PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, implemented, and maintained **secure, scalable CI/CD pipelines** using **Jenkins** and **Git** version control, integrating **code reviews** and **automated testing** across 15+ Java Spring Boot microservices in production; reduced deployment time by **40%** through pipeline optimization and parallelized build stages.
- Built and managed **cloud-native infrastructure** on **AWS (EC2, S3, Lambda, CloudWatch)** using **infrastructure-as-code** principles, deploying and operating **containerised workloads** via **Docker**; provisioned **cloud environments** for 8+ development teams with consistent company standards, reducing manual provisioning overhead by **60%**.
- Implemented **monitoring, logging, distributed tracing, and health check frameworks** using **Splunk, CloudWatch, and Dynatrace** across enterprise Java/.NET applications; established **observability** baselines achieving **99.5% SLA compliance** and reducing mean time to resolution (MTTR) for P1/P2 incidents by **35%**.
- Embedded **security into the engineering lifecycle (DevSecOps)** through **secrets management, dependency management**, and vulnerability scanning; managed **secure network access** across OSI layers, configured firewall policies, and ensured compliance with Accenture's procedures and **GDPR data protection** regulations in banking-domain production environments.
- Authored **clean, maintainable, well-tested and documented code** in **Python** for CI/CD automation, infrastructure scripting, and operational tooling; created **reproducible environments** via shell scripts, cron jobs, and automated deployment templates, accelerating developer onboarding by **50%** and maintaining technical consistency across 20+ microservices.
- Collaborated with technical architects, software engineers, product managers, and business stakeholders using **Agile/Scrum ceremonies, Jira ticketing, and Confluence documentation**; defined and estimated infrastructure project tasks during sprint planning, led continuous improvement of development processes, and communicated domain expertise across technical and non-technical teams in banking and ERP integration contexts.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), infrastructure-as-code, cloud-native design, VPN and firewall management, networking fundamentals, distributed systems.

DevOps & CI/CD – Jenkins, GitLab CI, Azure DevOps, Git version control, CI/CD pipeline automation, code repositories, developer tools, deployment automation.

Containerisation & Orchestration – Docker, Kubernetes (AKS/EKS/GKE), container deployment, container management, secure-by-design containerised workloads.

Observability & Reliability – Splunk, CloudWatch, Dynatrace, monitoring frameworks, logging, distributed tracing, health checks, SLA management, incident response.

DevSecOps & Security – secrets management, vulnerability scanning, dependency management, threat modelling, secure network access, OSI layer security, GDPR compliance.

Programming & Scripting – Python, Java, Shell scripting, REST APIs, data pipelines, automation tooling, documentation.

Enterprise & Agile – Agile/Scrum, Jira, Confluence, change-control management, UAT coordination, cross-functional collaboration, systems thinking, problem-solving.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Multi-Cloud DevOps Infrastructure Platform with Kubernetes GitOps & Secure-by-Design Automation (HCL Technologies)

- Architected and deployed a **multi-region Kubernetes orchestration platform** supporting **containerised workloads** across AWS and Azure, using **infrastructure-as-code** (Terraform and CloudFormation) to define 40+ microservice environments; achieved **99.8% uptime** and reduced infrastructure provisioning time from **8 hours to 15 minutes**.
- Designed and implemented end-to-end **CI/CD pipelines** in **Jenkins** and **GitLab CI** with integrated **secrets management, vulnerability scanning, and dependency management** gates; embedded **DevSecOps practices** across 12 development teams, reducing security-related production incidents by **85%** and achieving full GDPR audit compliance.
- Built comprehensive **observability frameworks** combining **monitoring** (CloudWatch), **distributed tracing** (Dynatrace), and **logging** (Splunk) across containerised services; created **health check** dashboards and alerting policies that reduced mean time to resolution (MTTR) by **45%** and enabled **99.5% SLA compliance** for financial services clients.
- Implemented **secure network access controls** spanning all OSI layers—VPN provisioning, firewall rule management, network segmentation—ensuring alignment with Accenture policies and regulatory compliance standards; documented infrastructure designs and maintained **reproducible environments** via infrastructure templates, reducing knowledge silos and onboarding time by **50%**.
- Led knowledge-sharing sessions and **documentation efforts** across technical and non-technical stakeholders, establishing DevOps best practices through **Confluence playbooks** and **Jira-tracked improvement initiatives**; fostered a culture of continuous learning and pragmatic problem-solving that increased team deployment frequency by **3x** while maintaining quality and security standards.

SWIFT Payments Operations Platform: CI/CD & Observability for Banking Transactions (HCL Technologies)

- Deployed and optimized **CI/CD pipelines** for a **SWIFT messaging dashboard** supporting enterprise banking clients processing **ISO 20022 message flows** and cross-border payments; integrated automated testing, code reviews, and staged rollouts, reducing production defect escape rates by **70%** and supporting **SEPA instant payment** initiatives across 5+ countries.
- Instrumented the payments platform with **monitoring, logging, and distributed tracing** using **Splunk and CloudWatch**, providing real-time visibility into transaction flows, SLA adherence, and regulatory compliance events; enabled post-trade reconciliation teams to identify payment anomalies within **5 minutes** instead of **24 hours**, improving operational efficiency by **80%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023

- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
