PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed production operations and incident response for enterprise cloud services using **AWS (EC2, S3, Lambda, CloudWatch)** and monitoring tools (**Splunk, Dynatrace**), achieving **99.8% service availability** through SLA-driven P1/P2 incident triage, root-cause analysis, and cross-team escalation protocols aligned with high-availability requirements.
- Designed and deployed **automation scripts in Python and shell scripting** to streamline operational workflows, change-management procedures, and system health diagnostics across **Linux** environments, reducing manual intervention overhead by **40%** and improving mean-time-to-resolution (MTTR) for incident response.
- Owned operational health reviews and anomaly detection for interconnected enterprise systems using **SQL (PostgreSQL, MySQL, Oracle)** and **REST API** integrations, generating actionable bug reports and operational backlog items that enhanced system efficiency and performance across multiple service teams by **35%**.
- Collaborated with global technology leaders and service teams on change-control management, **CI/CD pipeline development (Jenkins, Git)**, and **Docker containerization** standards; provided technical feedback on deployment strategies and infrastructure improvements to ensure seamless service scaling and reliability.
- Delivered operational training and documentation to service teams on cloud infrastructure, system dependencies, and incident-response procedures using **Confluence** knowledge bases and runbooks, enabling **15+ engineers** to independently manage **EC2, S3, Lambda** operational tasks and reducing on-call escalations by **30%**.
- Participated in on-call rotations to resolve out-of-hours incidents and service disruptions, conducting post-incident reviews, refining runbooks, and implementing preventative controls to improve system resilience and uptime across the AWS service portfolio.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, CI/CD (Jenkins, Git).

Operations & Monitoring – Production support, incident management, SLA management, availability optimization, Splunk, Dynatrace, on-call rotations.

Backend & Scripting – Python, Shell scripting, Java Spring Boot, REST APIs, system integrations.

Data & Databases – SQL (PostgreSQL, MySQL, Oracle), data pipelines, ETL, ad-hoc queries.

Agile & Collaboration – Change management, Jira, Confluence, Agile/Scrum, UAT coordination, cross-functional teamwork.

Enterprise & Domain – ERP integration support, enterprise business systems, operational reporting, system health analytics.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

European Sovereign Cloud Operations Platform (HCL Technologies)

- Architected and deployed an **AWS-native operational health monitoring and anomaly detection platform** using **CloudWatch, Lambda, Python automation**, and **REST API** integrations to continuously review service availability across **EC2, S3, Lambda, DynamoDB** infrastructure serving EU customers; platform detected **92% of critical incidents** within **5 minutes** of occurrence, reducing mean-time-to-detection (MTTD) from **45 minutes to 5 minutes**.
- Built comprehensive **change-management and runbook automation framework** using **Python shell scripting, Jenkins CI/CD pipelines, Git branching strategies**, and **Confluence documentation systems** to standardize incident response procedures and system upgrade workflows across **12 global AWS service teams**; adoption increased deployment velocity by **38%** and reduced post-deployment incidents by **44%**.
- Developed **on-call rotation management and incident escalation protocols** with structured root-cause analysis workflows, post-incident review (PIR) automation, and **Docker containerized diagnostic tooling**, enabling **20+ engineers** to manage **out-of-hours incidents independently**; on-call escalations to senior staff decreased by **52%** while maintaining **99.85% service SLA compliance**.

Enterprise Payments Operations Dashboard & SWIFT Integration Layer (HCL Technologies)

- Engineered operational monitoring dashboard for **SWIFT MT/MX messaging infrastructure** supporting **ISO 20022 message flows, SEPA, cross-border payments**, and regulatory compliance (**GDPR, PSD2**); integrated **PostgreSQL, Oracle SQL** transaction-level data with **Python ETL pipelines** to provide real-time transaction-flow visibility and operational alerting for payment processing; system visibility reduced payment reconciliation time by **33%** across **180+ daily transactions**.
- Led cross-functional requirements gathering with banking-domain business analysts, operations teams, and regulatory stakeholders to ensure **audit trail completeness, data protection compliance, and SEPA/instant-payments SLA adherence** throughout UAT and post-go-live support; delivered **18 change requests** for ERP integration and system configuration updates with zero post-deployment compliance violations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
