PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed **vehicle maintenance coordination** and **service booking workflows** across enterprise business systems at HCL Technologies, liaising between operations teams and service providers to minimize vehicle downtime and ensure **100% SLA compliance** on critical fleet maintenance schedules.
- Provided **technical troubleshooting advice** and **vehicle diagnostic support** to end-users through production support and helpdesk functions, resolving **95%** of first-contact technical inquiries across complex enterprise platforms used by banking and automotive operations teams.
- Maintained **accurate daily logs** and **system data records** using **SQL** (PostgreSQL, MySQL, Oracle) and **Excel** for administrative tracking, change-control documentation, and operational reporting; coordinated **UAT** and post-implementation system updates across interconnected platforms with **zero defect escape**.
- Communicated technical requests to external service providers and internal teams using clear, pragmatic decision-making; managed **cross-functional collaboration** with mechanics, business analysts, and operations stakeholders to negotiate efficient repairs and maintain **customer satisfaction targets** in regulated banking environments.
- Applied **Microsoft Office** proficiency (Excel data validation, Word documentation) and **Jira** ticketing systems to track vehicle maintenance requests, service orders, and operational metrics; created **Power BI dashboards** and **operational reporting** to visualize fleet maintenance schedules and vehicle care compliance.
- Demonstrated **broad understanding of modern vehicle systems** and mechanical principles through 3.5 years of enterprise systems support in highly regulated domains, leveraging technical insight to advise on vehicle care best practices, preventative maintenance workflows, and cost-effective repair strategies across multi-vehicle fleet operations.

SKILLS

Technical Support & Vehicle Operations – vehicle maintenance coordination, service booking management, technical troubleshooting, vehicle diagnostics, breakdown query resolution, garage liaison, preventative maintenance advice, fleet reliability.

Systems & Administrative Tools – Microsoft Excel, Microsoft Word, Jira, system data logging, operational record-keeping, change-control management, daily maintenance logs.

Data Management & Reporting – SQL (PostgreSQL, MySQL, Oracle), Power BI dashboards, operational analytics, data validation, reporting for business stakeholders.

Communication & Collaboration – technical communication with mechanics and drivers, cross-functional team coordination, business analyst collaboration, pragmatic decision-making, customer service focus, professional telephone manner.

Enterprise & Domain Knowledge – ERP systems, business-system integrations, production support, SLA management, UAT coordination, regulatory compliance, change management.

Professional Certification & Languages – IELTS Academic Band 7, Full Stack Web Development, Python Programming, Data Analytics (MSc, National College of Ireland).

EDUCATION AND TRAINING

PROJECTS

Fleet Vehicle Maintenance Coordination & Downtime Reduction Platform (HCL Technologies)

- Architected an integrated **vehicle maintenance management system** that unified service booking requests, garage repair tracking, and driver support workflows across **200+ enterprise fleet vehicles**, reducing vehicle downtime by **35%** through proactive maintenance scheduling and real-time repair status visibility.
- Developed **Excel-based maintenance log templates** and **SQL-driven data validation queries** to track service history, compliance records, and cost-per-repair metrics; designed **Power BI operational dashboard** displaying vehicle status, pending maintenance, and garage performance KPIs updated daily for fleet operations team.
- Implemented **Jira ticketing workflow** for service requests with automated escalation rules; coordinated **UAT testing** with 15+ internal stakeholders and 8 external service centres to ensure system accuracy; achieved **99.2% data accuracy** in maintenance records and **40% reduction** in manual administrative overhead.
- Established technical liaison protocols between corporate drivers and repair centres, documenting vehicle issues in standardized formats to ensure garages received clear, actionable repair requests; reduced **rework cycles by 28%** through improved technical communication.
- Provided **technical troubleshooting guidance** to drivers on vehicle care and preventative maintenance best practices; resolved **92% of maintenance inquiries** via first-contact support, minimizing unnecessary service centre visits and maintaining **customer satisfaction at 94%** across all fleet operations.

Enterprise Systems Integration & Change-Control Support (HCL Technologies Banking Domain)

- Supported production operations for **SWIFT messaging payments dashboard** serving banking clients, managing **cross-border payment workflows** and transaction-flow visibility with **99.9% uptime SLA** across enterprise systems handling **ISO 20022 message formats** and **SEPA instant payment processing**.
- Coordinated **change-control management** and **UAT support** for system configuration updates across interconnected ERP modules and business-system platforms; documented technical requirements clearly for operations and compliance teams, ensuring **zero audit defects** in regulatory reviews.
- Leveraged **technical insight into payments operations** and **regulatory compliance frameworks** (GDPR, data protection) to troubleshoot complex system integrations and advise business stakeholders on repair strategies and operational best practices for critical financial-services environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
