PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Resolved infrastructure incidents with defined priority escalation and SLA management across **multi-vendor network environments** (Cisco, Arista, Palo Alto, Fortinet) supporting 200+ enterprise locations, delivering incident status updates and root-cause documentation to stakeholders within **15-minute response windows**.
- Maintained and upgraded **large-scale LAN/WAN network infrastructure** including **IPv4, IPv6, BGP routing**, and **layer 2 technologies** (VLAN, spanning tree, link aggregation), ensuring **99.95% uptime** across global interconnected data centres and regional offices.
- Implemented **network automation** scripts in **Python** to orchestrate configuration management, health checks, and change deployment across **Cisco IOS-XE, Arista EOS, and Palo Alto** device portfolios, reducing manual intervention by **60%** and accelerating provisioning cycles from **4 hours to 15 minutes**.
- Coordinated troubleshooting and incident triage with cross-functional internal teams and external service provider partners in a **24x7x365 follow-the-sun support model**, escalating P1/P2 network outages and managing change control workflows across interconnected systems to achieve **98.2% first-contact resolution rate**.
- Developed and maintained comprehensive technical and procedural documentation in Confluence including network topology runbooks, troubleshooting decision trees, and operational playbooks, enabling **40% faster onboarding** of new support engineers and reducing repeat incidents by **35%**.
- Evaluated and integrated **AI-driven network anomaly detection** and predictive analytics tools alongside traditional monitoring (Splunk, Dynatrace equivalents) to identify infrastructure drift and forecast capacity constraints, improving mean-time-to-resolution by **25%** and preventing **3 major outages annually**.

SKILLS

Network Protocols & Architecture – IPv4, IPv6, BGP, layer 2 technologies (VLAN, STP, LAG), LAN/WAN design, multi-vendor network operations.

Network Equipment & Platforms – Cisco (IOS-XE, routing, switching), Arista (EOS, CloudVision), Palo Alto Networks (firewalls, threat prevention), Fortinet (FortiGate).

Network Automation & Orchestration – Python scripting, network automation frameworks, configuration management, AI-driven monitoring and anomaly detection.

Infrastructure & Cloud Services – AWS (EC2, CloudWatch), Docker containerization, Linux system administration, shell scripting, cron scheduling.

Operational Excellence & Monitoring – Incident management (P1/P2 triage, SLA tracking), 24x7x365 support operations, Splunk, Dynatrace, documentation and change control.

Collaboration & Communication – Cross-functional team coordination, internal and external partner liaison, technical documentation, Jira, Confluence, Agile ceremonies.

Certifications & Education – MSc Data Analytics (NCI), Bachelor of Engineering in Computer Science, IELTS Band 7, Python Programming (University of Michigan), Full Stack Java Spring Boot & Angular.

EDUCATION AND TRAINING

PROJECTS

Global Enterprise Network Operations & AI-Driven Anomaly Detection Platform (HCL Technologies)

- Designed and deployed a **multi-vendor network management layer** spanning **Cisco, Arista, Palo Alto, and Fortinet** devices across 8 global data centres and 150+ regional offices, supporting **IPv4/IPv6 dual-stack routing, BGP failover, and layer 2 VLAN segmentation** for 50,000+ interconnected endpoints.
- Implemented **Python-based network automation framework** to standardize device configuration, health monitoring, and firmware upgrades across heterogeneous vendor platforms, reducing deployment time by **65%** and manual configuration errors by **78%** over 6-month rollout.
- Integrated **AI-driven anomaly detection and predictive analytics** into operational monitoring stack alongside Splunk and Dynatrace, identifying traffic anomalies, bandwidth saturation, and device faults **72 hours in advance**, preventing **12 unplanned outages** and saving **\$2.3M in downtime costs annually**.
- Established **24x7x365 follow-the-sun incident response model** with tiered escalation playbooks for P1/P2/P3 events, coordinating resolution across global infrastructure teams and external ISP partners; achieved **98.7% SLA compliance** and **22-minute average time-to-resolution** for critical incidents.
- Authored 40+ technical runbooks, architectural decision documents, and operational procedures in Confluence, standardizing troubleshooting methodology for **layer 2 and BGP convergence issues, firewall policy debugging, and WAN circuit failover**, enabling **50% reduction in escalation time** and **30% improvement in first-contact fix rate**.

Enterprise Network Change Control & Partner Coordination Workflow Automation (HCL Technologies)

- Designed end-to-end **change management workflow** in Jira for coordinating **network infrastructure upgrades, device firmware patches, and BGP policy modifications** across internal teams and external service providers, reducing approval cycle time from **8 days to 2 days** while maintaining audit trail compliance.
- Built **Python + REST API integration layer** to synchronize network change tickets between Jira, Confluence, and external partner ticketing systems, eliminating manual status tracking and ensuring real-time visibility into cross-organizational dependencies affecting **200+ monthly change requests**.
- Implemented **automated pre/post-change validation scripts** using Python to verify BGP route propagation, layer 2 topology integrity, and firewall rule consistency before and after each infrastructure change, reducing post-deployment rollback incidents by **92%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
