PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **compliance and risk management programmes** across enterprise Java and .NET applications, identifying and mitigating **business and digital related risk** through **Splunk, CloudWatch, and Dynatrace** monitoring dashboards; supported SLA management and P1/P2 incident response with **100% uptime** compliance for production banking systems.
- Ensured **compliance with regulatory, legislative, and contractual requirements** including **ISO standards (ISO 55001), GDPR and Data Privacy regulations**, and **NIS2 Directives** in banking-domain payments-operations environments; conducted **risk and compliance assessments** across interconnected enterprise systems and documented audit trails for regulatory sign-off.
- Supported **technical and operational resilience** through **disaster recovery planning** and change-control management; implemented **business continuity procedures** for critical payment-messaging infrastructure, reducing incident mean-time-to-recovery (MTTR) by **40%** through automated **Python scripts and alerting mechanisms**.
- Implemented **governance programmes and data security frameworks** using **AWS (EC2, S3, Lambda), Docker containerization, and Jenkins CI/CD pipelines**; prepared **risk registers, compliance reports, and operational dashboards** using **Power BI and Tableau** to track governance KPIs and regulatory compliance status across **PostgreSQL, MySQL, and Oracle** databases.
- Conducted **research and assessments in information security and data protection** across **SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, and PSD2 Open Banking** requirements; collaborated with BAs, compliance teams, and regulatory partners to develop project requirements and ensure operational risk mitigation across **ERP integration** ecosystems.
- Supported project delivery through **REST API integrations, SQL data validation, and cross-system operational analysis**; identified and reviewed **operational, regulatory, and technological domain** risks affecting payment flows and business systems; maintained **Jira tickets, Confluence documentation, and compliance registers** to track risk mitigation actions and regulatory sign-offs.

SKILLS

Risk & Compliance Management – Risk identification and mitigation, Compliance assessments, Risk registers, Governance programmes, ISO 55001, ISO 20022, GDPR, NIS2 Directives, Data Privacy regulations.

Operational Resilience & Security – Business continuity planning, Disaster recovery planning, Information security, Data protection frameworks, Change management, Incident management, SLA management.

Technical Stack – Java Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Monitoring & Analytics – Splunk, Dynatrace, CloudWatch, Power BI, Tableau, Data modelling, Operational dashboards, KPI tracking.

Domain Expertise – Banking & Financial Services, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, PSD2 Open Banking, Payments operations, ERP integration support.

Enterprise Systems & Integration – REST API integrations, Enterprise business systems, Cross-system data flows, ERP module support, UAT coordination, Regulatory compliance documentation.

Professional Skills – Report writing, Analytical problem-solving, Attention to detail, Team collaboration, Client engagement, Project delivery support, Jira, Confluence.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Operational Resilience & Compliance Governance Platform (HCL Technologies)

- Architected and deployed a comprehensive **risk and compliance management platform** consolidating **ISO 55001, GDPR, NIS2, and SWIFT ISO 20022** regulatory requirements across 15+ interconnected banking and ERP systems; integrated **Splunk** for real-time operational monitoring and **Power BI** for executive compliance dashboards, reducing manual compliance reporting by **60%**.
- Built **automated risk assessment workflows** using **Python ETL pipelines and REST API integrations** to identify and track operational, regulatory, and technological domain risks; populated **risk registers in PostgreSQL** and surfaced high-priority findings through automated **Dynatrace alerts and CloudWatch metrics**, enabling **24-hour risk triage cycles** versus prior **weekly manual reviews**.
- Implemented **business continuity and disaster recovery procedures** with automated **AWS Lambda functions** and **Docker containerized failover services**, reducing incident mean-time-to-recovery (MTTR) from **4 hours to 35 minutes** for mission-critical payment-messaging systems; documented **change-control procedures and governance audit trails** in Confluence for regulatory compliance.
- Conducted cross-functional **information security and data protection research** on **SEPA payments flows, PSD2 Open Banking standards, and ISO 20022 message structures**; delivered **compliance assessment reports and risk-mitigation recommendations** to banking-domain stakeholders and regulatory partners; achieved **100% compliance sign-off** across all **GDPR and NIS2 Directive** assessments.
- Deployed **Tableau and Power BI dashboards** tracking operational resilience KPIs, governance programme maturity, and regulatory compliance status; integrated **MySQL and Oracle data sources** through automated **Power Query ETL workflows**, enabling stakeholders to monitor **30+ compliance metrics** in real-time and reduce board reporting time by **45%**.

SWIFT Payments Governance & Data Security Assessment Framework (HCL Technologies)

- Conducted comprehensive **risk and compliance assessments** of banking-domain **SWIFT messaging (MT/MX) and ISO 20022 message flows**; identified **5 critical operational and regulatory domain risks** affecting payment transaction visibility and **GDPR / Data Privacy** controls; delivered detailed **compliance reports** documenting risk-mitigation strategies.
- Collaborated with **banking-domain BAs, operations teams, and regulatory partners** to translate **SEPA instant payments and cross-border payment requirements** into technical governance controls; supported **UAT and post-implementation triage** for **PSD2 Open Banking** compliance; maintained audit trails and change-control documentation in Confluence for regulatory sign-off.
- Designed **data security frameworks and operational resilience procedures** for sensitive payment-messaging infrastructure; reduced compliance assessment cycle time by **35%** through automated **SQL-based data validation scripts** and **Python risk-scoring automation**, enabling monthly governance reviews versus quarterly cadence.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
