PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided second-line technical support and production incident management for enterprise applications across **Windows desktop & server environments**, **Microsoft 365 (Outlook, SharePoint, Teams, OneDrive)**, and **cloud platforms (AWS, Azure)** using **monitoring tools (Splunk, CloudWatch, Dynatrace)** to resolve escalated issues within SLAs and reduce mean-time-to-resolution by **35%**.
- Troubleshoot and resolved networking issues including **VPNs, firewalls, routers, switches**, and mobile device connectivity by performing **basic network troubleshooting** and coordinating with vendors; supported onboarding/offboarding processes including user account provisioning, device allocation, and access management across interconnected systems.
- Managed and resolved technical tickets via **service desk systems (Jira)** with **SLA compliance tracking**, escalated complex infrastructure and cloud-environment issues to Level 3 teams and external vendors, and maintained **internal knowledge base articles** and user documentation in **Confluence** to reduce recurring support queries by **28%**.
- Performed regular system maintenance, **patches, and updates** across Windows and cloud infrastructure; assisted in small-scale project work including system migrations, cloud upgrades, and **M365 Admin Center** configuration; managed change-control processes to ensure audit compliance and minimize service disruption.
- Executed **proactive system monitoring** and alert resolution using **CloudWatch, Dynatrace dashboards** to identify and remediate infrastructure issues before end-user impact; created operational dashboards and **Power BI reports** to track support metrics, system health, and SLA performance for business stakeholders.
- Collaborated with cross-functional teams including operations, network engineering, and business stakeholders to diagnose complex issues, gather requirements for system improvements, and provide technical guidance during UAT and post-implementation support cycles; supported migration projects with **30+ users** across Windows and Microsoft 365 environments.

SKILLS

IT Support & Ticketing – second-line technical support, ticket management (Jira), SLA compliance, escalation procedures, service desk systems.

Microsoft & Cloud Platforms – Microsoft 365 (Outlook, SharePoint, Teams, OneDrive), Windows desktop & server environments, Azure, AWS (EC2, S3, Lambda, CloudWatch), M365 Admin Center.

Infrastructure & Networking – VPN troubleshooting, firewalls, routers, switches, basic network troubleshooting, mobile device support, printer troubleshooting.

System Administration – patches & updates, user account management, device provisioning & offboarding, access control, change-control management.

Monitoring & Proactive Support – Splunk, CloudWatch, Dynatrace, system alerting, operational dashboards, Power BI reporting.

Documentation & Knowledge Management – internal knowledge base articles, user guides, onboarding materials, Confluence, training documentation.

Technical Fundamentals – Linux, shell scripting, SQL (PostgreSQL, MySQL, Oracle), Python scripting, Git, Docker, REST APIs, CI/CD (Jenkins).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Microsoft 365 & Windows Infrastructure Support Platform (HCL Technologies)

- Architected and deployed a centralized **IT support & ticketing framework** leveraging **Jira service desk, Microsoft 365 (Outlook, SharePoint, Teams, OneDrive)**, and **Azure cloud monitoring** to streamline second-line incident management and reduce ticket resolution time by **42%**.
- Integrated **CloudWatch, Dynatrace, and Splunk dashboards** to provide real-time **proactive system monitoring** and alert automation across **500+ Windows desktop & server endpoints**, reducing unplanned downtime by **38%** and enabling early-warning detection of infrastructure issues.
- Developed automated **patches, updates, and change-control workflows** using **Jenkins CI/CD pipelines** and **PowerShell scripting** to ensure consistent **Windows server** and cloud-environment compliance; coordinated **small-scale migrations** across **200+ users** with **zero SLA breaches**.
- Created comprehensive **internal knowledge base articles** in **Confluence** and **Power BI operational dashboards** documenting **troubleshooting procedures for VPNs, firewalls, routers, switches, and mobile devices**; trained **15 support staff** on incident classification and escalation protocols, improving first-contact resolution rate by **31%**.
- Implemented **onboarding/offboarding automation** for user account provisioning, device allocation, and access management across **Microsoft 365 and Azure**; reduced account-setup cycle time from **3 days to 4 hours** and maintained audit-trail compliance across **300+ account lifecycle events** annually.

Enterprise Application & Infrastructure Incident Management (HCL Technologies)

- Delivered **second-line technical support** for production enterprise applications, resolving escalated issues in **Windows server environments, Microsoft 365, AWS, and Azure cloud platforms** within **SLA commitments** and coordinating **vendor escalations** for complex infrastructure failures.
- Engineered **proactive monitoring dashboards** using **Splunk, CloudWatch, and Dynatrace** to track system health, alert thresholds, and performance metrics; implemented automated **alert remediation scripts** in **Python** that reduced mean-time-to-resolution by **29%** across **40+ critical systems**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
