PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analysed complex enterprise datasets using **Python** (pandas, NumPy, scikit-learn) and **SQL** (PostgreSQL, MySQL, Oracle) to identify trends, patterns, and actionable insights from production systems, delivering **15+ ad-hoc analytical queries** monthly with **99.2% accuracy** for business stakeholders and cross-functional teams.
- Developed and deployed **predictive models** and **machine learning solutions** using **scikit-learn, R, and statistical methods** (regression, hypothesis testing, time-series analysis) during MSc Data Analytics coursework; evaluated model performance via **evaluation metrics** and A/B testing methodologies to support data-driven decision-making.
- Contributed to the design, development, and implementation of **AI-driven analytics initiatives** by building **Power BI dashboards** with **DAX measures and data modelling**, creating **20+ executive reports** and operational insights for global banking and enterprise business systems; supported **responsible AI practices** through transparent metric definition and stakeholder alignment.
- Developed and maintained **data pipelines** and **ETL workflows** using **Python scripting** to automate scheduled reporting and data validation across enterprise databases; built **Tableau interactive dashboards** for operational visibility and KPI tracking, reducing manual reporting time by **40%**.
- Collaborated with cross-functional teams including domain business analysts, operations teams, and regulatory stakeholders to translate business requirements into **data science and AI solutions**; presented technical findings and recommendations to both technical and non-technical audiences with **IELTS Band 7** communication proficiency.
- Supported implementation of data governance and model governance best practices; explored and evaluated emerging **AI technologies** and methodologies including **cloud platforms** (AWS EC2, S3, Lambda), **version control tools** (Git), and **generative AI concepts**; contributed to continuous learning through structured coursework in **machine learning fundamentals**, **big-data concepts** (Hadoop, Spark), and **data warehousing** architecture.

SKILLS

Programming & Data Science – Python, R, SQL, scikit-learn, pandas, NumPy, machine learning, predictive modelling, statistical analysis, hypothesis testing, time-series analysis.

Data Visualization & Business Intelligence – Power BI, Tableau, DAX, Power Query, data modelling, interactive dashboards, ETL, data warehousing.

AI & Machine Learning Frameworks – scikit-learn, supervised learning, unsupervised learning, evaluation metrics, A/B testing, model governance, responsible AI.

Cloud & Data Platforms – AWS (EC2, S3, Lambda, CloudWatch), version control (Git), big-data concepts (Hadoop, Spark), database management (PostgreSQL, MySQL, Oracle).

Enterprise Systems & Integration – Java Spring Boot, REST APIs, Docker, Jenkins CI/CD, Linux, change-control management, enterprise business systems integration.

Cross-Functional Collaboration – stakeholder management, business requirements analysis, UAT support, technical and non-technical presentation, Agile/Scrum, Jira, Confluence.

Domain Knowledge – pharmaceutical industry awareness, enterprise analytics, global business operations, data governance, emerging AI technologies and best practices.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Predictive Analytics & AI-Driven Insights Platform for Enterprise Operations (HCL Technologies)

- Architected and deployed an end-to-end **predictive modelling and data analytics platform** using **Python (scikit-learn, pandas), SQL, and Power BI** to analyse **500K+ enterprise transactions monthly**, identifying operational trends and forecast demand with **87% accuracy**.
- Designed and implemented **data pipelines and ETL workflows** leveraging **Python automation scripts and scheduled reporting** to ingest, validate, and transform multi-source enterprise datasets (PostgreSQL, MySQL, Oracle) into a unified **data warehouse** architecture; reduced data-preparation time by **55%**.
- Developed **interactive Power BI dashboards with DAX measures and data modelling** to surface **AI-driven insights** and KPIs for global stakeholders; dashboards tracked **12+ business metrics** in real-time, enabling executive decision-making and reducing reporting cycle time by **60%**.
- Collaborated with cross-functional teams (business analysts, IT operations, finance) to translate business requirements into **machine learning solutions**; presented technical findings and **model recommendations** to both technical and non-technical stakeholders, achieving **95% stakeholder adoption** of platform insights.
- Contributed to **model governance and responsible AI practices** by documenting model assumptions, evaluation metrics, and limitations; evaluated emerging **AI technologies and methodologies**, including **generative AI concepts**, to support continuous innovation within the data science function.

SWIFT Payments Analytics & ISO 20022 Compliance Dashboard (HCL Technologies)

- Built a real-time **operational analytics dashboard** using **Power BI and SQL** to monitor SWIFT messaging flows and **ISO 20022 message structures** across **50K+ daily payment transactions** for a global banking client, enabling visibility into SEPA, instant payments, and cross-border payment operations.
- Analysed complex payment-operations datasets to identify trends in transaction latency, failure rates, and compliance exceptions; delivered **15+ data-driven insights monthly** to support UAT coordination and post-go-live triage with **99.5% SLA adherence**.
- Collaborated with banking-domain business analysts and regulatory teams to embed **data governance and GDPR compliance** controls into reporting workflows; ensured audit trails and data protection standards were reflected in all **analytical reports and dashboards**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
