## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Executed manual and exploratory testing for consumer-facing Java/Spring Boot and .NET PC applications, designing and maintaining comprehensive test cases based on requirements and functional specifications; conducted regression testing, smoke testing, and release validation across **40+ feature releases**, identifying and reporting **300+ defects** with detailed reproduction steps and root-cause analysis to support engineering investigation and resolution.
- Performed production support and quality assurance for enterprise client applications using **structured test documentation**, bug tracking workflows in **Jira**, and **CI/CD release validation** pipelines in **Jenkins**; maintained **99.2% test case pass rate** and coordinated **UAT activities** across cross-functional teams to ensure application stability and reliability at scale.
- Demonstrated attention to detail and quality-focused mindset by developing **Python automation scripts** for repetitive test execution, data validation, and smoke-test orchestration; reduced manual testing overhead by **35%** while maintaining comprehensive test coverage across assigned application areas and enabling gradual transition toward test automation ownership.
- Collaborated effectively within engineering and QA teams using **Confluence documentation** for test plans, defect summaries, and test-result reporting; participated in Agile/Scrum ceremonies to align on feature requirements, scope, and release timelines, ensuring clear communication of quality status and blockers to stakeholders.
- Supported Windows-based desktop application testing and quality assurance, validating user workflows, application behavior under various system configurations, and compatibility across Windows environments; leveraged **Linux** environments for log analysis and **shell scripting** to automate test-data setup and defect reproduction.
- Built foundational skills in test automation and scripting through experience with **Python** (pandas, NumPy for test-data analysis), **REST API** testing for application integrations, and basic **Docker** containerization concepts; demonstrated readiness to grow toward advanced SQA and automation engineering roles with structured learning mindset and technical depth.

## SKILLS

**Manual & Exploratory Testing** – test case design, test case execution, release validation, regression testing, smoke testing, defect reporting.

**QA Methodologies & Tools** – structured test documentation, bug tracking (Jira), test-result reporting, Confluence, Agile/Scrum QA workflows.

**Test Automation & Scripting** – Python (pandas, NumPy), shell scripting, REST API testing, data validation automation.

**Desktop Application Testing** – Windows-based PC applications, user workflow validation, system configuration testing, application behavior verification.

**Development & DevOps Tools** – CI/CD (Jenkins pipelines), Git, Docker containerization, Linux (log analysis, cron jobs).

**Languages & Data Stack** – Python, Java, SQL (PostgreSQL, MySQL, Oracle), Spring Boot.

**Enterprise & Domain Knowledge** – production support, monitoring (Splunk, CloudWatch, Dynatrace), AWS (EC2, S3, Lambda), change-control management, UAT coordination.

## EDUCATION AND TRAINING

|                                                                                                   |                |
|---------------------------------------------------------------------------------------------------|----------------|
| <b>MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin</b>                  | <b>02/2026</b> |
| <b>BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India</b> | <b>01/2021</b> |

## PROJECTS

### **PC Application Quality Validation & Test Automation Framework (HCL Technologies)**

- Designed and implemented a comprehensive **manual and exploratory testing framework** for a consumer-facing Windows-based PC application; created **250+ structured test cases** covering feature workflows, edge cases, and regression scenarios, resulting in **40% reduction in escaped defects** post-release and improving application stability across **50,000+ monthly active users**.
- Developed **Python automation scripts** using **pandas and NumPy** to generate test data, validate database state changes, and orchestrate smoke-test execution across **CI/CD Jenkins pipelines**; automated **80% of repetitive test execution**, reducing manual QA effort by **4 hours per sprint** while maintaining **99.5% test accuracy**.
- Established standardized **defect reporting workflows** in **Jira** with detailed reproduction steps, severity classification, and **REST API** test results; tracked **320+ quality metrics** across feature releases, enabling engineering teams to identify root causes and reduce mean-time-to-resolution by **25%**.
- Maintained comprehensive **test documentation in Confluence** including test plans, test-result summaries, and UAT handoff guides; collaborated with cross-functional engineering and BA teams in **Agile/Scrum ceremonies** to align on feature requirements and release readiness, achieving **100% release validation sign-off** on **8 major releases**.
- Transitioned QA process toward **test automation** by mentoring junior QA team members on **Python scripting** fundamentals and demonstrating growth path toward advanced SQA roles; documented automation best practices and established reusable test-harness patterns, positioning team for sustainable automation investment.

### **SWIFT Payments Dashboard Quality Assurance & Release Validation (HCL Technologies)**

- Executed comprehensive manual and exploratory testing for a mission-critical SWIFT messaging and payments-operations dashboard supporting a banking client; designed test cases validating **ISO 20022 message flows**, **SEPA instant payments**, and **cross-border payment** transaction visibility, ensuring **100% SLA compliance** and **zero production defects** across **40+ monthly releases**.
- Performed release validation and regression testing for production financial systems; leveraged **structured test documentation** and **Jira bug tracking** to report payment-processing defects with detailed transaction traces and audit-trail validation, supporting investigation and resolution within **SLA windows** for regulatory compliance and customer impact mitigation.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
