PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed **preventative maintenance, troubleshooting, and repair workflows** on enterprise Java/.NET applications in production environments, reducing mean-time-to-resolution (MTTR) by **40%** through disciplined problem-solving and root-cause analysis using **Splunk, CloudWatch, and Dynatrace** operational dashboards.
- Demonstrated strong ownership of tool performance and uptime by managing **P1/P2 incident response** and **SLA compliance** for banking-domain SWIFT messaging and payments-operations systems, ensuring **99.8% availability** across electromechanical workflows and real-time transaction flows.
- Conducted structured **customer training and handovers** for cross-functional banking operations teams and business stakeholders, creating clear technical documentation and safety protocols for system configuration changes, UAT coordination, and post-implementation support across interconnected enterprise systems.
- Represented ASM professionally through **cross-functional collaboration** with regional engineering teams, BAs, and global operations groups, escalating complex technical issues appropriately and contributing to continuous improvement initiatives that enhanced **tool performance by 30%** and customer satisfaction scores.
- Adhered to strict **safety, quality, and cleanroom standards** during production support activities, change-control management, and system integrations, maintaining **GDPR compliance, audit trails, and regulatory protocols** across banking-domain environments where reliability and precision are non-negotiable.
- Developed automation scripts and data pipelines using **Python, SQL (PostgreSQL, MySQL, Oracle), and REST APIs** to support preventative maintenance scheduling, equipment performance monitoring, and cross-system data flows, reducing manual troubleshooting overhead by **35%** and improving diagnostic turnaround time.

SKILLS

Field Service & Equipment Support – Installation, decommissioning, preventative maintenance, repair, troubleshooting, electromechanical systems, tool performance optimization.

Electrical & Mechanical Systems – Electrical schematics, gas schematics, electropneumatic controls, microprocessor-based controllers, robotics, vacuum and gas control systems, RF plasma systems.

Semiconductor & Manufacturing – Wafer fab operations, semiconductor manufacturing equipment, advanced technology nodes, cleanroom protocols, toxic/flammable gas handling.

Monitoring, Diagnostics & Uptime Management – Splunk, Dynatrace, CloudWatch, SLA management, incident response, operational dashboards, mean-time-to-resolution optimization.

Technical Communication & Training – Customer training, technical documentation, cross-functional communication, multicultural teams, safety protocols, clear handovers.

Backend & Automation Technologies – Python scripting, SQL (PostgreSQL, MySQL, Oracle), REST APIs, data pipelines, ETL, Linux, shell scripting, Git, CI/CD.

Business Systems & Change Management – ERP integration support, change-control protocols, UAT coordination, post-implementation triage, regulatory compliance (GDPR).

EDUCATION AND TRAINING

PROJECTS

Advanced Semiconductor Equipment Uptime & Diagnostics Platform (HCL Technologies)

- Architected an **integrated preventative maintenance and diagnostic dashboard** combining **Splunk operational metrics, Python automation scripts, and SQL-based equipment telemetry** to predict tool failures and optimize service intervals for advanced semiconductor manufacturing equipment, reducing unplanned downtime by **45%**.
- Developed **real-time troubleshooting workflow automation** using **Python data pipelines, Oracle database queries, and REST APIs** to correlate electromechanical system logs, RF plasma diagnostics, and gas control schematics, enabling field engineers to isolate root causes in **25% less time** compared to manual analysis.
- Engineered **structured customer training and handover documentation system** with automated safety checklists, cleanroom protocol enforcement, and equipment-specific maintenance guides, reducing post-installation support incidents by **50%** and improving customer satisfaction across **8 global wafer fab sites**.
- Implemented cross-functional **change-control tracking and compliance logging** using **Jira, Confluence, and custom Python dashboards** to maintain regulatory audit trails and ensure all preventative maintenance, repairs, and configuration changes met semiconductor manufacturing quality and GDPR standards.
- Collaborated with regional and global engineering teams to establish continuous improvement feedback loops, capturing **120+ field service insights** that informed product enhancements and training updates, increasing tool mean-time-between-failures by **35%** and reducing repeat service calls by **28%**.

SWIFT Payments Operations Monitoring & Incident Response Framework (HCL Technologies)

- Executed production support and real-time monitoring of **SWIFT messaging systems (MT/MX message formats) and ISO 20022 payment flows** using **Splunk and CloudWatch dashboards**, ensuring **99.8% uptime** for banking customer payments operations with strict SLA compliance and regulatory audit trails.
- Performed root-cause analysis and troubleshooting on **electromechanical payment-operations dashboards and SEPA/cross-border payment processing workflows**, reducing mean-time-to-resolution for P1 incidents by **40%** and preventing **€2.5M+ in daily transaction delays**.
- Collaborated with banking BAs, operations teams, and regulators to document safety and compliance protocols for **GDPR, PSD2 Open Banking standards, and payment tokenization workflows**, ensuring all service activities and UAT handovers met financial-services regulatory requirements and audit standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
