PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and operated **high-scale backend applications** using **Java Spring Boot** and **Python**, building **REST APIs** and microservices with focus on **operational excellence, security, and scalability**; deployed to **AWS (EC2, S3, Lambda)** environments using **Docker** containerization and **CI/CD pipelines (Jenkins)**, achieving **99.5% SLA compliance** across production systems.
- Performed **general application development activities** including **unit testing, code deployment to development environments**, and **technical documentation**; diagnosed and resolved **performance issues** using **Splunk, CloudWatch, and Dynatrace** monitoring tools, reducing incident resolution time by **40%** and enabling rapid triage of product and system issues.
- Applied **modern software development practices** including **serverless computing, microservices architecture, CI/CD, and infrastructure-as-code**; participated in **technology roadmap and architecture discussions** to integrate systems with existing internal platforms, working across **Agile/Scrum teams** to translate business requirements into scalable solutions.
- Contributed to **frontend and UI layer development** using **Angular, HTML, CSS, and JavaScript**; built and debugged code in **mainstream open source technologies**, implementing responsive user interfaces and integrating with backend services via **REST APIs** to deliver end-to-end feature completeness.
- Implemented **software testing, performance, and quality engineering techniques** across the full development lifecycle; executed **unit testing** with **JUnit**, performed **automated testing** using **Selenium**, and conducted **performance analysis** using **CloudWatch** and **Dynatrace**, ensuring code quality and reliability in production deployments.
- Led **source code control management** using **Git** and **Github**, managed **build tools (Maven, Gradle)** for software build management, and participated in **estimation, use case specifications, and test plan reviews**; worked with **relational databases (PostgreSQL, MySQL, Oracle)** and **Atlassian tooling (JIRA, Confluence)** to document code and processes enabling team collaboration across unfamiliar codebases.

SKILLS

Backend Development – Java, Spring Boot, Python, REST APIs, microservices architecture, serverless computing.

Frontend & Web Development – Angular, JavaScript, HTML, CSS, Bootstrap, UI layer development.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins), infrastructure-as-code, modern JDK (v1.7+).

Databases & Data Management – PostgreSQL, MySQL, Oracle, relational database design, SQL.

Software Quality & Testing – JUnit, Selenium, automated testing, unit testing, performance testing, LoadRunner, SoapUI.

Build & DevOps Tools – Maven, Gradle, Git, Github, Jenkins, JIRA, Confluence.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, performance diagnostics, incident triage.

EDUCATION AND TRAINING

PROJECTS

Full-Stack Payment Processing & Intelligence Platform (HCL Technologies)

- Architected and developed a **high-scale backend microservices platform** using **Java Spring Boot** and **Python** to process and monitor cross-border payment flows; deployed on **AWS (EC2, Lambda, S3)** with **Docker** containerization and **Maven**-based build automation, handling **50,000+ daily transactions** with **sub-second latency**.
- Built a **responsive Angular and HTML/CSS frontend dashboard** integrated with backend **REST APIs**, enabling real-time visibility into payment operations, transaction reconciliation, and SLA metrics; implemented **Bootstrap**-based UI components with dynamic data binding, reducing operational query time by **65%**.
- Implemented **automated testing** using **JUnit** and **Selenium** across the full stack; executed **performance testing** with **LoadRunner** to validate throughput under peak load, and applied **SoapUI** for API contract testing, achieving **95%+ code coverage** and **99.9% uptime** in production.
- Integrated with **relational databases (PostgreSQL, Oracle)** for transaction logging, reconciliation, and audit trails; designed normalized schemas and optimized queries to support regulatory compliance and cross-system data flows across payment, ERP, and settlement systems.
- Applied **CI/CD pipelines (Jenkins)** with **Git-based source control** and **Maven** builds to automate deployment to **development and production AWS environments**; used **CloudWatch** and **Dynatrace** for continuous monitoring, enabling **incident resolution within 15 minutes** of detection.

Enterprise System Integration & Change Management Framework (HCL Technologies)

- Designed and maintained **microservices integrations** connecting internal systems, ERP platforms, and data infrastructure via **REST APIs** and database-level data flows; collaborated across engineering teams to implement **infrastructure-as-code** patterns and **CI/CD automation**, reducing integration deployment cycles from **2 weeks to 3 days**.
- Documented all code, architectural decisions, and operational runbooks in **Confluence** to enable rapid onboarding and knowledge transfer; tracked change requests, defects, and sprint work using **JIRA**, and led **Agile/Scrum ceremonies** to prioritize backlog and identify technical risks.
- Performed triage and debugging of complex system issues across **Java/Spring Boot, Python, and SQL** components; diagnosed root causes using **Splunk** and **CloudWatch logs**, resolved integration failures between interconnected systems, and validated fixes through **automated testing (JUnit, Selenium)** prior to production release.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
