PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **end-to-end features** for enterprise Java Spring Boot and **REST API** microservices at scale, delivering **high-quality, maintainable solutions** across **production environments** supporting millions of transactions; owned technical breakdown of product requirements into executable tasks, reducing feature delivery cycle time by **30%** through structured architecture and code-review discipline.
- Led **system design and architecture discussions** across cross-functional teams (engineers, product managers, UX designers), making sound **technical decisions** on API design, database schema optimization, and deployment patterns; mentored junior engineers on design patterns and best practices, raising team **engineering quality** by **40%** through code reviews and continuous improvement practices.
- Owned **production monitoring, incident response, and customer feedback integration** using **Splunk, CloudWatch, and Dynatrace** to drive reliability improvements; investigated root causes of **P1/P2 incidents**, identified performance bottlenecks, and delivered **SLA-compliant resolutions**, achieving **99.5% uptime** across critical services used by millions of end-users worldwide.
- Architected and delivered comprehensive **unit, integration, and end-to-end testing strategy** with **contract testing and test automation in CI/CD pipelines** using **Jenkins and Git** for continuous delivery; implemented automated test scaffolding that reduced manual testing effort by **45%** and caught regressions before production deployment.
- Developed **modern full-stack applications** using **TypeScript/JavaScript, React, Angular, Java Spring Boot, and Python**; built **WebSocket-based real-time communication layers** and **RESTful API integrations** across distributed systems; leveraged **AI-assisted development tools** for code generation, refactoring, and test generation while maintaining **clear ownership of validated, production-ready code**.
- Applied **DevOps practices, continuous integration, and continuous delivery** through **Git branching strategies, Jenkins pipeline orchestration, Docker containerization, and AWS infrastructure** (EC2, S3, Lambda, CloudWatch); optimized team productivity by enabling engineers to focus on complex problems through **AI tools** and automation, reducing deployment time by **50%**.

SKILLS

Languages & Frameworks – Java, Spring Boot, Python, TypeScript, JavaScript, C++, React, Angular, Swift.

Backend & API Development – RESTful APIs, WebSocket communication, API design, microservices architecture, system design.

Testing & Quality Assurance – Unit testing, integration testing, end-to-end testing, contract testing, test automation, CI pipelines, test strategy definition.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, Jenkins, CI/CD, continuous delivery, DevOps practices.

Data & Databases – SQL, PostgreSQL, MySQL, Oracle, data modeling, data warehousing.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, application performance monitoring, incident management, SLA management.

AI-Assisted Development – LLM-based development tools, code scaffolding, refactoring, test generation, debugging, developer productivity optimization.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Real-Time Collaboration Feature Platform with Multi-Device Synchronization (HCL Technologies)

- Architected and led end-to-end design of a **WebSocket-based real-time synchronization engine** using **Java Spring Boot, TypeScript, and React** to power seamless meeting-state consistency across desktop, mobile (Swift), and web clients; defined **system architecture, API contracts, and data flow** through structured design reviews with cross-functional team.
- Implemented comprehensive **unit, integration, and end-to-end testing framework** including **contract testing** to validate API agreements between frontend and backend; automated test generation and scaffolding via **AI-assisted development tools**, reducing test-writing effort by **60%** while achieving **92% code coverage** and zero production regressions.
- Deployed feature across **AWS infrastructure** (EC2 instances, S3 for state snapshots, Lambda for event processing) with **Docker containerization** and **Jenkins CI/CD pipelines**; optimized WebSocket connection pooling and message throughput to handle **50,000+ concurrent users** with **<100ms latency** for state synchronization.
- Established **monitoring and observability** using **CloudWatch and Dynatrace** to track latency, connection health, and error rates; implemented alerting for **P1/P2 incidents** and led root-cause analysis on connection-dropout issues, improving reliability to **99.7% uptime** across all platforms.
- Mentored 3 junior engineers on **API design patterns, testing best practices, and architectural decision-making**; conducted code reviews focused on maintainability, performance, and test coverage, raising overall team **engineering quality standards** by 35%.

Payments Operations Dashboard & Transaction Flow Monitoring System (HCL Technologies)

- Designed and built production-grade **monitoring and alerting dashboard** for **SWIFT messaging** and **ISO 20022 message flows** using **Java Spring Boot REST APIs** and **React** frontend; integrated **Splunk and CloudWatch** for real-time visibility into payment transaction states, achieving **sub-second alert latency** for operational teams.
- Implemented **multi-region API infrastructure** on **AWS (EC2, RDS Oracle, CloudWatch)** to ingest and process **100,000+ daily payment messages**; optimized **SQL queries and database indexing** for near-real-time reconciliation reporting, reducing query latency by **65%**.
- Established **data quality validation pipelines** using **Python** to audit SWIFT message compliance with **regulatory standards (GDPR, audit trails, PSD2)**; automated data lineage tracking and compliance reporting, reducing manual audit effort by **80%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
