## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Managed production support and 24x7 on-call incident response for enterprise AWS services using **CloudWatch, Dynatrace, and Splunk**, achieving **99.9% SLA compliance** through root-cause analysis, anomaly detection, and proactive operational health monitoring of high-availability distributed systems.
- Designed and implemented **automation scripts in Python and shell** for operational workflows, change-management document processing, and service monitoring, reducing manual operational backlog by **40%** and enabling faster incident resolution across interconnected EC2, S3, and Lambda infrastructure.
- Developed and deployed **REST API integrations and cross-system data flows** using **Java Spring Boot and PostgreSQL**, supporting enterprise business system interconnections with version control (**Git**), CI/CD pipelines (**Jenkins**), and change-control governance for EU customer-facing services.
- Operated and maintained **Docker containerization, AWS infrastructure (EC2, S3, Lambda, CloudWatch)**, and **Linux systems administration** including log analysis and cron-based scheduling, ensuring reliable service delivery and operational efficiency for utility computing platforms at scale.
- Collaborated with technology leaders and cross-functional teams to enhance day-to-day operations, contributing to availability, reliability, latency, and performance improvements of cloud services; participated in UAT coordination and post-go-live triage to ensure seamless customer experience.
- Reviewed operational health dashboards and service metrics using **data analytics tools**, crafted actionable bug reports and operational intelligence artifacts, and served as subject-matter educator on system complexities and best practices to service and operations teams, fostering knowledge-sharing culture.

## SKILLS

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting, log analysis.

**Languages & Backend** – Python, Java, Spring Boot, REST APIs, SQL (PostgreSQL, MySQL, Oracle).

**DevOps & Automation** – Git, Jenkins, CI/CD pipelines, change-management, on-call rotations, incident management.

**Monitoring & Observability** – CloudWatch, Dynatrace, Splunk, anomaly detection, SLA management, operational health monitoring.

**Data & Analytics** – Power BI, Tableau, data modelling, DAX, Power Query, operational dashboards, data warehousing.

**Methodologies & Tools** – Agile/Scrum, Jira, Confluence, change-control governance, root-cause analysis.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

## **AWS Managed Operations Reliability Platform – Service Health & Incident Automation (HCL Technologies)**

- Architected and deployed a comprehensive **operational health monitoring and incident-response automation platform** for AWS utility computing services, integrating **CloudWatch, Dynatrace, and custom Python automation scripts** to detect anomalies, classify incidents, and trigger escalation workflows across EC2, S3, Lambda, and Bedrock infrastructure supporting EU customers.
- Engineered **24x7 on-call escalation automation** and change-management validation engine using **Python, Jenkins pipelines, and SQL-backed event logging**, reducing mean-time-to-response (MTTR) by **45%** and enabling on-call engineers to resolve **P1/P2 incidents 3x faster** through intelligent alert routing and contextual service dependency mapping.
- Built operational dashboards using **Power BI and DAX** to visualize service reliability metrics, SLA compliance, incident frequency, and latency trends across multiple availability zones; delivered weekly operational intelligence reports to leadership, enabling data-driven capacity planning and service optimization decisions.
- Developed **Linux shell scripts and Python automation** to streamline operational backlog tasks including log aggregation, metric reconciliation, configuration validation, and post-incident documentation, reducing manual overhead by **50%** and freeing team capacity for high-value reliability engineering work.
- Collaborated with AWS global teams and EU customer stakeholders to translate ESC launch requirements into operational runbooks, monitoring configurations, and on-call playbooks; conducted knowledge-transfer sessions educating service teams on system complexities, best practices, and incident-response protocols.

## **European Sovereign Cloud (ESC) Payment Systems Observability & Change Governance (HCL Technologies)**

- Implemented comprehensive observability infrastructure for EU-regulated payment and transaction-processing services running on ESC, integrating **CloudWatch metrics, Splunk log aggregation, and Dynatrace APM** to ensure audit-trail compliance, GDPR data-residency requirements, and operational visibility across cross-border payment workflows.
- Designed and enforced change-control governance frameworks for ESC infrastructure changes, coordinating **Git-based version control, Jenkins CI/CD validation, and UAT coordination** with banking-domain business analysts and regulatory stakeholders; achieved **100% change traceability** and zero post-deployment compliance violations.
- Developed **Python-based ETL and reporting pipelines** to aggregate operational metrics, SLA performance data, and incident trends into executive dashboards; leveraged **SQL (PostgreSQL, Oracle) and data warehousing techniques** to enable root-cause analysis and predictive capacity planning for EU utility computing services.

## **ACHIEVEMENTS & CERTIFICATIONS**

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
