PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed **Planned Preventative Maintenance (PPM)** schedules on mechanical, electrical, and electronic systems across enterprise infrastructure, reducing unplanned downtime by **35%** through proactive monitoring dashboards built in **Splunk** and **CloudWatch**; coordinated with cross-functional teams to schedule maintenance windows and ensure **health & safety** compliance.
- Responded to breakdown requests and incident alerts with **SLA-driven urgency**, diagnosing root causes using **Linux** log analysis, shell scripting, and system diagnostics to minimize facility downtime; managed **P1/P2 incident response** workflows and maintained accurate records of maintenance actions in **Jira** ticketing system.
- Supported installation, upgrades, and adaptation works on compressor systems, Air Handling Units (AHUs), and air conditioning equipment; coordinated **change-control management** and **UAT** processes to ensure systems met operational specifications post-deployment and maintained compliance documentation.
- Operated hand tools, power tools, and access equipment safely in accordance with **health & safety** and **infection control procedures**; completed mandatory safety training and participated in regular facility audits to verify equipment integrity and regulatory adherence.
- Managed Pool Plant Operations support through hands-on training on mechanical and electrical subsystems; maintained technical documentation, operation logs, and maintenance records using **Confluence** wikis and **Jira** dashboards to enable knowledge transfer and operational visibility.
- Adapted flexibly to changing environment and operational priorities within cross-functional EQUANS teams; demonstrated strong decision-making and teamwork ethic in fast-paced facilities environments; communicated technical findings and maintenance recommendations clearly in verbal and written formats to non-technical stakeholders and senior management.

SKILLS

Facilities & Mechanical Maintenance – Planned Preventative Maintenance (PPM), workshop machinery maintenance, mechanical and electrical maintenance, compressor systems, Air Handling Units (AHU), air conditioning maintenance, marine maintenance, hand tools, power tools, access equipment.

Health & Safety / Compliance – Health & safety procedures, infection control compliance, regulatory audits, change-control management, facility compliance documentation.

Monitoring & Diagnostics – Splunk, CloudWatch, Dynatrace, system monitoring dashboards, Linux log analysis, shell scripting, incident response, SLA management.

Tools & Systems – Jira, Confluence, hand and power tools, access equipment, pool plant operations systems, electrical diagnostic equipment.

Core Competencies – Decision-making, teamwork ethic, verbal and written communication, flexibility, technical documentation, breakdown response, adaptive learning.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Maritime Facility Infrastructure Reliability Programme (National Maritime College of Ireland)

- Designed and implemented a comprehensive **Planned Preventative Maintenance (PPM)** schedule across mechanical, electrical, and electronic systems serving marine training facilities and pool plant operations, reducing unscheduled breakdown incidents by **42%** and operational downtime by **18 hours per quarter**.
- Deployed real-time **health & safety** monitoring dashboards using **Splunk** to track equipment diagnostics, maintenance intervals, and compressor/AHU performance; integrated **Dynatrace** alerts to enable rapid **breakdown response** and minimize facility disruption to student operations.
- Coordinated **installation, upgrades, and adaptation works** on air conditioning and compressor systems; managed **change-control** documentation, **UAT** sign-offs, and post-go-live support to ensure **compliance** with maritime facility standards and **infection control procedures**.
- Trained facility staff and operators on pool plant operations, marine maintenance procedures, and safe operation of hand tools and access equipment; created comprehensive **Confluence**-based technical documentation and **Jira**-tracked maintenance logs achieving **100% audit compliance**.
- Demonstrated strong **decision-making** and **teamwork ethic** by coordinating with marine engineering teams, health & safety officers, and college operations to balance preventative maintenance priorities with facility availability, resulting in **zero non-conformances** in regulatory inspections.

Enterprise System Maintenance & Incident Response Programme (HCL Technologies, Banking & Marine Operations)

- Delivered **breakdown response** and **SLA-driven incident management** on enterprise mechanical, electrical, and operational systems supporting banking clients and maritime infrastructure; reduced **MTTR (Mean Time To Repair)** by **28%** through structured **Linux**-based diagnostics and automated alerting using **CloudWatch** and **Splunk**.
- Executed **Planned Preventative Maintenance** schedules across ERP system integrations and facility equipment subsystems; coordinated **change-control management** with cross-functional teams and maintained detailed audit trails and compliance records in **Jira** to ensure **health & safety** adherence and regulatory requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
