PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Captured and documented institutional knowledge from enterprise banking clients by conducting structured interviews with process stakeholders; translated business requirements into **efficient, quality-controlled workflows** using **process mapping** and **root-cause analysis**, reducing manual intervention by **40%** across payments-operations teams.
- Analyzed client data and built **business cases** demonstrating platform value using **Excel, Power BI, and SQL** to measure productivity and efficiency gains; presented ROI analyses and KPI dashboards to senior stakeholders, securing buy-in for **8+ enterprise process implementations**.
- Became expert user of process documentation and workflow automation platforms; provided **live product demonstrations** to client stakeholders, identified **milestones, dependencies, and exception use cases**, and recommended **product enhancements** based on client feedback and usage patterns, contributing to **3 feature roadmap iterations**.
- Trained client stakeholders on effective use of enterprise platforms through comprehensive **user-friendly training materials, onboarding documentation, and live workshops**; achieved **95% platform adoption** across cross-functional teams and reduced support tickets by **35%** post-implementation.
- Collected and organized information from multiple sources—interviews, process logs, system configurations, and regulatory documents—to recommend **process improvements and standardization** across interconnected enterprise systems; prioritized **exception handling** and compliance workflows for banking and ERP environments.
- Managed end-to-end client engagements combining **process engineering, software implementation, and adoption support** in fast-paced, results-driven environments; coordinated **UAT, change management**, and post-go-live triage across multiple stakeholder groups, ensuring **on-time delivery** and measurable business outcomes.

SKILLS

Process Engineering & Business Analysis – process mapping, process improvement, institutional knowledge capture, stakeholder analysis, root-cause analysis, exception handling, process standardization, workflow optimization.

Business Case Development & Analytics – business case building, ROI analysis, KPI measurement, data interpretation, productivity analytics, efficiency metrics, Excel, Power BI, DAX.

Client Engagement & Training – user-facing consulting, live product demonstrations, training material development, onboarding documentation, stakeholder relationship management, cross-functional collaboration, UAT coordination.

Data & BI Tools – Power BI, Excel, SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy), Tableau, Power Query, data modelling.

Enterprise Systems & Integration – ERP integration, change management, system interconnectivity, REST APIs, configuration management, regulatory compliance (GDPR, PSD2), payments processing workflows (SEPA, ISO 20022).

Technical Stack – Python, SQL, AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git, Jira, Confluence, Linux, Docker.

Domain Expertise – Banking and financial services, payments operations, enterprise business systems, SWIFT messaging (MT/MX), ISO 20022 message flows, cross-border payments, Open Banking, regulatory frameworks.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Process Documentation & Workflow Optimization Platform (HCL Technologies)

- Led end-to-end capture and standardization of business processes across 3 large enterprise clients; conducted **25+ structured stakeholder interviews** to extract institutional knowledge from payments operations, ERP systems, and regulatory compliance workflows; translated findings into **60+ documented process flows** with clear **milestones, dependencies, and exception use cases**.
- Built **comprehensive business cases** using **Power BI dashboards** and **Excel analytics** demonstrating platform ROI; analyzed baseline metrics (manual cycle time, error rates, SLA compliance) and projected productivity gains across **150+ end-users**, achieving **€2.3M+ estimated annual value** across all implementations.
- Developed **user-friendly training materials** including **process guides, video walkthroughs, and interactive onboarding documentation**; delivered **12 live training workshops** to cross-functional teams (operations, compliance, management); achieved **92% platform adoption rate** within 6 weeks of go-live.
- Identified and recommended **4 product enhancements** based on client feedback loops—exception-handling automation, real-time compliance alerting, and mobile-friendly dashboards—contributing to 2 major product releases and increasing client satisfaction NPS by **18 points**.
- Managed post-implementation support and change coordination, conducting **UAT coordination** across interconnected ERP and payments systems; resolved **30+ stakeholder concerns** through iterative process refinement and regulatory compliance validation, ensuring **zero disruptions** to live operations.

SWIFT Payments Operations Dashboard & Regulatory Compliance Reporting (HCL Technologies)

- Supported production implementation of **SWIFT messaging dashboard** for major banking client, capturing real-time **transaction-flow visibility** and **operational alerting** across **ISO 20022 message flows**; analyzed payment operations workflows and mapped **SEPA / instant payment / cross-border payment** processes to system requirements.
- Built **Power BI operational dashboards** tracking SLA compliance, payment exception rates, and audit-trail integrity; developed **DAX measures** for regulatory reporting (GDPR, PSD2 compliance); enabled business stakeholders to measure **99.8% transaction success rate** and reduce **P1 incident response time by 45%**.
- Collaborated with banking-domain business analysts and compliance teams to document **change-control workflows** and **UAT protocols** for payment-system updates; trained **35+ operations staff** on **SWIFT message reconciliation** and **tokenization workflows**, ensuring **100% regulatory audit readiness**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
