PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **microservice features** in **Java Spring Boot** and **Python**, delivering **12+ REST API endpoints** for enterprise collaboration platforms with **99.95% uptime SLA**; implemented automated test suites using **JUnit and pytest** achieving **87% code coverage**.
- Managed full lifecycle development from feature design through testing and deployment, collaborating with cross-functional agile teams to deliver **8 quarterly releases**; coordinated **CI/CD pipelines in Jenkins** with **Git branching strategies** and code reviews, reducing deployment time by **40%**.
- Operated and maintained **highly available microservice architecture** across **AWS (EC2, S3, Lambda, CloudWatch)** and **Docker containerization**, responding to **P1/P2 incidents** with **SLA compliance of 98%**; implemented **Splunk and Dynatrace monitoring dashboards** for real-time operational visibility and automated alerting.
- Solved complex technical problems using a **data-driven, scientific approach**; applied **statistical analysis and machine learning models** (scikit-learn, regression, hypothesis testing) to optimize system performance, reducing latency by **35%** and improving throughput by **22%**.
- Leveraged **AI technologies and automation tools** to accelerate team productivity and feature delivery; built **Python ETL pipelines and scheduled reporting workflows** that automated **15 hours/week** of manual operational tasks, enabling faster root-cause analysis and incident resolution.
- Demonstrated strong attention to detail and ownership across varied responsibilities: developed **SQL (PostgreSQL, MySQL, Oracle) data validation and schema migration scripts**, created comprehensive **Confluence documentation and user guides** for new features, and drove UAT coordination and post-go-live support with **zero critical defects** in first 30 days.

SKILLS

Languages & Frameworks – Java, Spring Boot, Python, C++, JavaScript, Flask, FastAPI, SQL.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Git, Jenkins, CI/CD, continuous integration, continuous delivery.

Data & Analytics – Data science, machine learning, scikit-learn, pandas, NumPy, statistical analysis, A/B testing, Power BI, Tableau.

Databases – PostgreSQL, MySQL, Oracle, data modelling, data warehousing.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, application performance monitoring, operational alerting.

Agile & Collaboration – Agile, Scrum, Jira, Git branching, code reviews, cross-functional team collaboration.

Quality & Testing – Automated testing, JUnit, pytest, test-driven development, continuous learning.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Webex Collaboration Reliability Platform – Microservice Observability & Auto-Healing (HCL Technologies)

- Architected and delivered an end-to-end **microservice observability and auto-healing platform** powering **Webex Meetings** reliability across **12 interconnected services**; integrated **Splunk, Dynatrace, and CloudWatch** data into a unified **Power BI operational dashboard** with **DAX measures** for real-time SLA tracking and anomaly detection.
- Implemented **AI-driven anomaly detection** using **scikit-learn (isolation forests, time-series forecasting)** to identify performance degradation **15 minutes earlier** than manual detection; fed alerts into automated remediation workflows in **AWS Lambda**, reducing mean-time-to-resolution by **53%** and saving **40+ hours/month** of on-call engineer time.
- Built **Python ETL pipelines and data warehousing layer** (PostgreSQL) consolidating metrics from **8 cloud regions** into a unified data model; designed **Tableau interactive dashboards** for product teams to correlate feature deployments with performance shifts, enabling **3 preventive architecture improvements** before customer impact.
- Developed **Java Spring Boot microservices** (REST APIs) for automated incident correlation and root-cause analysis; deployed via **Docker containers** orchestrated in **Kubernetes**, with **GitOps-driven continuous delivery pipelines in Jenkins**; achieved **99.99% uptime** across all reliability services.
- Led **Agile sprint planning and code reviews** across a 6-engineer team; implemented **pytest-based automated testing framework** with **92% code coverage**, reducing production defects by **68%** and establishing quality-first development culture.

SWIFT Payments Operations Dashboard – Real-Time Monitoring & ISO 20022 Compliance (HCL Technologies)

- Designed and deployed a **real-time payments operations dashboard** for a major banking client, providing **transaction-flow visibility** and **operational alerting** across **SWIFT MT/MX message processing** with **SEPA, cross-border payments, and instant payments** workflows; monitored **15,000+ daily payment messages** with **99.98% SLA compliance**.
- Implemented **ISO 20022 message parsing and validation logic** in **Java Spring Boot**, ensuring **regulatory compliance (GDPR, audit trails, data protection)** and **PSD2 Open Banking** requirements; reduced payment processing errors by **92%** through automated message format validation.
- Built **SQL (Oracle, PostgreSQL) reconciliation workflows** and **Python data pipelines** to correlate payment records across **ERP integration points**, achieving **100% transaction auditability** and enabling cross-functional collaboration with banking-domain BAs and operations teams for UAT and post-go-live support.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
