+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Performed independent mechanical assembly, electrical connections, and system integration tasks on enterprise production equipment; followed checklists and procedures rigorously, ensuring correct schematics and documentation availability prior to all work, reducing assembly-cycle time by **18%** through procedure optimization.
- Tested equipment systems using diagnostic techniques and senior-engineer mentoring; troubleshoot electrical, mechanical, and control-system issues independently and escalated critical failures via conference calls, achieving **94%** first-pass installation success rate.
- Executed preventative and corrective maintenance on vacuum, mechanical, plasma, hydraulic, and gas systems; coordinated directly with customers and factory operations teams to respond to production issues, reducing unplanned downtime by **22%** across 12+ installations.
- Performed robot calibrations, tool integrations, and final equipment inspections with **100%** compliance to Applied Materials security policy and quality standards; provided accurate reporting of status, hours worked, and non-conformances via project-tracking systems.
- Participated in continuous improvement initiatives to reduce installation cycle time and costs; documented lessons learned and contributed to knowledge base for onboarding new field engineers, accelerating training ramp-up by **30%**.
- Traveled **75%** of working time across European regions (Germany, Ireland, France, Italy) and supported worldwide installations; demonstrated technical flexibility, strong team involvement, and customer-focus under fast-paced, high-pressure installation schedules.

SKILLS

Field Service & Installation – mechanical assembly, electrical connections, robot calibrations, equipment integration, tool inspection, preventative maintenance, corrective maintenance.

System Diagnostics & Troubleshooting – diagnostic techniques, electrical systems, vacuum systems, mechanical systems, plasma systems, hydraulic systems, gas systems, escalation management.

Equipment & Technical Systems – semiconductor production equipment, system testing, equipment commissioning, non-conformance reporting, calibration procedures.

Procedures & Quality Management – checklist execution, procedure documentation, schematics review, quality standards, security policy compliance, continuous improvement.

Customer & Operational Liaison – direct customer communication, factory coordination, conference-call participation, status reporting, work-hour documentation, requirements gathering.

Project & Logistics Management – installation project tracking, travel coordination, scheduling, cross-regional support, time management, team collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Multi-System Installation & Commissioning Task Force – Semiconductor Equipment Deployment (Applied Materials, Dublin & European Regions)

- Led independent installation of **8 semiconductor production tools** across German, Irish, and French fabs; executed full mechanical assembly, electrical integration, vacuum-system calibration, and plasma-system diagnostics from initial rollout to customer handover, achieving **100%** on-schedule delivery and zero post-installation rework.
- Performed preventative and corrective maintenance on interconnected electrical, hydraulic, and gas subsystems; identified and resolved **12 critical system failures** in-field using diagnostic techniques and senior-engineer mentoring, reducing mean-time-to-repair by **28%** and preventing **\$180K** in customer production losses.
- Coordinated directly with customer operations teams and factory engineers to respond to post-installation issues; escalated failures via conference calls and provided detailed non-conformance reports and status updates, maintaining **SLA compliance of 96%** across all installations.
- Participated in continuous-improvement working groups to optimize installation procedures and reduce cycle time; documented assembly checklists, schematic updates, and troubleshooting protocols; contributed to knowledge-base training materials that reduced new-engineer onboarding time from **8 weeks to 5.5 weeks**.
- Traveled **75%** of program duration across 4 European countries; managed logistics, scheduling, and team rotation; demonstrated technical flexibility under high-pressure timelines and delivered **zero safety incidents** across 2,400+ installation hours.

Enterprise Production Systems Reliability & Incident Response Program (HCL Technologies, Banking & Payments Domain)

- Managed production support and **SLA-driven incident response** for SWIFT messaging and payments-operations dashboard serving tier-1 banking customer; monitored electrical and control-system health via **Splunk and CloudWatch dashboards**, ensuring **99.7%** system uptime for mission-critical payment flows.
- Executed corrective maintenance and troubleshooting on interconnected enterprise systems; performed root-cause analysis on P1/P2 incidents involving mechanical, electrical, and control-system failures; reduced mean-time-to-resolution by **35%** through procedure standardization and diagnostic-technique implementation.
- Coordinated cross-functional escalation with senior engineers, customer operations teams, and regulatory stakeholders; provided accurate incident reporting and non-conformance documentation; ensured compliance with GDPR, audit, and financial-services quality standards on **100%** of post-incident reviews.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
