PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed and maintained operational reliability of enterprise systems and infrastructure at HCL Technologies, performing daily preventative maintenance checks, conducting stock audits, and ordering replacement components to ensure **100% uptime** and zero unplanned downtime across production environments supporting 500+ concurrent users.
- Executed weekly status reporting and operational dashboards using **Power BI** and **Splunk**, consolidating system health metrics, incident logs, and maintenance records into executive-ready reports delivered to clients and IT leadership, improving visibility into operational performance by **40%**.
- Provided flexible facilities and administrative support across multiple departments, assisting with post room operations including document preparation, courier coordination, mail distribution, and multi-tasking across customer-facing requests while maintaining **98% task completion** on daily work orders.
- Demonstrated reliability and punctuality in production support rotations covering **24/7 on-call duties**, responding to P1/P2 incidents within SLA windows, troubleshooting hardware and software issues, and covering for team members during absences with zero escalations or missed handovers.
- Developed strong communication and people skills through cross-functional collaboration with banking operations teams, business analysts, and client-facing stakeholders during change-control windows, UAT coordination, and post-implementation support, delivering **95% customer satisfaction** in support surveys.
- Supported enterprise business systems and ERP integrations at HCL, managing configuration changes, coordinating system testing cycles, and providing helpdesk assistance to end-users, ensuring smooth daily operations and reducing system downtime incidents by **35%** through proactive troubleshooting.

SKILLS

IT & Facilities Operations – printer management and maintenance, preventative maintenance (PM), stock checks and inventory ordering, facilities support, post room administration, binding, laminating, franking, courier coordination.

Operational Reporting & Dashboards – Power BI dashboards, Splunk operational monitoring, weekly status reporting, system health metrics, incident tracking, CloudWatch alerting.

Customer Service & Communications – client-facing support, cross-functional collaboration, stakeholder management, incident communication, user helpdesk support, people skills.

Reliability & Change Management – SLA management, P1/P2 incident response, on-call support, change-control management, UAT coordination, post-implementation support.

Enterprise Systems – ERP integration support, business systems administration, configuration management, system troubleshooting, helpdesk ticketing (Jira), infrastructure support.

Technical Foundation – Linux administration, log analysis, shell scripting, basic networking, Docker containerisation, Git, CI/CD pipeline awareness, SQL database basics.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Onsite Print & Facilities Operations Consolidation Platform (HCL Technologies)

- Architected and deployed a centralised **print device management and preventative maintenance scheduling system** using Power BI dashboards and automated **Python scheduling scripts**, consolidating toner inventory, parts ordering, and equipment health across 40+ multifunction printer devices across a 5-floor office facility.
- Developed **weekly automated status reporting** using **Power Query ETL pipelines** integrating Splunk incident logs, CloudWatch alerts, and manual inspection checklists, reducing manual report compilation time by **80%** (from 3 hours to 40 minutes per week) and ensuring 100% SLA compliance visibility for client management.
- Implemented post room workflow optimisation and tracking system using **Jira ticketing** and **Confluence documentation**, standardising binding, laminating, franking, and courier booking procedures across 8 facility staff, reducing mail processing time by **25%** and courier booking errors by **60%**.
- Established on-call coverage rotation and incident escalation protocols, covering Post Room Manager duties during absences (annual and sick leave), ensuring zero disruption to facility operations and **100% service continuity** across all printer, mail, and administrative support functions.
- Created comprehensive training materials and operational playbooks in **Confluence** documenting daily pre-arrival device checks, maintenance procedures, toner ordering workflows, and post room processes, enabling new facility staff to reach operational independence in **2 weeks** versus prior 6-week onboarding cycle.

Enterprise Production Support & Infrastructure Reliability Dashboard (HCL Technologies)

- Led production support monitoring and incident response operations for enterprise banking systems, designing **Power BI operational dashboards** and **Splunk alert rules** tracking system uptime, printer device health, facility equipment status, and SLA compliance metrics, reducing mean time to incident resolution by **45%**.
- Managed daily preventative maintenance schedules and stock inventory tracking using **Python automation scripts** and **SQL database queries**, coordinating parts ordering cycles and conducting weekly device inspections across 40+ multifunction printers, achieving **99.5% device availability** before daily staff arrival windows.
- Delivered flexible facilities support and administrative coverage across multiple business units, providing helpdesk assistance to 500+ end-users, managing print job queues, and covering absence periods for operations teams, maintaining **98% uptime** on critical facility services including mail and document handling systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
