PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **enterprise-grade network infrastructure** supporting 40+ banking clients, configuring **HPE Aruba switching platforms, Fortinet FortiGate firewalls, and wireless access points** with **NAC/ClearPass AAA frameworks** for secure authentication across SEPA and ISO 20022 payment-processing environments, achieving **99.95% network uptime SLA**.
- Led **root-cause analysis and remediation** of complex, high-impact network incidents escalated from helpdesk and TAC teams, implementing long-term resolution strategies using **network monitoring tools (Dynatrace, CloudWatch) and performance diagnostics** across wired and wireless infrastructure, reducing mean-time-to-resolution by **35%**.
- Orchestrated **firmware upgrades, maintenance windows, and infrastructure refresh activities** for 15+ customer network environments, coordinating cross-functional **change-control management** with VoIP, Managed Services, and Cybersecurity teams to ensure continuity of service and zero customer-impacting downtime during deployments.
- Produced detailed **technical reports and dashboards** on network health, performance trends, and incident outcomes for internal and external stakeholders using **Power BI and operational monitoring platforms**, translating complex infrastructure telemetry into actionable insights; supported **sales and account management** with solution design and pre-sales technical guidance for **Fortinet, Palo Alto, and Aruba** network platforms.
- Provided **technical leadership and mentoring** to junior network engineers on best-practice configuration, deployment, and lifecycle management of **enterprise networking technologies**; developed internal technical training materials and contributed to standards development and process-improvement initiatives, raising team diagnostic and troubleshooting capability by **40%**.
- Supported **after-hours critical infrastructure and customer-impacting event response roster**, maintaining availability for overtime during major project deployments; managed **Linux-based network administration (log analysis, shell scripting) and Git-based infrastructure-as-code workflows** to accelerate configuration repeatability and reduce deployment risk by **25%**.

SKILLS

Enterprise Networking Platforms – HPE Aruba switching, Fortinet FortiGate firewalls, Palo Alto firewalls, HPE Aruba wireless access points, Aruba ClearPass NAC/AAA.

Network Design & Architecture – Network strategy, capacity planning, segmentation, scalability, security design, wireless solutions, wired infrastructure.

Network Monitoring & Diagnostics – Network monitoring tools, performance analytics, troubleshooting (wired and wireless), root-cause analysis, incident response, SLA management.

Infrastructure & Operations – Firmware upgrades, maintenance windows, infrastructure refresh, change-control management, lifecycle management, customer-impacting event response.

Cloud & Systems – Microsoft Azure, AWS (EC2, S3, Lambda, CloudWatch), Linux administration, shell scripting, Docker containerisation.

Development & Documentation – REST APIs, Python, Java Spring Boot, Git, Jenkins CI/CD, technical documentation, Power BI reporting.

Soft Skills & Domain – Technical leadership, mentoring, troubleshooting, communication, customer service orientation, team collaboration, payments processing and financial-services regulatory compliance.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Network Infrastructure Modernisation & Security Segmentation Platform (HCL Technologies)

- Architected and deployed a **multi-site enterprise network modernisation programme** spanning 12 banking customer environments across Europe, migrating legacy switching infrastructure to **HPE Aruba fabric-based switching platforms and Fortinet FortiGate firewalls** with integrated NAC/ClearPass AAA authentication and VLAN segmentation strategies.
- Designed **network capacity planning and scalability roadmaps** aligned with customer growth projections, implementing **wireless access point (Aruba AP) deployments across 200+ locations** with zero-downtime failover and **99.97% availability guarantees** for payment-critical environments subject to GDPR and financial-services regulatory compliance.
- Developed **automated firmware upgrade and maintenance-window orchestration** using **infrastructure-as-code (Git, Python scripting, Linux shell automation)** to coordinate **change-control processes** across firewalls, switches, and wireless controllers; reduced manual intervention time by **60%** and eliminated 8 historically recurring misconfigurations.
- Implemented **network monitoring and health-reporting dashboards** using **Dynatrace and AWS CloudWatch** integrated with **Power BI executive reporting**, tracking performance trends, incident patterns, and SLA compliance across all customer network infrastructure; enabled proactive root-cause analysis reducing customer incident reports by **42%**.
- Led **cross-functional collaboration** with VoIP engineering and Cybersecurity teams to integrate **Palo Alto Advanced Threat Protection firewalls** and security controls into existing **HPE Aruba and Fortinet environments**, delivering integrated security-posture assessments and **customer pre-sales technical guidance** that contributed to **€2.3M contract wins**.

SWIFT Payments Operations Dashboard & Message-Flow Monitoring System (HCL Technologies)

- Built and maintained a production **SWIFT messaging and payments-operations dashboard** for a Tier-1 banking client, implementing real-time monitoring of **MT/MX message flows, ISO 20022 message structure validation, and transaction-flow visibility** across cross-border and SEPA instant-payment channels.
- Designed **operational alerting and SLA management frameworks** using **Splunk and CloudWatch** to detect payment-processing anomalies and route **P1/P2 incident escalations** to network and infrastructure teams; maintained **99.99% uptime SLA** on payments-critical infrastructure and reduced payment-settlement latency variance by **18%**.
- Collaborated with banking-domain business analysts, operations teams, and regulatory stakeholders on **UAT support and post-implementation triage**, translating GDPR and financial-services compliance requirements into operational monitoring and audit-trail logging across interconnected ERP and payment-processing systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
