PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **SwiftUI applications** for enterprise device management and asset tracking systems, collaborating with cross-functional teams to translate business requirements into production-ready code; implemented **object-oriented design** principles across 8+ features serving 50,000+ managed devices (macOS, iOS, iPadOS) with **99.2% uptime**.
- Built **REST APIs** and system integrations using **Java Spring Boot** to connect Device Management, Asset Management, and Software Distribution services; designed **API endpoints** for asset lifecycle workflows, reducing manual data entry by **65%** across global business units.
- Troubleshoot and resolved software issues on **Apple platforms** (macOS, iOS, iPadOS, tvOS, visionOS) through systematic debugging, log analysis, and performance profiling; reduced mean-time-to-resolution (MTTR) by **40%** through proactive monitoring and automated alerting using **CloudWatch** and **Dynatrace**.
- Participated in code reviews and pair programming with senior engineers to apply **best practices** in Swift development, object-oriented design, and API architecture; contributed **120+ pull requests** with **zero critical defects** in production by enforcing **Git branching** strategy and **CI/CD pipeline** (Jenkins) validation.
- Explored and integrated **AI tools and generative AI capabilities** into the development workflow to accelerate feature delivery and improve code quality; evaluated LLM-assisted code generation for device management logic, improving developer velocity by **30%** on repetitive scaffolding tasks.
- Demonstrated strong **problem-solving skills** and **attention to detail** when managing large-scale device configurations and orchestrating software distribution across diverse Apple platforms; executed 15+ post-implementation UAT cycles with **zero deployment rollbacks**.

SKILLS

Swift & Apple Development – Swift, SwiftUI, object-oriented design, macOS, iOS, iPadOS, tvOS, visionOS, Xcode.

Backend & APIs – REST APIs, Java Spring Boot, Python, Flask, FastAPI, system integrations.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, containerization.

DevOps & Reliability – CI/CD (Jenkins), Git, code reviews, monitoring (Dynatrace, CloudWatch), incident response, change management.

Databases & Data – SQL, PostgreSQL, MySQL, Oracle, data modelling, ETL.

AI & Emerging Technologies – Generative AI tools, AI-assisted code generation, curiosity-driven exploration of AI in software engineering.

Business & Domain – Device Management (MDM), Asset Management (ITAM), Software Distribution, problem-solving, attention to detail.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SwiftUI Device Management Portal with AI-Assisted Code Generation (HCL Technologies)

- Architected and delivered a comprehensive **SwiftUI application** for real-time device inventory, asset lifecycle tracking, and software distribution orchestration across **macOS, iOS, iPadOS, tvOS, and visionOS** platforms, leveraging **REST APIs** to integrate with backend Device Management and Asset Management microservices.
- Implemented **object-oriented design patterns** (MVC, MVVM) and structured **code reviews** with senior engineers to enforce Apple development best practices; achieved **98.7% code coverage** through comprehensive unit and integration testing using XCTest framework.
- Integrated **generative AI tools** into the development pipeline to accelerate feature scaffolding and boilerplate generation; reduced time-to-feature-delivery by **28%** while maintaining code quality standards, demonstrating practical application of **AI in real-world engineering scenarios**.
- Built **automated CI/CD pipelines** using **Jenkins** and **Git** branching strategies to validate Swift code, run linting, and deploy to **AWS Lambda**-backed backend services; eliminated manual build steps and reduced deployment cycle time from **2.5 hours to 18 minutes**.
- Deployed application serving **45,000+ managed devices** globally across Apple business units; designed **problem-solving** mechanisms for edge cases in device enrollment, asset reconciliation, and software distribution workflows, achieving **99.4% system reliability** and zero critical production incidents over 8-month release window.

SWIFT Messaging & Payments Operations Dashboard (HCL Technologies – Banking Domain)

- Developed and maintained a production **payments operations dashboard** for enterprise banking client supporting **SWIFT MT/MX message flows**, **ISO 20022** message structures, and **SEPA/cross-border payment processing**; provided real-time visibility into transaction flows and regulatory compliance (GDPR, data protection) across **15M+ daily payment messages**.
- Collaborated with banking-domain business analysts and operations teams to implement **REST API integrations** connecting ERP systems, payment platforms, and asset management services; ensured flawless **change management** and UAT coordination for 8+ regulatory and operational updates per quarter.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
