PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed data accuracy against client policies and compliance requirements across enterprise systems, identifying and escalating policy violations with **98% precision**; conducted outbound verification calls to engage with business stakeholders, update client platforms, and maintain audit trails for regulatory compliance including GDPR data protection standards.
- Supported production environments for payment operations dashboards and financial services platforms, responding to **P1/P2 incidents** with **99.5% SLA adherence**; monitored system health using **Splunk, CloudWatch, and Dynatrace** to ensure continuous availability and rapid issue resolution in dynamic, fast-paced operational settings.
- Managed change-control workflows and **UAT coordination** across interconnected enterprise business systems and client platforms, working cross-functionally with business teams and operations staff to verify information accuracy, execute system updates, and deliver post-implementation support with **zero production defects** in **40+ deployments**.
- Developed **Python automation scripts** and data pipelines for compliance reporting and transaction flow visibility, processing **10,000+ records daily**; created standardized documentation and training materials to guide team members through repetitive data validation tasks and platform navigation procedures.
- Engineered **REST API integrations** and cross-system data flows connecting enterprise platforms via **SQL (PostgreSQL, MySQL, Oracle)**, enabling real-time data synchronization and accurate platform updates; demonstrated adaptability by rapidly upskilling on new client systems and tools within **2-week onboarding cycles**.
- Collaborated with multilingual teams and international stakeholders across banking, payments, and ERP domains, communicating complex technical requirements and resolution steps with excellent verbal and written clarity; supported **SEPA, ISO 20022, and PSD2** regulatory frameworks in production payment environments serving global banking clients.

SKILLS

Customer Engagement & Communication – Outbound phone verification, stakeholder collaboration, verbal and written communication, customer support, problem-solving, attention to detail.

Data Review & Compliance – Data accuracy assessment, policy verification, compliance requirement adherence, GDPR data protection, regulatory audit trails, change-control management.

Data & Business Platforms – SQL (PostgreSQL, MySQL, Oracle), REST APIs, ERP systems integration, enterprise platform support, data validation, schema management, cross-system data flows.

Monitoring, Incident Management & Production Support – Splunk, CloudWatch, Dynatrace, SLA management, P1/P2 incident response, system reliability, production environment operations.

Automation & Data Processing – Python scripting, data pipelines, ETL workflows, scheduled reporting, batch processing, Linux shell scripting.

Domain Knowledge – Financial services, payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA standards, PSD2 Open Banking, cross-border payments, banking operations.

Tools & Technologies – Jira, Confluence, Git, Jenkins CI/CD, Docker, AWS (EC2, S3, Lambda), Spring Boot, Angular, Power BI, Tableau, pandas, scikit-learn.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Multilingual Compliance Data Verification Platform (HCL Technologies)

- Architected an end-to-end **data moderation and verification workflow** processing **15,000+ daily records** across global technology client platforms; integrated **Python ETL pipelines** with **PostgreSQL** to automatically flag accuracy deviations against client policy rules, reducing manual review time by **60%** and improving compliance error detection to **99.2% precision**.
- Designed **outbound verification call scripts and tracking dashboards** using **Power BI** to monitor stakeholder engagement metrics, call success rates, and platform update confirmations; enabled team to manage **200+ weekly verification calls** with **95% data confirmation accuracy** and **100% GDPR audit trail compliance**.
- Implemented automated **compliance reporting system** using **Python scheduling (cron jobs)** and **shell scripting** to generate daily policy violation summaries, regulatory change-logs, and stakeholder communication templates; reduced report generation time from **4 hours manual** to **15 minutes automated**, freeing team capacity for strategic verification work.
- Collaborated with multilingual business teams and client compliance officers across **8 countries** to gather requirements, document verification procedures, and deliver **multi-language training materials** and user guides; ensured consistent adherence to dynamic compliance frameworks and client-specific policy updates across distributed teams.

Financial Services Data Quality & Reconciliation Dashboard (HCL Technologies)

- Built **Power BI analytics dashboard** aggregating data quality metrics, transaction accuracy rates, and reconciliation status across SWIFT messaging and payments operations platforms; enabled **real-time visibility** into **ISO 20022 message flows**, SEPA payment processing, and cross-border transaction accuracy with **sub-second refresh latency**.
- Engineered **SQL-based data validation queries** on **Oracle and PostgreSQL** to automatically detect discrepancies in transaction records, stakeholder information, and platform synchronization; reduced manual data audit time by **75%** and identified **340+ accuracy issues monthly** for rapid remediation.
- Documented compliance mappings and data review procedures for regulatory audits, ensuring complete traceability of all verification decisions; supported **GDPR data protection, PSD2 regulatory**, and banking-domain compliance standards across **3 major client deployments** with **zero compliance violations**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
