PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **SAP application support** and **end-to-end reliability management** for enterprise business systems across **ERP logistics modules**, coordinating with central and regional IT teams to deliver consistent services; managed **P1/P2 incident response** and SLA compliance, reducing production downtime by **18%** through proactive monitoring and cross-functional problem solving.
- Organized and delivered **user application training** sessions and **UAT coordination** for Supply Chain stakeholders, preparing comprehensive **training materials, user guides, and test case documentation** in collaboration with Key Users; ensured **system functionality validation** and smooth operational handover post-implementation across interconnected systems.
- Drove **IT project planning, coordination, and implementation** for enterprise system integrations using **REST APIs, SAP PO middleware, and database-level data flows** across **PostgreSQL, MySQL, and Oracle**; delivered **3+ major change-control initiatives** on time and within budget, adhering to defined quality standards and meeting agreed specifications for supply chain operations.
- Implemented **system change request management** and **project lifecycle governance** activities, supervising resource coordination across departments, locations, and external consultants; took direct responsibility for results and guaranteed **project closing, initial post go-live support, and seamless application management service takeover**, achieving **zero critical issues** in first 90 days post-deployment.
- Suggested **solutions and improvements** to application analysts based on user feedback and operational insights, contributing to continuous enhancement of Supply Chain applications; developed **operational effectiveness frameworks** using **Python automation scripts, SQL data validation, and Linux log analysis** to reduce manual effort by **35%** and improve process reliability.
- Collaborated with Supply Chain and IT teams to support **WMS operation, system integrations, and middleware platform (API, SAP PO) configuration**; applied knowledge of **supply chain and planning processes including forecasting, supply planning, S&OP, distribution, and replenishment** to validate system functionality and ensure alignment with business requirements.

SKILLS

SAP & ERP Platforms – SAP logistics modules (ECC), SAP S/4HANA, ERP integration support, WMS operation, supply chain modules.

Project Management & IT Leadership – IT project planning and delivery, supply chain project coordination, change-control management, UAT coordination, post go-live support, project lifecycle governance, system handover.

Application Support & Technical Expertise – application user support, incident management, system reliability, functional/reporting applications, middleware platforms (SAP PO, APIs), REST API integrations.

Supply Chain & Business Processes – forecasting, supply planning, S&OP, distribution and replenishment, WMS automation, supply chain operations, process optimization.

Data & Integration Technologies – SQL (PostgreSQL, MySQL, Oracle), Python scripting, REST APIs, data validation, ETL, database integrations, Linux.

Documentation & Training – user guides, training materials, test case documentation, meeting minutes, project updates, user requirements gathering, UAT support.

Soft Skills & Team Leadership – conscientiousness, operational effectiveness, organization, strong problem solving, interpersonal communication, proactivity, customer orientation, flexibility, teamworking.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

SAP S/4HANA Supply Chain Migration & WMS Integration Platform (HCL Technologies)

- Architected and executed **end-to-end SAP ECC to S/4HANA migration** for a multinational supply chain client, coordinating **logistics modules, WMS operation, and middleware platform (SAP PO API) configuration** across 12 regional distribution centers; managed **project closure and initial post go-live support**, ensuring zero critical incidents in first 120 days with **99.8% system uptime**.
- Developed comprehensive **user training program and documentation** including operational manuals, test case libraries, and user requirements specifications for **forecasting, supply planning, S&OP, and replenishment processes**; coordinated **UAT sessions** with 40+ Key Users across international locations, validating **system functionality** and capturing **50+ change requests** resolved pre-go-live.
- Led **IT project planning and resource coordination** across central IT, regional teams, and external SAP consultants; implemented **change-control governance framework**, tracked **15+ work streams** simultaneously, and delivered **3 phased releases** totaling **€2.1M investment** on schedule and within budget; drove **continuous improvement suggestions** to application analysts, reducing manual supply chain operations by **40%**.
- Designed and deployed **WMS automation and integration architecture** leveraging **REST APIs and SAP PO middleware** to connect warehouse management systems with **PostgreSQL and Oracle backend databases**; automated **supply planning workflows and distribution replenishment processes** using **Python scripting and SQL data validation**, accelerating order fulfillment cycle by **32%** across the supply chain.

Enterprise Business System Reliability & Change Management Framework (HCL Technologies)

- Established **application support processes and SLA management** for interconnected ERP systems, ensuring **strong coordination with central and regional Information System & Technology teams**; implemented **incident response protocols** reducing **P1/P2 resolution time by 22%** and achieving **99.5% service availability** across production supply chain operations.
- Created **comprehensive documentation framework** for system change requests, project updates, and user requirements; collaborated with Key Users and business analysts to produce **UAT test cases, training manuals, and operational guides**; organized and verified **user application training delivery** ensuring smooth transition for **200+ supply chain users** across multiple regions and departments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
