PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines using Jenkins and Git** for enterprise Java Spring Boot and Python microservices, automating build, test, and deployment workflows across development, staging, and production environments; reduced deployment time by **40%** and enabled daily releases for 15+ services.
- Architected and optimized **infrastructure on AWS (EC2, S3, Lambda, CloudWatch)** with **Docker containerization** for scalable application delivery; implemented **Infrastructure as Code** principles for repeatable, version-controlled infrastructure provisioning; reduced provisioning time from **3 days to 4 hours**.
- Implemented comprehensive **monitoring and logging stacks using Splunk, Dynatrace, and CloudWatch** with custom dashboards, alerting rules, and performance metrics; drove **SLA compliance to 99.8%** and reduced P1 incident resolution time by **35%** through proactive observability.
- Automated operational workflows and infrastructure tasks using **Python scripting, shell scripting, and cron jobs on Linux systems** for data pipelines, ETL processes, and scheduled reporting; eliminated **20 manual daily tasks** and improved data delivery accuracy to **99.95%**.
- Collaborated cross-functionally with engineering, QA, and business teams to design secure, scalable deployment architectures; integrated **security best practices into CI/CD pipelines** including secrets management, container scanning, and change-control workflows; supported **GDPR and regulatory compliance** requirements across enterprise systems.
- Supported and optimized **PostgreSQL, MySQL, and Oracle** database infrastructure; performed schema migrations, data validation, and performance tuning; coordinated **change management** and **UAT** across interconnected ERP and business systems, ensuring zero-downtime deployments for mission-critical applications.

SKILLS

DevOps & Cloud Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure cloud concepts, Docker containerization, Infrastructure as Code, Infrastructure automation, CI/CD pipeline design and maintenance.

CI/CD & Automation – Jenkins, Git, GitHub Actions, Azure DevOps, Python scripting, shell scripting, Linux, automation frameworks, continuous deployment workflows.

Monitoring, Logging & Observability – Splunk, Dynatrace, Azure Monitor, Application Insights, CloudWatch, custom dashboards, alerting, performance optimization, incident response.

Programming & Scripting – Python, Java, SQL (PostgreSQL, MySQL, Oracle), REST APIs, Spring Boot, Flask, FastAPI, Bash shell scripting.

Security & Compliance – Secrets management, CI/CD security best practices, container security, regulatory compliance (GDPR), change-control management, audit trails.

Enterprise Systems & Integrations – ERP integration support, cross-system APIs, database-level integrations, UAT coordination, change management, Jira, Confluence, Agile/Scrum.

Data & Analytics – Power BI, Tableau, Data modelling, ETL pipeline development, data warehousing, pandas, NumPy, statistical analysis.

EDUCATION AND TRAINING

PROJECTS

Multi-Region Kubernetes GitOps Platform with Automated Blue-Green Deployments (HCL Technologies)

- Architected and deployed a **Kubernetes and Helm-based container orchestration platform** supporting **CI/CD automation** across development, staging, and production environments; integrated **Infrastructure as Code (Terraform and Ansible)** for reproducible, version-controlled infrastructure provisioning across multiple cloud regions.
- Implemented **blue-green deployment automation** using **Kustomize and Kyverno** for policy-driven security controls; reduced deployment risk by enabling instant rollback, cutting deployment-related incidents by **60%** and supporting **20+ daily releases** with zero downtime.
- Integrated **security scanning (Snyk, Bandit) and automated testing** into the DevOps workflow; enforced **container security best practices** including image scanning, secrets management via HashiCorp Vault, and network policies via **CNI plugins**; reduced security vulnerabilities in production by **85%**.
- Deployed comprehensive **monitoring, logging, and observability** using **Prometheus, Grafana, and Elasticsearch** with custom alerting rules; achieved **99.95% platform uptime** and reduced incident detection latency from **15 minutes to 30 seconds** through real-time metrics aggregation.
- Documented platform architecture, runbooks, and operational procedures in Confluence; trained engineering and QA teams on GitOps workflows, container security, and Kubernetes best practices; achieved **95% team adoption** within 2 months.

Enterprise SWIFT Payments Operations Dashboard with Real-Time ISO 20022 Message Monitoring (HCL Technologies)

- Designed and implemented a real-time **monitoring and observability solution for SWIFT messaging (MT/MX format)** supporting cross-border payments, SEPA instant payments, and ISO 20022 message flows; integrated **Splunk and Dynatrace dashboards** for transaction-flow visibility and operational alerting.
- Built **Python ETL data pipelines and REST APIs** to aggregate payment message metadata, reconciliation data, and regulatory audit trails; ensured **GDPR compliance** and data protection controls for sensitive financial transaction information; delivered **sub-second query performance** on **100M+ daily payment messages**.
- Collaborated with banking-domain business analysts, operations teams, and regulatory stakeholders to define requirements, coordinate UAT testing, and implement post-go-live support; achieved **SLA compliance of 99.99%** for critical payment operations and zero regulatory audit findings.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
