PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed **ITSM queue** and **SLA adherence** for enterprise infrastructure incidents across on-premise and **public cloud (AWS)** environments, resolving P1/P2 tickets within defined SLAs via **CloudWatch** and **Dynatrace** monitoring; diagnosed and troubleshooted system issues proactively, achieving **94% first-contact resolution rate** and reducing mean time to resolution by **32%**.
- Implemented **change management processes** for infrastructure modifications across **compute, storage, and cloud** platforms; documented and verified changes pre- and post-implementation, coordinated **UAT** with cross-functional teams, and transitioned solutions into production support with zero rollback incidents over **180+ changes**.
- Supported enterprise **virtualization platforms** and **hardware platform management** (Dell servers and storage) through production monitoring using **Splunk** and **CloudWatch**; remediated vulnerabilities identified by cyber scanning tools and vendor security bulletins, maintaining **100% patch compliance** against regulatory requirements.
- Developed **monitoring solutions** and operational dashboards using **CloudWatch** and **Dynatrace** to provide real-time visibility into infrastructure health; built **Python automation scripts** for proactive alerting and environment monitoring, reducing manual monitoring overhead by **45%** across **150+ infrastructure components**.
- Mentored junior support engineers on infrastructure troubleshooting methodologies and escalation procedures; contributed extensively to **knowledge base** documentation via **Confluence**, creating **40+ technical runbooks** for incident response, change procedures, and disaster recovery workflows to enable team knowledge transfer and operational consistency.
- Participated in infrastructure projects for new acquisitions and solution implementations, including **architecture reviews**, implementation task coordination, and transition planning; collaborated with geographically distributed teams across **EMEA, NA, LATAM, and APAC** regions using **ITIL** frameworks to globalize infrastructure service delivery and maintain **24/7 on-call support rota**.

SKILLS

Cloud Platforms & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Azure concepts, VMware, Nutanix, Hyper-V, cloud platform management.

Infrastructure & Storage Management – Dell Compellent, PowerStore, PowerScale, HPE Nimble, hardware platform management, software-defined storage, high availability infrastructure, disaster recovery.

Monitoring & ITSM – CloudWatch, Dynatrace, Splunk, ITSM queue management, SLA adherence, incident and problem management, environment monitoring, cyber vulnerability remediation.

Change & Incident Management – Change management processes, ITIL frameworks, change control documentation, architecture reviews, UAT coordination, escalation procedures, vendor management.

Infrastructure Technologies – Linux administration, log analysis, shell scripting, Docker containerization, CI/CD (Jenkins, Git), compute, storage, remote desktop, network infrastructure concepts.

Documentation & Knowledge Management – Confluence documentation, technical runbooks, knowledge base development, team mentoring and coaching, stakeholder reporting and communication.

Enterprise Systems – ERP integration support, business systems administration, Windows Server management, Active Directory, DNS, DHCP, Group Policy, Certificate Services, cross-system integrations.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Multi-Cloud Infrastructure Monitoring & Incident Response Automation Platform (HCL Technologies)

- Architected and deployed a unified **hybrid cloud monitoring solution** across on-premise and **AWS/Azure** infrastructure, consolidating alerts from **CloudWatch, Dynatrace, and Splunk** into a single operational dashboard that reduced **alert fatigue by 58%** and decreased incident detection time from **18 minutes to 4 minutes**.
- Built **Python automation scripts** integrated with **Jenkins CI/CD pipelines** to implement proactive **vulnerability remediation** workflows; automatically scanned infrastructure against cyber scanning tools and vendor security bulletins, triaging and patching **98% of vulnerabilities** within **24 hours** of discovery.
- Designed and documented **change management procedures** aligned with **ITIL best practices** for infrastructure modifications across **compute, storage, virtualization (VMware/Nutanix)**, and cloud platforms; executed **200+ coordinated changes** with **zero unauthorized downtime** and full audit trail compliance.
- Implemented **high availability and disaster recovery** infrastructure monitoring capabilities, tracking failover latency and recovery time objectives; created **30+ technical runbooks** in **Confluence** documenting incident response procedures and escalation workflows, enabling **24/7 on-call support** with **40% faster MTTR**.
- Led knowledge transfer sessions across geographically distributed teams in **EMEA, NA, LATAM, and APAC** regions; established global infrastructure service standards and mentored **12+ junior engineers** on production support methodologies, achieving **94% first-contact resolution rate** within defined SLAs.

Enterprise ERP & Business Systems Integration Support (HCL Technologies)

- Provided third-line infrastructure and application support for enterprise **ERP systems** and interconnected business platforms; coordinated **change control management** and **UAT** across **5+ major system implementations**, ensuring **zero production incidents** during transition to support operations.
- Troubleshoot complex cross-system issues involving **Windows Server administration, Active Directory, DNS, DHCP, and Certificate Services** integration; restored **99.2% availability** for critical business applications across enterprise infrastructure.
- Documented solution architecture and operational procedures for **ERP integrations** via **REST APIs** and database-level data flows; created comprehensive **knowledge base** materials enabling the support team to manage ongoing incidents and changes with **50% reduction in escalations**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
