PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and built secure, scalable Microsoft-based infrastructure solutions across Windows Server 2019/2022 environments and Active Directory implementations, supporting **99.95% uptime SLAs** in a 24x7 mission-critical enterprise operations context; implemented Group Policy security baselines and networking configurations aligned with cyber security hardening standards.
- Managed vulnerability remediation and security patching processes for production systems using **CloudWatch and Dynatrace** monitoring; coordinated cross-functional remediation workflows with application teams and security stakeholders, reducing critical vulnerability resolution time by **40%** and ensuring compliance with organisational security requirements.
- Developed and tested fail-over and resilience strategies for high-availability, disaster recovery solutions across interconnected enterprise systems; automated failover testing and backup validation using **Python scripting and REST API integrations**, improving recovery time objective (RTO) accuracy by **35%**.
- Functioned as technical lead for Cyber Security infrastructure initiatives within ITIL structured process environments; produced high-quality documentation supporting audit trails, change-control records, and regulatory compliance requirements; mentored junior support staff through infrastructure change implementation and incident escalation procedures.
- Performed system administration and operational maintenance across complex enterprise environments including ERP platforms and business-critical applications; implemented configuration management and change-control procedures that reduced unplanned downtime by **30%** and improved system health monitoring via comprehensive operational dashboards.
- Collaborated with application teams and security project leads to ensure infrastructure integrations were secure, efficient, and performant; supported UAT coordination and post-implementation triage for cyber security initiatives; identified and recommended improvements to operational processes and security procedures across interconnected systems.

SKILLS

Microsoft Infrastructure & Security – Windows Server 2019/2022/2025, Active Directory, Group Policy, networking concepts, security best practices, vulnerability remediation, security patching, high-availability infrastructure, disaster recovery solutions.

Infrastructure & Monitoring Technologies – CloudWatch, Dynatrace, Splunk, backup strategies, system health monitoring, SLA management, change-control management, incident response, escalation support.

Automation & Integration – Python scripting, REST API integrations, automation frameworks, system administration automation, infrastructure-as-code principles.

Enterprise Systems & Process – ITIL process environments, ERP platform support, enterprise business systems, change management, configuration management, documentation for audits and compliance.

Database & Linux Administration – PostgreSQL, MySQL, Oracle, Linux environments, shell scripting, log analysis, system configuration.

Development & DevOps Fundamentals – Java Spring Boot, Git, Jenkins CI/CD pipelines, Docker containerisation, code review practices.

Data & Business Intelligence – Power BI dashboards, Tableau, SQL data querying, data modelling, operational reporting.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Cyber Security Infrastructure Hardening & High-Availability Platform (HCL Technologies)

- Architected and implemented a secure, resilient Microsoft Windows Server infrastructure spanning **200+ mission-critical systems** across Active Directory domains; deployed standardised Group Policy security baselines, reducing non-compliance findings by **92%** and aligning infrastructure with NIST cyber security standards.
- Designed and deployed automated vulnerability remediation and security patching orchestration using **Python automation scripts** and **REST API integrations** with CloudWatch and Dynatrace; reduced critical vulnerability mean-time-to-remediation (MTTR) from **72 hours to 18 hours** while maintaining operational stability.
- Implemented comprehensive disaster recovery and fail-over testing framework for **15 critical business applications**; developed automated failover validation pipelines and documented recovery procedures; achieved **99.95% RTO accuracy** and reduced manual testing effort by **65%**.
- Produced detailed compliance and audit documentation supporting regulatory requirements and change-control audits; implemented ITIL-aligned change management procedures across cyber security infrastructure initiatives; supported **40+ major infrastructure changes** with zero security-related rollbacks.
- Mentored **4 junior infrastructure engineers** on Microsoft infrastructure administration, incident escalation, and security hardening practices; provided technical escalation support for **150+ complex infrastructure incidents**, achieving first-contact resolution rate of **68%**.

Banking Payment Systems Infrastructure & Secure Integration Platform (HCL Technologies)

- Supported and maintained secure, production infrastructure for SWIFT messaging and payments operations dashboard supporting **10,000+ daily payment transactions**; implemented monitoring and alerting for payment message flows, transaction-flow visibility, and SLA compliance in a regulated banking environment.
- Collaborated with banking-domain operations teams and compliance stakeholders to ensure infrastructure security alignment with GDPR, PSD2, ISO 20022 message structure standards, and cross-border payments regulatory frameworks; documented security controls and audit trails for regulatory audits.
- Integrated enterprise systems including ERP modules and operational platforms via **REST APIs and database-level data flows** across PostgreSQL and Oracle; implemented change-control management for system configuration updates and post-go-live stability, supporting **SEPA and instant payments** processing workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
