PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Configured and tested **Electronic Health Record (EHR)** application systems in an **acute hospital setting**, supporting clinical workflow validation, system integration testing, and **go-live readiness activities** across interconnected healthcare platforms; managed **change-control processes** for system configuration updates and **UAT coordination** with clinical and operational stakeholders to ensure compliance with healthcare requirements.
- Developed and delivered **training materials, user guides, and onboarding documentation** for clinical and administrative staff using **Confluence** and **Microsoft Office products** (Word, PowerPoint, Excel); created **training readiness programs** supporting 200+ hospital users across multiple departments with **15% reduction in post-go-live support tickets**.
- Implemented **application support and incident management** for enterprise healthcare systems using **monitoring and alerting** dashboards; managed **SLA-critical incidents** in production, prioritized **P1/P2 healthcare workflow issues**, and coordinated **post-go-live support** across clinical operations teams with **98% uptime** during stabilization period.
- Executed **digital healthcare transformation** project activities including system configuration, requirements gathering with clinical BAs, and **large-scale organizational change management**; collaborated cross-functionally with hospital administration, clinical governance, and IT teams to align **EHR deployment with acute paediatric hospital services and processes**.
- Managed **data integration and system interconnectivity** across multiple healthcare and enterprise business systems using **REST APIs, SQL** (PostgreSQL, MySQL, Oracle), and **ETL pipelines**; ensured **regulatory compliance** (GDPR, data protection) and audit-trail requirements for healthcare data flows across **3+ integrated systems**.
- Demonstrated proficiency in **healthcare application analytics and operational reporting** using **Power BI dashboards, DAX measures, and Power Query** for healthcare KPIs; created **clinical performance dashboards** enabling hospital operations teams to monitor **patient safety metrics, workflow efficiency, and system reliability** with **real-time alerting**.

SKILLS

Healthcare & EHR Systems – Electronic Health Record (EHR) configuration and testing, acute hospital setting operations, digital healthcare transformation, paediatric hospital services, clinical workflow analysis, healthcare compliance.

Application Support & Operations – EHR application support, incident management, SLA management, production monitoring, post-go-live support, change-control management, UAT coordination, clinical readiness activities.

Data Integration & Healthcare Data Management – System interconnectivity, REST APIs, SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, GDPR, healthcare data protection, audit-trail management, regulatory compliance.

Healthcare Analytics & Reporting – Power BI dashboards, DAX measures, Power Query, Tableau, clinical performance metrics, operational analytics, business intelligence, healthcare KPI reporting.

Enterprise Systems & Business Applications – ERP integration support, enterprise business system configuration, cross-system integrations, healthcare administration systems, large-scale digital transformation projects.

Training & Knowledge Management – Training material development, user guides, clinical staff onboarding, Confluence documentation, Microsoft Office (Word, PowerPoint, Excel), training readiness programs.

Technical Stack – Python, Java, Spring Boot, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, Jira, PostgreSQL, MySQL, Oracle, data modelling, data warehousing.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

National Children's Hospital EHR Deployment & Clinical Readiness Programme (HCL Technologies)

- Led **EHR application configuration** and system testing across **8 clinical modules** (inpatient, outpatient, emergency, pharmacy, laboratory, imaging, billing, clinical documentation) supporting **acute paediatric hospital workflows** in ROI and Northern Ireland; managed **vendor training certification** and hands-on configuration of **clinical safety features, order entry protocols, and medication management**.
- Designed and deployed **clinical readiness dashboards** using **Power BI** and **Tableau** tracking **go-live milestones, UAT defect resolution, and training completion rates** across **40+ hospital staff**; created real-time operational analytics showing **system performance, network latency, and user adoption metrics** with **92% on-time UAT closure**.
- Developed comprehensive **training and change-management strategy** including **clinical user guides, administrator runbooks, and role-based onboarding materials** using **Confluence, Microsoft Office, and Power BI**; executed **train-the-trainer programme** for **15 super-users** enabling **cascade training to 250+ clinical and administrative staff** pre-go-live.
- Orchestrated **UAT coordination and requirements validation** working directly with clinical BAs, hospital operations, and IT stakeholders; managed **change-control board** for system configuration updates, documented **clinical workflows, regulatory compliance requirements, and GDPR data handling protocols**; achieved **100% requirements traceability**.
- Implemented **healthcare data integration architecture** connecting **EHR with legacy hospital systems, imaging platforms, laboratory information systems, and billing applications** using **REST APIs, SQL, and ETL pipelines**; ensured **GDPR compliance, audit logging, and data protection** across **6 interconnected systems** supporting **200,000+ patient records**.
- Delivered **post-go-live support** and **production monitoring** using **CloudWatch and custom dashboards** tracking **clinical workflow stability, system uptime, and incident response**; managed **SLA-critical healthcare incidents** with **99.5% uptime** during stabilization phase, reducing post-launch clinical support tickets by **40%** through proactive monitoring.

Healthcare Clinical Performance Analytics & Operational Governance Platform (HCL Technologies)

- Built **clinical performance dashboards** using **Power BI, DAX, and data modelling** aggregating **patient safety metrics, bed utilization, emergency department throughput, and surgical scheduling data** from **hospital ERP systems and operational databases** (PostgreSQL, Oracle); dashboards accessed by **30+ clinical leaders** supporting daily operations.

- Engineered **data warehouse architecture** consolidating **acute hospital operational data** from 5+ **disparate systems** using **SQL ETL pipelines and Power Query**; implemented **data quality controls, validation rules, and compliance logging** for **GDPR-regulated healthcare information**.
- Designed **regulatory compliance reporting** for hospital governance including **clinical audit trails, medication administration records, and adverse event tracking**; created **automated Power BI refresh schedules** delivering **real-time KPI visibility** to **hospital administration and clinical governance committees** with **zero data integrity incidents**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
