PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and assessed data accuracy against client policies using **SQL** and **Python** for validation workflows, identifying and flagging **15,000+** data discrepancies monthly with **99.2%** precision to ensure compliance with regulatory standards.
- Engaged with business stakeholders via structured outbound phone calls to verify business information, update client platforms in real-time, and document communication trails for audit purposes, maintaining **95%** first-contact resolution rate across **200+ weekly interactions**.
- Adhered to all compliance requirements including data protection regulations, audit trails, and platform-specific governance policies in a fast-paced production environment supporting **10,000+ concurrent users** and processing **50,000+ daily transactions**.
- Demonstrated adaptability and flexibility by rapidly onboarding onto new client policies, platform workflows, and escalation procedures within **2-week** training cycles, enabling seamless transition across **5 distinct business domains** during tenure.
- Applied excellent verbal and written communication skills through comprehensive documentation of findings, defect tickets in **Jira**, and detailed case summaries in **Confluence**, ensuring clarity for business teams and enabling **30%** faster issue resolution.
- Exercised sound judgment and problem-solving in a dynamic environment by analyzing anomalies in transaction data, cross-referencing against **ISO 20022** standards and payment processing policies, and recommending corrective actions that reduced platform errors by **22%**.

SKILLS

Data Review & Compliance – data accuracy assessment, client policy verification, regulatory compliance adherence, audit trail management, data protection standards.

Communication & Stakeholder Engagement – outbound phone communication, customer engagement, verbal and written communication, business information verification, cross-functional collaboration.

Data & Analytics Tools – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy), data validation workflows, ETL processes.

Business Systems & Platforms – enterprise platform support, transaction processing systems, real-time data updates, client platform navigation.

Compliance & Standards – regulatory compliance, audit requirements, data protection regulations, ISO 20022 message standards, payment processing workflows.

Technical & Professional Skills – Jira, Confluence, Linux, Git, adaptability, attention to detail, problem-solving, fast-paced environment management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Content Moderation & Data Verification Platform for Multinational Technology Client (HCL Technologies)

- Architected and executed a **data validation and accuracy assessment system** processing **100,000+ monthly records** against client policies using **Python ETL pipelines** and **SQL**, achieving **99.4%** data integrity and reducing manual review overhead by **35%**.
- Built a **compliance and audit trail dashboard** in **Power BI** tracking all data modifications, user actions, and policy-exception flags in real-time, enabling auditors to verify regulatory adherence across **50+ compliance domains** and reducing audit cycle time by **40%**.
- Designed and deployed an **outbound communication workflow system** with structured call scripts, business-information verification checkpoints, and platform-update automation, enabling **200+ weekly stakeholder interactions** with **94%** successful resolution and full audit documentation.
- Implemented **anomaly detection logic** using **Python scikit-learn** to identify outliers and policy violations in transaction data against **ISO 20022** standards and **payment processing rules**, flagging **12,000+ edge cases** annually with **97%** precision for human review.
- Trained **15 team members** across **5 business domains** on data review procedures, compliance requirements, platform navigation, and customer-engagement best practices, reducing onboarding time from **4 weeks to 2 weeks** and improving team consistency by **28%**.

Banking Domain Compliance & SWIFT Message Flow Verification System (HCL Technologies)

- Developed and maintained a **SWIFT MT/MX message validation framework** using **Python** and **SQL** to verify message accuracy against **ISO 20022** standards and **SEPA/cross-border payment policies**, processing **50,000+ payment messages daily** with **zero compliance violations**.
- Built customer-engagement protocols for **banking domain verification calls**, collecting business confirmations on transaction details, payment routing, and compliance certifications, completing **150+ weekly interactions** with **100%** documentation in audit-compliant formats.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
