PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led master data creation and governance processes using **SAP COMET Material Master, Purchasing, BOM, and Routing modules** in a manufacturing environment, ensuring **100% compliance** with data standards and resolving **40+ master data issues** monthly to maintain uninterrupted material flow across the value stream.
- Designed and delivered **Master Data Quality Reports** using **Power BI dashboards and DAX measures** to track data accuracy against targets; collaborated with **cross-functional stakeholders** across Self-Directed Work Teams and Hubs to establish and cascade **data quality standards**, achieving **98% master data accuracy** within 6 months.
- Drove **SAP COMET deployment and setup** of master data business processes including material creation workflows, quality data validation, and BOM hierarchies; managed end-to-end **user acceptance testing (UAT)** for new SAP introduction, data migrations, and disaster recovery scenarios with **zero production data incidents**.
- Managed **master data workflow requests** for compliance, accuracy, and completeness; analyzed and validated data entry across key SAP systems using **SQL (PostgreSQL, MySQL, Oracle)** queries and **Python ETL scripts**; tracked and achieved **master data accuracy targets** through systematic data governance and audit-trail management.
- Trained **20+ team members and end-users** on SAP COMET master data standards, MDM processes, and data lifecycle management; developed comprehensive **user guides and training materials** in Confluence to enable accurate, efficient, and timely data processes; acted as expert advisor on material master, purchasing, BOM, routing, and quality data requirements.
- Led resolution of **master data-related incidents** impacting the value stream through root-cause analysis and corrective action implementation; participated in **SAP performance management** forums using operational dashboards and metrics; coordinated with data owners across multiple business units to ensure no interruption to manufacturing workflows and regulatory compliance (GDPR, audit-trail requirements).

SKILLS

SAP COMET & Master Data Management – SAP COMET Material Master, Purchasing, BOM, Routing, Quality master data, master data creation and governance, master data lifecycle management, master data deployment and setup, master data quality reporting, master data accuracy tracking.

Data Management & Analytics – Master Data Quality Reports, Power BI dashboards, DAX measures, data modelling, data warehousing, SQL (PostgreSQL, MySQL, Oracle), Python ETL pipelines, data validation, workflow data analysis.

Manufacturing & Supply Chain Domain – Material flow optimization, value stream enablement, BOM management, routing management, inventory master data, material creation workflows, supply chain data governance.

Quality Assurance & Testing – User acceptance testing (UAT), data change testing, disaster recovery testing, compliance validation, data accuracy verification, quality standards enforcement.

Stakeholder Collaboration & Leadership – Cross-functional team leadership, multi-team data governance, data owner collaboration, user training and development, business stakeholder communication, change management, process design and automation.

Enterprise Systems & Integration – REST APIs and system integrations, ERP support, change-control management, production data management, incident resolution, operational dashboards, performance metrics tracking.

Professional & Soft Skills – GDPR and regulatory compliance, audit-trail management, analytical and data interpretation skills, excellent communication and interpersonal skills, demonstrated leadership behaviours, customer and patient-focused mindset, candid and courageous communication.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

SAP COMET Master Data Governance & Deployment Framework (HCL Technologies)

- Architected and deployed a comprehensive **Master Data Governance Framework** for SAP COMET across the manufacturing organization, establishing standardized data creation and validation processes for **Material Master, Purchasing, BOM, Routing, and Quality modules**; governed **5,000+ material records** from design through production launch, achieving **99.2% first-pass accuracy** and reducing master data rework by **65%**.
- Built **Master Data Quality Dashboard** using **Power BI, DAX formulas, and Power Query** to monitor real-time accuracy metrics, data completeness, and compliance against standards; automated **weekly master data quality reports** with drill-down capability to the record level, enabling rapid identification and resolution of **95% of data anomalies** within **48 hours** vs. **7 days** previously.
- Led SAP COMET **deployment and setup** of master data business processes including material creation workflows, multi-level BOM hierarchies, routing configurations, and quality data validation rules; designed and executed **comprehensive UAT** for new SAP introduction across **12 business units**, resulting in zero production data incidents during cutover and **98% user adoption** within **30 days**.
- Developed and cascaded **Master Data Standards and Training Program** across **Self-Directed Work Teams and Hubs**, training **25+ stakeholders** on data governance, MDM lifecycle, and quality requirements; created **detailed user guides and process documentation** in Confluence, reducing master data entry errors by **72%** and decreasing support requests by **58%**.
- Managed **master data workflow requests** for accuracy, compliance, and completeness using **SQL validation queries and Python ETL scripts**; resolved **40+ complex master data issues monthly** through root-cause analysis and cross-functional coordination, maintaining **100% on-time delivery** of material milestones and zero disruption to value stream material flow.

Enterprise ERP Master Data Integration & Change Management (HCL Technologies)

- Supported and coordinated **SAP and ERP system integrations** for master data across interconnected manufacturing and financial systems using **REST APIs and database-level data flows**; managed **change-control processes** for **30+ system configuration updates**, ensuring compliance with audit-trail and regulatory requirements (GDPR, data protection standards).
- Performed master data UAT support and post-go-live triage for **ERP deployments** across purchasing, inventory, and operations modules; coordinated with **business analysts and operations teams** to validate **Material Master, purchasing data, and BOM accuracy**, resolving **85% of issues** during UAT and preventing production escalations.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
