## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Managed portfolio of concurrent enterprise infrastructure projects across **multiple client accounts**, directing project teams through full lifecycle from concept design through procurement, construction, and commissioning while achieving **targeted profit margins** and preventing financial write-downs through proactive budget tracking and cost-control measures.
- Identified and mitigated **Risk Triggering Factors (RTFs)** across complex, high-value data center and colocation facility projects by implementing structured risk assessment frameworks, leading cross-functional teams in developing mitigation strategies, and exercising decision-making authority to minimize contractual claims exposure by **35%**.
- Supervised and mentored **Project Managers** overseeing multiple concurrent data center projects and large-scale programs; directed efficient team operations through change-control management, UAT coordination, and post-go-live support, ensuring consistent high-quality execution and repeat business retention across **8+ enterprise clients**.
- Drove **revenue growth** and client retention through delivery of mission-critical data center projects meeting performance, reliability, and efficiency standards; coordinated complex client engagements involving technical due diligence, facility design validation, and infrastructure specifications, resulting in **92% client satisfaction scores**.
- Led operational excellence initiatives across assigned project portfolios by establishing **SLA management frameworks**, implementing real-time monitoring dashboards using **Power BI** for project health tracking, and directing teams to maintain **zero margin erosion** through disciplined cost tracking and commercial risk management.
- Delivered strategic project advisory services spanning buildings sector infrastructure, supporting clients through early-stage concept development, design requirements validation, and technical feasibility assessments; managed regulatory compliance considerations and stakeholder alignment across interconnected project systems and multi-disciplinary teams.

## SKILLS

**Project Management & Delivery** – portfolio management, concurrent project delivery, full lifecycle project management, risk triggering factors (RTFs), risk mitigation strategies, profit margin management, financial controls, change-control management, team supervision and mentoring.

**Buildings & Infrastructure Sector** – data center project management, colocation facility delivery, mission-critical infrastructure, design development, procurement management, construction management, commissioning, performance and reliability standards.

**Business & Commercial Management** – revenue growth strategy, client account management, repeat business retention, margin optimization, contractual claims management, cost control, budget tracking, SLA management, stakeholder engagement.

**Data & Business Intelligence** – Power BI dashboards, operational reporting, KPI tracking, project health dashboards, data modelling, DAX measures, business analytics.

**Enterprise Systems & Integration** – multi-system project coordination, interconnected system management, change management across enterprise platforms, UAT coordination, post-implementation support.

**Professional Qualifications & Development** – postgraduate qualification in project management (MSc Data Analytics, NCI Dublin), chartered status pathway, APM affiliation, RICS/CIOB/ICE/RIBA/Engineers Ireland membership track.

**Technical & Operational** – financial analysis and modeling, risk assessment frameworks, regulatory compliance, documentation and reporting, cross-functional team leadership.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

### **Multi-Facility Data Center Portfolio Delivery & Risk Management Program (HCL Technologies)**

- Directed delivery of **12 concurrent data center and colocation facility projects** across **6 enterprise clients** spanning design concept through commissioning phases; established centralized **portfolio governance** framework with monthly profit/margin tracking, RTF identification protocols, and risk mitigation dashboards, achieving **£18.2M in contract value** with **zero write-downs** across 18-month delivery cycle.
- Implemented integrated **Power BI project health dashboard** consolidating real-time KPIs across all assigned projects including budget vs. actual spend, schedule variance, SLA adherence, and Risk Triggering Factor escalations; dashboard reached **95% adoption rate** among 14 supervising Project Managers, enabling **24-hour RTF escalation response** and reducing decision latency by **40%**.
- Led **Risk Triggering Factor assessment** program identifying emerging contractual, technical, and commercial risks across high-value, technically demanding projects; developed targeted mitigation strategies, directed team implementation, and tracked exposure reduction, resulting in **£2.1M in claims avoidance** and **100% SLA maintenance** across portfolio.
- Supervised and mentored **8 Project Managers** managing multiple concurrent projects each; established monthly 1-on-1 coaching cadence, developed change-control and UAT coordination playbooks, and created decision-authority guidelines; team delivered **92% on-time, on-budget project completions** and achieved **95% client satisfaction** retention rate.
- Managed complex multi-stakeholder client engagements for **2 flagship data center expansion programs**; coordinated requirements validation with operations teams, led technical design reviews across architectural and engineering disciplines, and maintained regulatory compliance alignment; each program valued at **£4.5M+** with repeat business secured for **3-year managed services phase**.

### **Enterprise Infrastructure Project Governance & Change-Control System (HCL Technologies)**

- Architected centralized **change-control and UAT coordination platform** for enterprise buildings and infrastructure projects, integrating project schedule milestones, risk registers, and contractual compliance checkpoints; supported **24 concurrent projects** with standardized governance workflows, reducing change-request cycle time by **45%** and eliminating **6 contractual disputes** through structured audit trails.
- Developed and published **comprehensive project execution playbooks** covering risk assessment, client engagement protocols, design validation procedures, and post-go-live support workflows; training materials adopted across **35+ project team members** with **88% competency certification rate** in change-control processes.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
