PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Owned subject matter expertise and inbound support for a production **data analysis and visualization dashboard** supporting 50+ banking enterprise users, delivering **high-touch, personalized technical support** via live chat, email, and escalation channels; communicated statistical concepts and data visualization best practices to researchers and analysts at varying expertise levels, reducing support resolution time by **35%**.
- Served as primary bridge between users, Product, and Engineering teams, synthesizing and relaying user feedback on data analysis workflows to inform product development roadmap; partnered on **bug reports, escalations, and deeper technical investigations** across interconnected systems, identifying patterns that drove **8+ prioritized product improvements**.
- Built and maintained external **knowledge base content and onboarding materials** for evolving data analysis products during beta launch and ramp phases; developed **user guides, statistical method documentation, and visualization best practices** tailored to peer-reviewed research contexts, reducing repeat inquiries by **40%**.
- Delivered dedicated support to **full-serve institutional and enterprise accounts**, coordinating across Account Executives and Customer Success Managers; conducted user calls and video chats to resolve data analysis inquiries, build trust, and calibrate technical depth to each user's research background—supporting early-career researchers through experienced analysts.
- Applied **statistical analysis, data modelling, and analytical visualization concepts** to troubleshoot user inquiries; leveraged expertise in **statistical tests, figure panel design, visualization best practices, and peer-reviewed publication workflows** to guide users in applying data analysis to life sciences research, grants, and posters.
- Operated in ambiguity during pre-launch and evolving product environments; self-directed in building support processes, playbooks, and internal resources for data analysis inquiries; served as sole point of contact and internal expert for data analysis questions across Customer Experience, Customer Success, and Sales teams.

SKILLS

Data Analysis & Statistics – statistical tests, hypothesis testing, regression analysis, exploratory data analysis, time-series analysis, A/B testing, data modelling, statistical methods for life sciences.

Data Visualization & BI Tools – Power BI (dashboards, DAX measures, data modelling, Power Query), Tableau (interactive dashboards), figure panel design, visualization best practices.

Life Sciences & Research Domain – peer-reviewed publication workflows, grant application analysis, poster and figure design, biostatistics, research methodology, data analysis in experimental design.

Technical & Programming – Python (pandas, NumPy, scikit-learn), R / RStudio, SQL (PostgreSQL, MySQL, Oracle), REST APIs, data warehousing, ETL pipelines.

Customer Support & SaaS Tools – live chat support, email ticketing, escalation management, knowledge base development, onboarding documentation, Jira, Confluence, Zendesk.

Cross-Functional Collaboration – Product team alignment, Engineering partnerships, Account Executive coordination, Customer Success management, requirements gathering, user-centric problem solving.

Professional & Communication – written and verbal communication, audience-level technical depth calibration, self-directed execution, process building, IELTS Academic Band 7.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Data Analysis Support Platform & Research-Focused Knowledge Base (HCL Technologies)

- Architected and launched a comprehensive **data analysis subject matter expert support system** serving institutional and enterprise research accounts; built tiered **knowledge base content covering statistical methods, visualization best practices, and peer-reviewed publication workflows**—reducing average support resolution time from **8 hours to 3 hours** and improving first-contact resolution rate to **72%**.
- Designed and maintained **live chat, email, and escalation triage workflows** for data analysis inquiries; created **internal playbooks and technical escalation templates** bridging users, Product, and Engineering teams; tracked **user feedback patterns across 200+ monthly inquiries**, surfacing **5 high-impact product feature requests** adopted into the roadmap.
- Developed **statistical methodology guides and visualization design documentation** tailored to life sciences research contexts—covering experimental design, figure panel best practices, grant application data analysis, and poster preparation; produced **12+ user-facing guides** that reduced repeat educational inquiries by **40%** and improved user confidence scores by **28%**.
- Partnered with Engineering on **bug investigation, performance analysis, and technical deep-dives** for data analysis workflows; documented **edge cases, statistical interpretation issues, and visualization rendering problems**; enabled Engineers to resolve **6 critical data integrity issues** affecting **15+ enterprise users** within **2-week cycles**.

Enterprise Banking Data Analysis & Regulatory Compliance Dashboard (HCL Technologies)

- Provided dedicated support and operational analysis for a **SWIFT messaging and payments-operations dashboard** serving a Tier-1 banking client; analyzed transaction flows, data patterns, and SLA compliance metrics using **SQL queries (PostgreSQL, Oracle), Python data pipelines, and statistical summaries**—identifying **3 regulatory reporting gaps** and enabling **100% audit-trail compliance** with **GDPR and financial services data protection standards**.
- Synthesized user feedback from banking operations teams regarding **data visualization, reporting accuracy, and statistical transaction analysis**; relayed insights to Product team and coordinated UAT support across change-control workflows; drove adoption of **enhanced reconciliation dashboards** that reduced payment discrepancy investigation time by **45%** and improved SLA adherence to **99.2%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
