PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed **smoke testing and regression testing** across production releases of enterprise Java/.NET **applications**, validating feature updates and system reliability using **Jira** and **Splunk** dashboards to track 40+ test cycles monthly with zero critical post-release defects.
- Identified, documented, and reported bugs with **clear, accurate** descriptions and supporting evidence; collaborated in **bug triage** sessions with developers and product teams to prioritize defects, reducing average resolution time by **35%** across P1/P2 incidents.
- Managed test cases and tracked execution progress using **test management tools** and **Jira** for issue logging; maintained structured test documentation and contributed to **QA process improvements** that standardized test-case templates across the platform.
- Validated functionality across **different browsers and mobile devices** using **browser developer tools** to inspect elements, monitor network requests, and troubleshoot integration issues; tested SWIFT messaging dashboard across Chrome, Firefox, Safari, and iOS/Android clients.
- Performed **manual test case execution** for web and mobile applications spanning payment operations, ERP integrations, and enterprise business systems; documented test results and participated in UAT coordination, ensuring compliance with regulatory and SLA requirements.
- Utilized **browser developer tools** including Network tab, Console, and DOM inspection to diagnose front-end defects and API integration failures; created **test documentation** detailing reproduction steps, environment configurations, and performance-monitoring metrics.

SKILLS

QA & Testing Methodologies – smoke testing, regression testing, manual test case execution, bug reporting, structured bug triage, test documentation.

Test & Project Management Tools – Jira, TestRail, test management platforms, Asana, issue tracking, test-case management.

Browser & Mobile Testing – cross-browser validation (Chrome, Firefox, Safari, Edge), mobile device testing (iOS, Android), browser developer tools, DOM inspection, Network monitoring.

Technical QA Skills – JSON structures, HTML, REST API testing, database-level validation, CI/CD pipeline testing, log analysis.

Web & Mobile Applications – web application testing, mobile application testing, payments-operations platforms, ERP systems, dashboard validation.

Core Competencies – clear communication, attention to detail, cross-functional collaboration, UAT support, SLA validation, regulatory compliance testing (GDPR, PSD2).

Enterprise & Domain Knowledge – banking and financial services, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, payments processing, ERP integrations.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Multi-Platform Mobile & Web QA Test Suite – SWIFT Payments Operations Dashboard (HCL Technologies)

- Designed and executed comprehensive **smoke testing and regression testing** strategy across iOS, Android, and web browsers for a real-time **SWIFT messaging dashboard**; created 120+ structured test cases in **TestRail** covering payment transaction flows, alerting mechanisms, and cross-border payment validations with **98% test coverage**.
- Performed **manual test case execution** across daily release cycles, validating **ISO 20022 message flows**, SEPA payment routing, and transaction-reconciliation features using **browser developer tools** (Network tab, DOM inspection) to verify API requests and response payloads; identified and documented 45+ defects with **clear, accurate** reproduction steps and supporting screenshots.
- Led **bug triage** sessions with developers and product managers, collaborating to classify P1/P2 incidents and prioritize fixes; reduced average bug-lifecycle time from 8 days to 5 days through structured **Jira** workflow automation and SLA-aligned escalation protocols.
- Validated functionality across 8+ browsers (Chrome, Firefox, Safari, Edge) and 4 mobile platforms (iOS/Android phones and tablets); tested **mobile application** responsiveness, gesture interactions, and background-payment-processing reliability, documenting **test documentation** for each browser/device combination.
- Contributed to **QA process improvements** by standardizing **test documentation templates** and establishing reusable test-case libraries for payments-domain scenarios; created onboarding guide for new QA team members, reducing ramp-up time by **40%**.

Enterprise Banking ERP Integration Testing & Regression Validation Suite (HCL Technologies)

- Executed **regression testing** across quarterly ERP configuration updates and post-go-live change-management releases; tested 60+ interconnected system workflows spanning payments, reconciliation, and compliance modules using **Jira** for test-case tracking and automated regression result reporting.
- Identified integration defects between REST APIs connecting ERP systems and banking-operations platforms; used **browser developer tools** and SQL query validation to diagnose root causes and document findings for developer handoff, improving first-pass fix rate by **32%**.
- Supported UAT coordination with banking-domain business analysts and compliance teams; validated regulatory requirements (GDPR data masking, audit-trail completeness, PSD2 transaction logging) through structured test scenarios and post-implementation triage.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
