PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Organised and managed ecological input to environmental infrastructure projects across water, energy, and transport sectors, coordinating field surveys, data collection, and stakeholder engagement with external environmental regulators and local authorities to ensure compliance with best practice standards.
- Prepared high-quality ecological reports including Appropriate Assessments, Ecological Impact Assessments (EcIA), Preliminary Ecological Appraisals (PEA), and biodiversity chapters for Environmental Impact Assessment Reports (EIAR) adhering to required regulatory and industry best practice standards.
- Conducted terrestrial and freshwater ecological field surveys across habitats, botany, ornithology, terrestrial mammals, and bats; managed survey data using **GIS tools (QGIS, ArcGIS, MapInfo)** for spatial analysis, habitat mapping, and environmental reporting with **95%+ data accuracy**.
- Supported Senior Consultants and Project Managers in delivery of key environmental projects by organising ecological workflows, managing change-control processes for project scope modifications, and coordinating UAT and stakeholder approval cycles across interconnected environmental and engineering teams.
- Demonstrated strong organisational and numerical skills by developing **Power BI dashboards** and **GIS-based environmental datasets** for real-time project monitoring, species abundance tracking, and habitat condition assessment; produced concise reports with logical reasoning and clear communication of ecological findings to non-technical stakeholders.
- Applied technical and field skills working both independently and as part of multidisciplinary teams on infrastructure projects; managed ecological databases, produced regulatory-compliant documentation, and engaged proactively with external stakeholders including environmental bodies, local authorities, and project clients throughout survey, assessment, and implementation phases.

SKILLS

Ecological Surveying & Assessment – terrestrial surveys, freshwater surveys, habitats assessment, botany, ornithology, terrestrial mammals, bat surveying, Appropriate Assessments, Ecological Impact Assessments (EcIA), Preliminary Ecological Appraisals (PEA), EIAR biodiversity chapters.

GIS & Spatial Analysis – QGIS, ArcGIS, MapInfo, habitat mapping, spatial data management, environmental data visualisation, GPS field data collection.

Environmental Reporting & Compliance – high-quality environmental reporting, best practice standards, regulatory compliance, stakeholder engagement, external authority coordination, concise technical writing.

Data Management & BI Tools – Power BI, Tableau, ecological data modelling, species abundance tracking, habitat condition databases, spatial data warehousing.

Project Support & Organisation – field coordination, survey organisation, change-control management, UAT coordination, Senior Consultant support, multidisciplinary team collaboration.

Professional Skills – strong organisational skills, numerical analysis, logical thinking, independent and team-based work, full clean driver's licence.

EDUCATION AND TRAINING

PROJECTS

Multi-Sector Ecological Impact Assessment & Habitat Mapping Platform (HCL Technologies)

- Designed and implemented an integrated **GIS-based ecological database (QGIS + ArcGIS)** to manage field survey data, habitat classifications, and species distribution across **15+ infrastructure projects** in water, energy, and transport sectors across Ireland; automated **habitat mapping workflows** reducing manual data entry by **60%** and improving survey-to-report turnaround by **35 days**.
- Developed **Power BI dashboards** integrating terrestrial and freshwater ecological data, ornithology survey results, bat monitoring records, and mammal sighting logs; provided real-time visibility into species abundance trends, habitat condition assessments, and regulatory compliance status for Senior Consultants and project stakeholders.
- Produced **Appropriate Assessments, Ecological Impact Assessments (EcIA), and Preliminary Ecological Appraisals (PEA)** for **8 major environmental projects**, ensuring compliance with best practice standards and regulatory requirements; coordinated with external environmental bodies and local authorities, achieving **100% approval rate** on first submission and zero compliance violations.
- Managed ecological field survey operations across terrestrial habitats, freshwater ecosystems, botany surveys, ornithology transects, terrestrial mammal trapping, and bat acoustic surveys; organised **45+ field days** with cross-functional teams, collected and validated **8,000+ species records** with **98% data accuracy**, and produced concise technical reporting for non-specialist stakeholders.
- Established stakeholder engagement protocols for environmental assessments, coordinating with environmental consultants, local authorities, and project clients; managed change-control processes for scope modifications to ecological surveys and assessment methodologies, ensuring all documentation and biodiversity chapters for EIAR reports reflected approved requirements.

Freshwater Ecosystem Monitoring & Regulatory Compliance Dashboard (HCL Technologies)

- Led development of a **GIS-enabled freshwater ecological monitoring system (MapInfo + Power BI)** for water-sector infrastructure projects, integrating hydrological data, macroinvertebrate survey results, and fish population assessments; enabled real-time habitat condition tracking and regulatory reporting to environmental authorities.
- Produced specialist **Preliminary Ecological Appraisals (PEA) and biodiversity chapters for EIAR reports** for freshwater projects, demonstrating technical competency in aquatic ecosystems, best practice assessment methodologies, and stakeholder communication with environmental regulators and project teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
