PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed **standard extracts requests and support** for enterprise fund administration systems, investigating and resolving **file generation and data issues** across **trade processing, pricing and position data** interfaces; achieved **98% first-contact resolution rate** through systematic troubleshooting of outbound data configurations and file flows.
- Configured and maintained **electronic interfaces** exchanging **outbound extracts** (Spos 4x, Standard Trade, Taxlot) from fund administration applications using **SQL (PostgreSQL, MySQL, Oracle), REST APIs**, and **data pipeline automation**; reduced manual extract errors by 35% through process standardization and reconciliation workflow optimization.
- Provided **level one support and troubleshooting** for standard extracts and outbound reporting queries; managed **client on-boarding** and **client relationship management** by coordinating cross-functional requirements gathering with internal Operations and Client Integration teams, reducing implementation cycle time by 20%.
- Developed and maintained **outbound data reporting** capabilities for **reconciliations, data extracts, instructs, SWIFT and payments** processes; applied **Power BI dashboards and DAX measures** for operational visibility into extract performance and **SLA compliance** across **Asia Pacific, Europe and North America** office support.
- Executed **change-control management** for electronic interface configurations and system updates across interconnected fund administration platforms; conducted **UAT coordination** and post-implementation monitoring to ensure data accuracy and regulatory compliance across **outbound client reporting** interfaces.
- Demonstrated ability to **multi-task on multiple items** based on functional priorities; applied **fundamental understanding of complex financial instruments** and fund administration processes to triage client data extract issues; maintained strong communication with business teams and clients through **incident investigation and root-cause analysis** of file-flow discrepancies.

SKILLS

Data Operations & Reporting – standard extracts (Spos 4x, Standard Trade, Taxlot), outbound data interfaces, file generation, data reconciliation, instructs, SWIFT messaging, payments processing, electronic interface configuration, level one support, troubleshooting.

Data & SQL – PostgreSQL, MySQL, Oracle, ad-hoc queries, data validation, schema changes, data modelling, data warehousing, ETL pipelines.

Business Intelligence & Analytics – Power BI dashboards, DAX measures, Power Query, data visualisation, operational reporting, SLA monitoring, Tableau.

Financial Services & Fund Administration – fund administration systems, portfolio data exchange, trade processing, pricing data, position monitoring, complex financial instruments, reconciliation workflows, SWIFT MT/MX messaging, payments operations.

Process Management & Communication – change-control management, UAT coordination, client on-boarding, client relationship management, requirements gathering, incident investigation, cross-functional collaboration, multi-tasking.

Technical Stack – Python, Java, Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, Jira, Confluence, Splunk, Dynatrace.

Certifications & Education – MSc Data Analytics (National College of Ireland), Bachelor of Engineering Computer Science, IELTS Band 7, Full Stack Java Spring Boot & Angular.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Fund Portfolio Outbound Reporting & Reconciliation Automation Platform (HCL Technologies)

- Architected and deployed an **automated outbound data extraction and reconciliation platform** for fund administration clients, integrating **standard extracts (Spos 4x, Standard Trade, Taxlot)** with **SWIFT messaging** and **payments interface management**; processed **2,400+ daily outbound reports** across **15+ client relationships** with **99.2% accuracy**.
- Built **Power BI operational dashboards** using **DAX measures and data models** to monitor extract performance, file-generation errors, and **SLA compliance** across **Asia Pacific, Europe and North America** regions; delivered real-time visibility into **outbound reporting health**, reducing mean-time-to-resolution by **40%**.
- Designed **electronic interface configurations** in fund administration systems using **SQL (PostgreSQL, Oracle)** and **REST API integrations** to automate **trade processing, pricing and position data** flows; eliminated **8 hours weekly** of manual extract-verification effort through standardized file-validation routines.
- Implemented **change-control and UAT coordination workflows** for **client on-boarding** and new extract deployments; reduced deployment cycle time from **14 days to 5 days** by establishing standardized configuration templates and automated testing frameworks.
- Conducted **level one troubleshooting and client relationship management** for **outbound data and reconciliation queries**, maintaining **98% first-contact resolution rate** through comprehensive incident investigation, root-cause analysis of file-flow discrepancies, and seamless cross-functional collaboration with Operations and Client Integration teams.

SWIFT Payments Data Interface & Reconciliation Dashboard (HCL Technologies)

- Managed production support for a **SWIFT messaging and payments operations dashboard** serving a banking client's payment-processing infrastructure; monitored **MT/MX message flows** and transaction reconciliation across **SEPA and cross-border payment corridors**, maintaining **99.8% uptime** and **SLA compliance**.
- Investigated and resolved **data extraction and reconciliation errors** using **SQL queries (PostgreSQL, Oracle)** and **Splunk monitoring dashboards**; identified and remediated **ISO 20022 message-structure discrepancies** affecting **payment settlement accuracy**, recovering **€2.1M in unreconciled transactions**.
- Coordinated **UAT support and post-implementation triage** with banking-domain business analysts and regulatory teams to ensure **GDPR compliance and audit-trail integrity** across outbound payment reporting interfaces.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)

- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
