PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported customers during online test sessions and offline ticket support across enterprise Java/.NET applications using **Splunk, CloudWatch, and Dynatrace** for application monitoring; diagnosed and resolved complex P1/P2 incidents with **root cause analysis** and documented solutions in Jira, achieving **99.5% SLA compliance**.
- Administered and debugged application issues on server domains using **SQL (PostgreSQL, MySQL, Oracle)** for data-level troubleshooting; performed **root cause assessment** of database-related failures and coordinated with development teams to implement fixes across interconnected enterprise systems, reducing mean-time-to-resolution by **40%**.
- Coordinated with UAT department and support teams during releases and deployments to staging and production environments; maintained expertise in application process flows, system configurations, and change-control procedures; assisted with post-deployment validation and provided technical updates to stakeholders on issue resolution status.
- Designed and maintained comprehensive documentation of application architecture, system integrations, and troubleshooting procedures; created training materials and runbooks for Level 2 support team; identified and recommended optimizations to improve application performance and system availability by **35%**.
- Performed complex problem-solving to diagnose and address application issues ranging from medium to high complexity using **Linux shell scripting, log analysis, and database queries**; proactively identified system bottlenecks and provided solutions with supporting technical reports for engineering and customer support departments.
- Demonstrated flexibility and rapid learning capability by mastering employer-specific software, enterprise business system configurations, and payment-operations dashboards; delivered consistent technical support across fast-paced, dynamic environment while maintaining excellent written and verbal communication with cross-functional teams and customers.

SKILLS

Test Support & Application Administration – customer test support, application troubleshooting, root cause analysis, incident response, SLA management, issue documentation and reporting.

Database & SQL – Microsoft SQL Server, PostgreSQL, MySQL, Oracle, SQL query optimization, schema analysis, data validation, database-level debugging.

Server & Infrastructure – server domain administration, application availability management, IT hardware and software knowledge, system configuration, Linux operations.

Cloud & Platforms – AWS (EC2, CloudWatch), Azure infrastructure, Docker containerization, application deployment and environment management.

Tools & Technologies – Postman (HTTP/S requests), Splunk, Dynatrace, CloudWatch, Jira, Confluence, Git, Jenkins, Microsoft IIS.

Technical Competencies – complex problem-solving, technical documentation, UAT coordination, change management, performance optimization, quick learning of new systems.

Communication & Customer Focus – written and verbal communication, stakeholder reporting, customer support coordination, cross-functional team collaboration, attention to detail, multitasking.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Application Test Support & Reliability Platform (HCL Technologies)

- Architected and deployed a **comprehensive test support environment** integrating customer-facing test sessions with offline ticket management systems; implemented **Splunk dashboards** to aggregate application logs, server metrics, and system performance data across Java/.NET enterprise services, reducing issue detection time by **50%**.
- Developed **SQL Server and Oracle diagnostic runbooks** enabling rapid root cause analysis of database-level failures; created **automated data validation queries** to verify application state consistency across production and staging; documented **12+ common failure scenarios** with step-by-step resolution procedures for Level 2 support team.
- Coordinated multi-environment release procedures with UAT and development teams; managed **change control workflows** for deployments to **Microsoft IIS servers** and cloud infrastructure (AWS EC2, Azure); tracked deployment quality metrics and resolved post-deployment issues, achieving **99.5% deployment success rate** across **8+ quarterly releases**.
- Implemented **Postman collections** for testing complex HTTP/S API integrations between interconnected enterprise systems; documented API contracts and request/response payloads; provided technical support to developers during integration troubleshooting, accelerating UAT cycle time by **25%**.
- Built performance optimization reports identifying bottlenecks in application throughput and server response times; provided actionable recommendations to engineering team that improved application availability by **35%** and reduced customer-reported issues by **42%** over a 6-month period.

SWIFT Payments Operations Monitoring & Issue Resolution Dashboard (HCL Technologies)

- Delivered test support and monitoring for a **SWIFT messaging and payments-operations dashboard** serving banking-domain customers; provided customer support during test sessions and offline ticket support for payment-message flow issues; maintained expert knowledge of **ISO 20022 message flows, SEPA/instant payments processing, and cross-border payment reconciliation** workflows.
- Performed root cause analysis on production payment-processing failures using **SQL queries across Oracle databases** storing transaction ledgers and SWIFT message audit trails; identified data integrity issues and coordinated with development teams on fixes ensuring **GDPR and regulatory compliance**; documented all issues and resolutions for regulatory audit purposes.
- Coordinated with UAT department and banking operations teams during release deployments to production; managed change-control procedures for payment-system configuration updates; provided post-go-live technical support and validated system behavior against banking-domain requirements, ensuring zero SLA breaches across **6 major releases**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
