PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **Java Spring Boot** REST APIs and **full-stack web applications** using **React** and **Angular** for enterprise clients, implementing **clean, maintainable code** following team standards and participating in **peer code reviews** to ensure **quality and best practices**; delivered 12+ features across cloud and mobile platforms with **zero critical defects** post-deployment.
- Collaborated with **product managers, architects, QA engineers, and developers** in **Agile ceremonies** (sprint planning, daily stand-ups, reviews, retrospectives) to translate requirements into technical solutions; contributed to **front-end and back-end development** under senior engineer mentorship, reducing sprint cycle time by **18%** through improved requirement clarity.
- Built and maintained **automated testing** frameworks and **test-driven development** practices using **JUnit** and **REST API testing tools**, identifying and fixing **bugs and performance issues** across production services; achieved **85% code coverage** on assigned modules and reduced P1/P2 incident response time by **22%**.
- Implemented **version control** discipline using **Git** branching strategies and **CI/CD pipelines** with **Jenkins** to support team collaboration; deployed features to **AWS** (EC2, Lambda, CloudWatch) and containerized applications using **Docker**, ensuring consistent development, staging, and production environments.
- Developed **SQL** data queries and schema migrations across **PostgreSQL, MySQL, and Oracle** databases to support feature development and ad-hoc analytics; wrote **Python** automation scripts for testing, data validation, and debugging workflows, reducing manual verification overhead by **30%**.
- Learned and applied fundamental software engineering concepts including **SOLID principles, design patterns, and software debugging techniques**; demonstrated strong **problem-solving skills** and **willingness to learn new technologies** across front-end frameworks, cloud platforms, and database systems; maintained **excellent written and verbal communication** with cross-functional teams in daily stand-ups and technical discussions.

SKILLS

Frontend Development – React, Angular, HTML, CSS, JavaScript, responsive design.

Backend Development – Java Spring Boot, Python, REST API design, microservices patterns.

Databases & SQL – PostgreSQL, MySQL, Oracle, schema design, query optimization.

Cloud & DevOps – AWS (EC2, Lambda, CloudWatch), Docker, Git, Jenkins CI/CD pipelines.

Software Engineering Practices – Agile/Scrum, test-driven development, automated testing, JUnit, code review, debugging, version control.

Additional Technical – C#, C++, Linux, problem-solving, software design fundamentals.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

IoT Lighting Control & Analytics Platform (HCL Technologies)

- Led full-stack development of a **cloud-connected IoT lighting and sensing system** combining **React front-end**, **Java Spring Boot microservices**, and **AWS Lambda** serverless functions to manage 2,000+ networked lighting fixtures across three buildings; implemented **real-time dashboard** for operational monitoring and **RESTful API** for device command/control.
- Designed and deployed **automated testing suite** using **JUnit** and **REST API testing frameworks**, achieving **88% code coverage** across backend services; integrated **CI/CD pipeline with Jenkins** to enable **daily deployments**, reducing manual release overhead by **40%** and improving team velocity.
- Optimized **PostgreSQL database queries** and implemented **Docker containerization** for development and production parity; reduced query latency by **35%** and standardized onboarding for 6+ team members through consistent container-based environments.
- Collaborated with **product managers and QA engineers** throughout Agile sprints to refine requirements, implement feedback, and deliver features meeting both technical and business needs; participated in sprint retrospectives and contributed process improvements that increased deployment frequency by **25%**.
- Identified and resolved **performance issues** and **bugs** in mobile and web components through systematic debugging; reduced production defect escape rate by **20%** through improved peer code review practices and test-driven development adoption.

Enterprise System Integration & Version Control Consolidation (HCL Technologies)

- Implemented **Git version control standards** and **CI/CD pipeline automation** across legacy enterprise systems, enabling **continuous integration** for development team of 8 engineers; reduced merge conflicts by **45%** and established repeatable **software development tools** workflows for code collaboration.
- Supported **front-end and back-end integration** work connecting **React** interfaces to **Java Spring Boot** backend services via **SQL** data layers; ensured **clean, maintainable, and well-documented code** following established team standards, reducing onboarding time for new engineers by **3 weeks**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
