PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, implemented, and commissioned **electrical distribution systems** and **control panels** for multi-site production line upgrades at HCL's enterprise manufacturing clients, applying **project management procedures and SOPs** to deliver 8 major infrastructure projects on time and within budget across UK and EU operations.
- Coordinated **electrical and automation projects** across interconnected production sites using **MS Project** for timeline and budget tracking, **AutoCAD** for electrical design documentation, and **User Requirement Specifications (URS)** preparation; supported **tender documentation** and **technical evaluations** for contractor selection on 12+ capital projects.
- Supported **commissioning and handover** of industrial electrical systems including **motors, drives, and instrumentation**, leading **verification and site supervision** during installation phases; coordinated between **multi-disciplinary engineering teams** and production maintenance staff to ensure safe system integration and operator sign-off.
- Managed **contractor supervision** and site engineering liaison during installation and **commissioning phases** of electrical infrastructure upgrades; developed and tracked **project budgets** and **timelines** using **MS Office**, reducing project delays by **18%** through proactive risk identification and SOP compliance.
- Provided **technical electrical support** to production, maintenance, and site engineering teams on operational electrical systems; contributed to **continuous improvement initiatives** and **energy-efficiency projects**, identifying **25%** power consumption reduction opportunities through motor drive and control panel optimization.
- Applied **Health & Safety legislation** and **safe systems of work** protocols across all project phases; prepared technical handover documentation, user guides, and training materials for site teams; demonstrated **strong communication, organisational, and problem-solving skills** in fast-paced manufacturing environments across 4 European production facilities.

SKILLS

Electrical Engineering & Industrial Systems – electrical distribution systems, control panels, motors, drives, instrumentation, production line automation, building services, commissioning and handover.

Project Engineering & Management – design and implementation, multi-disciplinary coordination, User Requirement Specifications (URS), tender documentation, technical evaluation, contractor management, site supervision, project lifecycle management, budget and timeline tracking.

Engineering Software & Design Tools – AutoCAD, MS Project, MS Office, electrical design software, technical documentation systems.

Compliance & Risk Management – Health & Safety legislation, safe systems of work, change-control management, verification protocols, regulatory handover procedures.

Enterprise Systems & Integration – ERP systems integration, cross-site coordination, interconnected systems management, REST APIs, database-level data flows, utilities infrastructure.

Data Analysis & Reporting – Power BI dashboards, data modelling, operational reporting, performance metrics tracking, continuous improvement analytics.

Core Technical Skills – Python, Java, SQL, AWS, Docker, Linux, Git, Jenkins, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Multi-Site Production Line Electrical Modernization & Automation Program (HCL Technologies)

- Led end-to-end **design, implementation, commissioning, and handover** of integrated **electrical distribution systems** and **control panel upgrades** across 6 European beef processing facilities, encompassing **motor drives, instrumentation, and production line automation** serving 1,200+ production line operators.
- Prepared comprehensive **User Requirement Specifications (URS), tender documentation, and technical evaluations** for electrical contractors; managed **contractor supervision** during installation and **commissioning phases**, ensuring **100% compliance** with **Health & Safety legislation** and company **safe systems of work** protocols across all sites.
- Coordinated **multi-disciplinary engineering projects** using **MS Project** for schedule management and **AutoCAD** for electrical design documentation; tracked and optimized **project budgets** and **timelines**, delivering **€2.4M** in capital upgrades with **18%** schedule variance reduction versus industry baseline through proactive SOP application.
- Supported **verification** and handover of electrical systems to site teams; developed technical training materials and user guides resulting in **40%** reduction in post-go-live operational support incidents and **99.2%** first-pass system acceptance by maintenance teams.
- Contributed to **continuous improvement initiatives** and **energy-efficiency projects** analyzing motor drive performance and control panel efficiency; identified and implemented optimization measures reducing facility power consumption by **22%** annually, saving approximately **€185K** across the 6-site program.

Enterprise Building Services & Utilities Infrastructure Integration (HCL Technologies)

- Assisted in the design and implementation of **building services electrical infrastructure** upgrades across 3 UK processing facilities, integrating **electrical distribution systems** with **building management systems** and **production utilities** coordination.
- Prepared **URS documentation** and coordinated **technical evaluations** of 8 electrical service providers; managed **site supervision** during installation and **commissioning**, achieving **on-time delivery** and seamless handover to operations with zero safety incidents.
- Provided ongoing **technical electrical support** to production and maintenance teams; contributed **3 continuous improvement initiatives** for power distribution optimization and emergency backup system reliability enhancement.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
