PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided **frontline support** and **first-point-of-contact troubleshooting** for enterprise Java/Spring Boot applications and interconnected onboard systems at HCL, diagnosing and resolving **equipment status issues**, **connectivity problems**, and **software configuration errors** within SLA targets; escalated **P1/P2 incidents** to appropriate teams and maintained **accurate incident logs** in ticketing systems, reducing mean-time-to-resolution by **30%**.
- Monitored **system dashboards** and **operational alerts** using **Splunk**, **CloudWatch**, and **Dynatrace** to detect equipment faults and performance degradation in real-time; highlighted **recurring issues** and **repeated problems** to support teams, enabling proactive maintenance and preventing **95%** of potential service outages across monitored infrastructure.
- Executed **basic checks and troubleshooting procedures** including device **restarting**, **software updates**, **settings configuration**, and **functionality testing**; replaced **faulty equipment**, **SIM cards**, and **plug-in/plug-out devices** from spare stock, maintaining **accurate equipment records** and ensuring **100%** fleet readiness for daily service deployment.
- Maintained **up-to-date equipment inventories** and **comprehensive logs** of onboard systems using **ServiceNow** and dedicated operational apps; tracked **spare equipment levels**, **faulty item locations**, and **replacement schedules**; prepared **periodic performance reports** detailing equipment status, **fleet operational percentage**, and **trend analysis** across interconnected systems.
- Coordinated cross-functional support with **local depot teams**, **central IT support**, **equipment suppliers**, and **operations staff** to resolve onboard system issues; facilitated **change control management** for software updates and configuration changes; communicated technical issues and resolutions to non-technical staff, reducing resolution time by **40%**.
- Assisted with **software updates**, **system resets**, and **daily health checks** on onboard connectivity, log-ons, and software versions; verified **ticket machine data downloads** and **revenue data uploads** each day; worked with station teams to ensure **spare equipment availability** and coordinated **faulty equipment returns** for repair, maintaining **99.2%** daily bus deployment readiness.

SKILLS

First-Line Support & Troubleshooting – equipment diagnostics, basic checks, device restarting, software configuration, functionality testing, quick fixes, SLA management, incident escalation.

Equipment & Asset Management – ticket machine support, onboard system maintenance, faulty equipment tracking, spare stock management, plug-in/plug-out device replacement, SIM card replacement, equipment labeling and record-keeping.

Monitoring & Operational Dashboards – Splunk, CloudWatch, Dynatrace, ServiceNow alerts, system health monitoring, fleet operational visibility, performance trending, alert management.

Record Keeping & Reporting – ServiceNow ticketing systems, equipment inventory management, log maintenance, faulty-item tracking, spare-stock documentation, periodic performance reporting, trend analysis.

Cross-Functional Collaboration – depot staff coordination, central IT support liaison, supplier communication, change control management, operations team support, UAT coordination, multi-team issue resolution.

Software Updates & System Administration – software deployment, system resets, connectivity verification, log-on testing, software version validation, data upload/download procedures, Linux command-line operations.

Additional Technical Skills – Python scripting, SQL (PostgreSQL, MySQL, Oracle), AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Git version control, Jenkins CI/CD pipelines, Jira, Confluence.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Fleet Equipment Reliability & Uptime Monitoring Platform (HCL Technologies)

- Designed and deployed a **ServiceNow-integrated equipment tracking system** to centralize **onboard system health checks, ticket machine performance logs, and connectivity status** across a fleet of **500+ vehicles**; automated daily **health check workflows** for software versions, log-ons, and data upload/download verification using **Python scripting** and **scheduled reporting**.
- Built **Splunk dashboards** and **CloudWatch monitoring alerts** to provide real-time visibility into **equipment faults, recurring issues, and spare stock levels**; implemented **alert escalation rules** to automatically notify depot teams and central support, reducing **mean-time-to-response by 45%** and improving first-contact resolution rate to **78%**.
- Established **faulty equipment tracking workflows** with automated **label generation, return-to-supplier coordination, and spare-part replenishment procedures** using **ServiceNow email integration** and **SQL-based inventory queries**; reduced equipment downtime by **35%** and achieved **99.1%** daily fleet operational readiness across all depots.
- Generated **weekly and monthly trend reports** in **Power BI** showing **equipment performance metrics, percentage of buses fully operational, recurring fault patterns, and predictive maintenance recommendations**; delivered insights to operations teams that enabled proactive equipment replacement and contributed to **23% reduction** in reactive support calls.

SWIFT Payments Operations Dashboard & Production Support (HCL Technologies)

- Provided **first-line and escalation support** for a **SWIFT messaging payments-operations dashboard** supporting a major banking client; monitored **transaction-flow visibility** and **payment message routing** using **Splunk and Dynatrace dashboards**, resolving **P1/P2 incidents** within SLA and maintaining **99.8%** platform uptime for mission-critical payment processing.
- Executed **change control management** and **software updates** for **ISO 20022 message format** and **SEPA instant payment** workflow modifications; coordinated with banking-domain business analysts and regulatory teams to validate **GDPR compliance** and **audit trail integrity** across production environments, ensuring zero regulatory violations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
