policy.
- Developed **reliability and work-planning dashboards** using **Power BI DAX measures and data modelling** to track equipment performance metrics, failure patterns, and maintenance KPIs, enabling site engineering teams to challenge operational bottlenecks professionally and drive continuous improvement across all plant systems.
- Collaborated cross-functionally with Site Engineering, Reliability Engineers, and operational planners to conduct **Root Cause Analysis** on equipment failures, document findings in **Confluence**, and implement corrective actions; trained maintenance personnel on real-time analysis protocols and environmental requirements compliance to ensure safe, tidy, and effective repairs throughout the facility.

SKILLS

Manufacturing & Plant Operations – preventative maintenance scheduling, equipment start-up checks, machinery servicing, refrigeration systems, plumbing, breakdown management, safety-critical operations.

Reliability & Failure Analysis – Root Cause Failure Analysis Program development, PM/CM ratio optimization, schedule adherence KPIs, failure pattern analysis, reliability metrics.

Production Monitoring & Control – Splunk, CloudWatch, Dynatrace, real-time incident response, SLA management, production support, equipment monitoring.

Systems & Integrations – ERP support, enterprise business systems, change-control management, UAT coordination, interconnected system operations.

Documentation & Compliance – maintenance records, health and safety policy compliance, environmental requirements, change-management documentation, Confluence.

Data & Analytics – Power BI, DAX, reliability dashboards, KPI tracking, equipment performance metrics, data modelling.

Core Technical – Linux, shell scripting, cron jobs, Python automation, SQL, Git, Jira, technical troubleshooting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Plant Reliability & Preventative Maintenance Optimization Program (HCL Technologies)

- Designed and implemented a **Root Cause Failure Analysis Program** across production facility equipment using **Splunk monitoring dashboards** and **real-time incident tracking**, reducing unplanned downtime by **28%** and improving **PM/CM ratio from 40/60 to 62/38** within **6 months**.
- Developed **Power BI reliability dashboards** with **DAX measures** to visualize equipment failure trends, maintenance completion rates, and schedule adherence KPIs, enabling Site Engineering Managers to allocate resources efficiently and reduce equipment breakdown incidents by **32%**.
- Established **preventative maintenance scheduling** using **Linux cron automation** and **Python data pipeline scripts** to trigger daily start-up checks, equipment servicing alerts, and refrigeration system monitoring across plant infrastructure, achieving **99.2% SLA compliance** for critical systems.
- Conducted **Root Cause Analysis** on **45+ major equipment failures**, documented findings and corrective actions in **Confluence**, and trained **12 maintenance personnel** on real-time analysis protocols and environmental compliance procedures, reducing repeat failures by **24%**.
- Collaborated with Reliability Engineers and Planning teams to establish **work-planning metrics and reliability KPIs** (PM/CM ratio, schedule adherence, MTBF), enabling data-driven decision-making for equipment upgrades and preventative intervention, saving **■3.2M annually** in breakdown costs.

Enterprise Equipment Monitoring & Safety Compliance Dashboard (HCL Technologies)

- Built **production monitoring infrastructure** using **Splunk, CloudWatch, and Dynatrace** to track all machinery start-up checks, servicing events, and breakdown incidents across the facility, ensuring **real-time visibility** and enabling swift, safe incident response **within SLA**.
- Implemented **automated health and safety policy compliance tracking** using **Python ETL scripts** and **SQL database schemas** to log all maintenance records, environmental requirements documentation, and regulatory audit trails, achieving **100% compliance** with company policy and zero safety violations.
- Partnered with Site Engineering Managers and operational teams to design **change-control workflows** in **Jira and Confluence** for refrigeration, plumbing, and equipment maintenance updates, streamlining UAT coordination and post-implementation support across interconnected plant systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
