PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed timely and accurate client billing across multiple legal entities using **Oracle, PostgreSQL, and MySQL** databases; designed and maintained client static data architecture ensuring correct interpretation of fee arrangements, achieving **100% billing accuracy** and on-time delivery to strict month-end close deadlines.
- Executed collection of fee debtors through generation of payment instructions and banking entries using **REST API integrations** and database-level data flows; collaborated with Financial Control and Client Services teams to ensure adherence to **SOX and audit requirements**, improving collections cycle by **18%**.
- Developed **Power BI dashboards and DAX measures** for revenue recognition and accruals reporting, providing real-time visibility into billing status, outstanding fees, and month-end close completion metrics; delivered dynamic reports to Finance leadership supporting month-end reporting deadlines and regulatory compliance.
- Liaised with New Business, Client Services, and Operations teams to capture new and terminated client business; documented fee arrangements, configured billing systems, and ensured accurate accrual and invoicing within agreed timelines for high-profile clients across **EMEA entities**.
- Identified, escalated, and resolved billing delays and client queries through root-cause analysis and process improvement; documented solutions in **Confluence** knowledge base, reducing resolution time by **25%** and strengthening internal controls across the Fees team.
- Participated as Subject Matter Expert in fees-related projects and internal/external audits; assessed issues, identified solutions, and problem-solved billing and revenue recognition challenges with strong written and verbal communication to peers, management, and overseas partners in a fast-paced month-end environment.

SKILLS

Financial Operations & Billing – client billing, fee recognition, revenue accruals, month-end close, debtors collection, payment instructions, banking entries, financial reporting deadlines.

Data Management & Analytics – Oracle, PostgreSQL, MySQL, SQL ad-hoc queries, client static data configuration, data modelling, Power BI dashboards, DAX measures, Power Query, data warehousing.

Regulatory & Compliance – SOX compliance, audit requirements, regulatory controls, GDPR, financial control procedures, change management, audit documentation.

Business Systems & Integration – REST API integrations, ERP systems, cross-system data flows, change-control management, interconnected system support.

IT & Tools – MS Excel (advanced), Power BI, Confluence, Jira, PostgreSQL, MySQL, Oracle, REST APIs, Git, Linux.

Soft Skills – attention to detail, analytical problem-solving, planning and organisation, stakeholder liaison, cross-functional collaboration, flexible approach to changing deadlines and workloads.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

EMEA Fee Billing & Revenue Recognition Automation Platform (HCL Technologies)

- Architected end-to-end fee billing workflow using **Power BI dashboards, DAX measures, and SQL-based ETL pipelines** to capture, recognise, and bill revenue across **15+ legal entities** in EMEA region, automating accruals calculation and improving month-end close cycle time by **35%**.
- Designed client static data repository in **Oracle and PostgreSQL** with validation rules and audit trails to ensure correct interpretation of documented fee arrangements; implemented **REST API integrations** between billing system and Financial Control platforms, enabling real-time revenue visibility and **100% billing accuracy**.
- Built operational reporting dashboards displaying debtors ageing, payment status, and accrual completion metrics; configured automated escalation alerts in **Power BI** for billing delays and overdue collections, reducing days sales outstanding by **22%** and improving cash-collection cycle.
- Partnered with New Business and Client Services teams to document and implement fee arrangement changes; created **Confluence SOPs and control documentation** for billing procedures, new business onboarding, and month-end accruals, ensuring **SOX compliance** and audit readiness across all EMEA entities.
- Executed quarterly internal and external audit engagements as Subject Matter Expert; identified and remediated control gaps in billing process, payment instruction generation, and revenue recognition, achieving **zero audit findings** in two consecutive audit cycles.

Cross-Border Payments Fee Reconciliation & ISO 20022 Compliance Dashboard (HCL Technologies)

- Developed **Power BI and Tableau** reconciliation dashboards for cross-border and SEPA payment fee flows aligned to **ISO 20022 message standards**; tracked payment message volume, fee allocation accuracy, and regulatory compliance metrics across payment corridors, reducing manual reconciliation effort by **40%**.
- Collaborated with banking-domain Business Analysts and operations teams to map payment fee arrangements to **SEPA, instant payments, and PSD2 Open Banking** regulatory frameworks; ensured billing system captured fees accurately in compliance with financial services audit requirements and **GDPR data protection** obligations.
- Generated payment instruction entries and banking reconciliation reports using **SQL queries and Python ETL scripts**; automated monthly fee accrual calculations for high-volume payment corridors, improving billing timeliness and reducing fee-recognition discrepancies by **28%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
