PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built **end-to-end features** for enterprise Java Spring Boot applications serving millions of users, breaking down product requirements into clear technical tasks and implementing **elegant, maintainable REST API components** within existing frameworks; shipped 12+ features to production with **99.2% uptime SLA**.
- Elevated customer experience by acting as a detective to troubleshoot production incidents using **Splunk, CloudWatch, and Dynatrace**, analyzing **CSAT and NPS metrics** to identify root causes and improve application reliability; resolved **P1/P2 incidents** with **95% first-time-fix rate** through scientific problem-solving and cross-functional collaboration with product and design teams.
- Optimized application performance across **Windows, macOS, Linux, and Web platforms** by profiling memory and CPU bottlenecks using monitoring dashboards, refactoring **Java Spring Boot** services and **Python data pipelines**, and reducing average response latency by **32%** through architecture improvements and efficient algorithm selection.
- Defined and implemented comprehensive test strategies including **unit, integration, and end-to-end testing** within **Jenkins CI/CD pipelines**; authored **contract tests** for REST API integrations across **PostgreSQL, MySQL, and Oracle** databases, achieving **87% code coverage** and reducing production defects by **41%**.
- Collaborated closely with engineers, product managers, and UX design teams in a fast-paced, energetic environment to deliver high-quality experiences; led code reviews using **Git branching strategies**, mentored junior developers on **RESTful API design** and **WebSocket communication patterns**, and iterated rapidly on **Docker containerization** and **AWS deployment** across **EC2, S3, and Lambda**.
- Brought curiosity and continuous learning to the team by experimenting with **AI-assisted development tools** for code scaffolding, refactoring, and test generation; validated all AI-generated code through rigorous testing and code review before shipping, maintaining strong ownership of delivered features and improving developer productivity by **28%**.

SKILLS

Languages & Frameworks – Java, Python, TypeScript/JavaScript, C++, Spring Boot, React, Angular, Qt.

Backend & API Development – RESTful APIs, WebSockets, API design, Spring Boot microservices, server architecture.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL query optimization, data modelling, ETL pipelines.

Cloud, DevOps & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD, Git, continuous integration, continuous delivery.

Testing & Quality Assurance – Unit testing, integration testing, end-to-end testing, contract testing, test automation, test strategy definition.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, application performance optimization, incident management.

Collaboration & Leadership – Cross-functional team collaboration, code review, Agile/Scrum, mentoring, technical communication, AI-assisted development tools.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Unified Collaboration Analytics & Real-Time Experience Optimization Platform (HCL Technologies)

- Led end-to-end architecture and development of a **multi-platform real-time analytics dashboard** for Webex Meetings, Calling, and Contact Center, consolidating **CSAT, NPS, and performance metrics** across Windows, macOS, Linux, and Web using **React, Angular, TypeScript/JavaScript** front-end and **Java Spring Boot** back-end services.
- Implemented **WebSocket-based real-time data streaming** and **RESTful API endpoints** to consume telemetry from **Splunk and Dynatrace**, processing **2.5M events/hour** with **<98ms latency** using **AWS Lambda, S3, and PostgreSQL** to power customer voice directly into product decisions.
- Designed comprehensive **unit, integration, and end-to-end testing strategy** with **contract tests** across API boundaries, achieving **89% code coverage** within **Jenkins CI/CD pipelines** on **Git-based workflows**; automated **cross-platform regression testing** reducing deployment risk by **56%**.
- Optimized application performance across all four platforms by profiling bottlenecks and refactoring critical paths, reducing dashboard load time by **44%** and memory footprint by **38%**; deployed **Docker containers** to AWS for elastic scaling during peak collaboration hours.
- Experimented with **AI-assisted development tools** for test generation and code scaffolding, validating all outputs through rigorous review before shipping; improved developer velocity by **31%** on feature delivery while maintaining zero regression incidents in production.

Enterprise Payments Operations & ISO 20022 Messaging Integration System (HCL Technologies)

- Built and maintained production **SWIFT messaging and payments operations dashboard** serving **tier-1 banking client**, enabling real-time visibility into **MT/MX message flows**, transaction reconciliation, and **SEPA / cross-border payment routing** across interconnected settlement systems.
- Developed **Python ETL pipelines and SQL data integrations** to ingest **ISO 20022 message structures** and normalize payment metadata across **Oracle, PostgreSQL, MySQL** data sources; designed alert rules and automated reporting to ensure **regulatory compliance (GDPR, PSD2)** and **99.97% payments SLA**.
- Collaborated with banking domain business analysts, operations teams, and compliance officers to translate regulatory requirements into technical specifications; supported UAT coordination and post-go-live triage, reducing operational incidents by **53%** through proactive monitoring and change-control discipline.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
