PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Maintained and enhanced **multiple software systems** ensuring **high availability, data integrity, and compliance** with pharmaceutical regulations; delivered production support for enterprise Java Spring Boot and Python applications using **Splunk, CloudWatch, and Dynatrace**, achieving **99.8% SLA compliance** across P1/P2 incident response and root cause analysis.
- Led day-to-day work activities including **system issues, data issues, and customer incidents & change requests**; managed **change-control protocols** and **change-request workflows** across interconnected systems using **Jenkins CI/CD pipelines, Git branching, and Jira ticketing**, reducing deployment cycle time by 35%.
- Developed and deployed software solutions using **Python, SQL (PostgreSQL, MySQL, Oracle), and Java Spring Boot**; built **data pipelines, ETL workflows, and CSV data-validation scripts** for regulatory compliance, processing **50,000+ records daily** with **zero data-integrity errors**.
- Collaborated with cross-functional teams including scientists, engineers, and IT to understand requirements and implement system improvements; produced and maintained **comprehensive documentation including design, security, testing, and system procedures** across ERP integrations and enterprise business systems supporting audit and inspection readiness.
- Monitored **system performance** and implemented **proactive measures to prevent downtime** via custom **Python monitoring scripts and automated alerting** in AWS (EC2, S3, Lambda, CloudWatch); managed **ongoing compliance activities including periodic review, audit trail reviews, and access roster reviews** with **100% audit pass rate**.
- Promoted use of **system functionality and new technologies** to improve work processes; trained cross-functional business users on operational dashboards and troubleshooting procedures; supported **audits and inspections** by providing **technical documentation and system insights**, demonstrating learning agility across manufacturing software systems and GMP/CSV regulatory frameworks.

SKILLS

Software Engineering & Development – Java Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs, Flask, FastAPI, Docker, Git, Jenkins.

Data & Analytics – CSV data validation, Python data pipelines, ETL workflows, pandas, NumPy, scikit-learn, Power BI, Tableau, Power Query, data modelling, data warehousing.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux, shell scripting, CI/CD pipelines, automated alerting and monitoring.

Monitoring, Observability & Compliance – Splunk, Dynatrace, CloudWatch, system performance monitoring, audit trail management, data integrity verification, GMP, CSV, pharmaceutical compliance.

Manufacturing & Operations – Manufacturing software systems support, change-control management, incident management, troubleshooting and root cause analysis, system documentation, quality assurance.

Cross-Functional Collaboration – Jira, Confluence, requirements gathering, UAT coordination, stakeholder communication, technical documentation, business process analysis.

Certifications & Qualifications – MSc Data Analytics (NCI Dublin), Bachelor of Engineering Computer Science, IELTS Academic Band 7, Full Stack Java Spring Boot certification.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Pharmaceutical Manufacturing Data Integrity & Compliance Platform (HCL Technologies)

- Architected and deployed an integrated **data validation and compliance-monitoring system** for a manufacturing client using **Python, SQL, and ETL pipelines**; automated **CSV data-integrity checks** across **150+ daily operational data feeds**, achieving **100% audit trail completeness** and zero compliance violations across **GMP and CSV regulatory audits**.
- Designed **system performance dashboards and operational reporting** in **Power BI** consuming real-time data from **AWS Lambda-triggered ETL jobs**; enabled cross-functional teams (scientists, engineers, operations) to monitor system health and data discrepancies with **5-minute refresh latency**, reducing incident detection time by **40%**.
- Implemented **change-control and change-request management workflows** with full documentation of design, security, testing, and deployment protocols; streamlined post-deployment validation procedures and audit-readiness processes, reducing compliance-review cycle time from **3 weeks to 4 days**.
- Developed **automated system monitoring and proactive alerting** using **Python scripts, CloudWatch, and Splunk** to prevent downtime and data discrepancies; established **access roster reviews and periodic compliance audits**, maintaining **99.8% system uptime** across manufacturing operations.

Production Support & Root Cause Analysis Automation (HCL Technologies)

- Led production support and incident response for enterprise manufacturing and business-system applications; managed **day-to-day system issues and customer incidents** using **Splunk, Dynatrace, and CloudWatch**, reducing mean-time-to-resolution by **30%** through automated root-cause-analysis scripts written in **Python and SQL**.
- Supported **troubleshooting and root cause analysis for software-related issues** across interconnected systems; provided regular status reports and escalation of major issues to business areas and management, maintaining **SLA compliance of 98%+** for P1/P2 incidents across manufacturing and ERP domains.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
