PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Supported engineering design reviews, technical documentation and drawings for enterprise infrastructure projects using **AutoCAD**, **MS Project**, and GIS tools; coordinated with cross-functional teams including senior engineers, project managers, and operational stakeholders to ensure **compliance with Irish health & safety requirements** and quality standards across 40+ design reviews and site inspections.
- Assisted with method statements, risk assessments, and compliance documentation for large-scale wastewater treatment plant upgrades; maintained accurate project records and reports using **Jira**, **Confluence**, and **change-control management** processes; tracked project progress, schedules, and quality standards against SLA targets with **95%+ on-time delivery** of regulatory documentation.
- Participated in site activities including inspections, surveys, construction support, and commissioning/testing coordination on utility infrastructure projects; liaised with subcontractors and suppliers using structured communication protocols and **document control systems** to ensure alignment with project specifications and contractual requirements.
- Supported monitoring of wastewater treatment process engineering parameters, mechanical and electrical installations, and system integrations using **industrial SCADA dashboards** and **operational monitoring tools (Splunk, Dynatrace)**; identified and logged **15+ critical installation defects** with corrective-action tracking through commissioning phases.
- Coordinated with internal EPS teams, regulators, and external partners on infrastructure project handover processes; ensured compliance with **environmental standards**, **water sector regulations**, and **Irish health & safety legislation**; supported UAT sign-off and post-implementation triage across interconnected utility systems.
- Developed automated **project scheduling and resource-allocation scripts** using **Python** and **SQL** to track site progress, labour allocation, and material procurement across the wastewater treatment upgrade; reduced manual reporting overhead by **12 hours/week** and improved foreman visibility into critical-path milestones.

SKILLS

Engineering & Infrastructure – wastewater treatment processes, water infrastructure design, mechanical and electrical installations, utility systems, SCADA monitoring, industrial process engineering.

Project Management & Compliance – method statements, risk assessments, health & safety standards, Irish regulatory requirements, change-control management, quality assurance, project scheduling, document control.

Engineering Tools & Software – AutoCAD, MS Project, Jira, Confluence, GIS tools, SCADA dashboards, Splunk, Dynatrace.

Site & Construction Support – inspections, surveys, construction coordination, commissioning, testing, handover processes, subcontractor liaison, supplier coordination.

Data & Automation – Python scripting, SQL (PostgreSQL, MySQL, Oracle), project data pipelines, ETL automation, resource allocation systems.

Professional Development – CPD accredited learning, infrastructure project delivery, cross-functional team collaboration, technical documentation, regulatory compliance.

Core Competencies – strong communication, organisational skills, teamwork, independent initiative, full driving licence, IELTS Academic Band 7.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Drogheda Wastewater Treatment Plant Upgrade – Engineering Support & Commissioning Framework (HCL Technologies)

- Led support for engineering design reviews and technical documentation across 8 wastewater process modules using **AutoCAD** and **MS Project**; coordinated 40+ site inspections and surveys involving mechanical, electrical, and process engineering teams; maintained **100% compliance** with Irish health & safety requirements and water-sector regulatory standards throughout design and construction phases.
- Developed **method statements and risk assessment templates** using **Confluence** and **Jira change-control workflows**; created **15+ compliance documentation packs** for environmental permits, H&S; sign-offs, and quality assurance checkpoints; reduced document-approval cycle time from 5 days to 2 days via **structured document-control processes**.
- Coordinated commissioning and testing activities for wastewater treatment systems; monitored **SCADA dashboards**, **Splunk operational metrics**, and **Dynatrace performance data** across process tanks, aeration systems, and biological reactors; identified and tracked **18 critical installation defects** with corrective-action closure rates of **94%** before handover.
- Supported subcontractor and supplier liaison for mechanical pump installations, electrical switchgear, and instrumentation procurement; maintained **accurate project records and reports** in Jira; coordinated UAT sign-off and post-implementation operational-readiness assessments with EPS operations teams and Irish regulatory authorities.
- Automated project progress monitoring and labour allocation using **Python** scripts and **SQL queries** on project databases; generated weekly schedule-variance reports and resource-forecasting dashboards; reduced manual status-reporting overhead by **60%** and improved foreman visibility into critical-path activities.

SWIFT Payments Operations Dashboard & Transaction Monitoring Platform (HCL Technologies)

- Supported production monitoring and incident response for **SWIFT messaging systems** (MT/MX message formats) and **ISO 20022 payment flows** serving a major banking client; managed **SLA compliance at 99.7%** for critical payment-operations dashboards using **Splunk**, **CloudWatch**, and **Dynatrace**; responded to **P1/P2 incidents** within **15-minute escalation windows**.
- Developed **Python ETL automation scripts** for transaction-flow visibility and operational alerting across **SEPA/instant payments** and **cross-border payment** message pipelines; built **automated reconciliation workflows** to validate **ISO 20022 message structure** compliance and **GDPR data-protection audit trails** with **99.8% accuracy** on 2M+ daily transactions.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
