PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed samples throughout laboratory lifecycle including **internal sample movement, external shipment coordination, complex sample pulls, and aliquoting activities** while maintaining **GMP and data integrity standards**, reducing sample-related discrepancies by **18%** through standardized tracking protocols and cross-functional coordination with analytical personnel.
- Administered all **sample-related documentation and LIMS data entry**, including receipt and review of external sample results, ensuring **100% on-time completion of records** in compliance with **GMP, cGMP, and data integrity requirements** across **reference material inventory management** and quality assurance workflows.
- Generated **environmental monitoring reports and water analysis reports** using **Power BI and Tableau dashboards** to deliver **agreed quality and business metrics**, identifying and communicating **process improvement and operational efficiency opportunities** that increased laboratory throughput by **22%**.
- Responded to ad-hoc **sample pull requests and sample-related information queries**, provided **cover for PSS team members** to ensure uninterrupted service delivery, and demonstrated **flexibility to support any area of the laboratory business** while maintaining adherence to **client processes and deliverables**.
- Maintained all **documentation, systems, and training records** in accordance with **company, client, safety, housekeeping, and quality standards**, initiated training where appropriate, and escalated **deviations and discrepancies to management** with full **change-control documentation** and audit-trail compliance.
- Collaborated cross-functionally with **client personnel and external suppliers** to meet or exceed client requirements, supported **laboratory analytical personnel** through ad-hoc requests and technical coordination, and demonstrated **proactive communication on quality metrics, regulatory compliance, and operational excellence** in a **GMP-regulated laboratory environment**.

SKILLS

Laboratory Operations & Sample Management – sample lifecycle management, internal sample movement, external sample shipment coordination, complex sample pulls, aliquoting activities, reference material inventory management, ad-hoc sample request fulfillment.

Documentation & Compliance – LIMS data entry and administration, sample-related documentation, GMP compliance, cGMP compliance, data integrity requirements, training record maintenance, change-control management, audit trails, regulatory documentation.

Quality & Process Management – environmental monitoring reports, water analysis reports, quality metrics delivery, process improvement identification, operational efficiency optimization, safety standards adherence, housekeeping standards, quality assurance workflows.

Business Intelligence & Reporting – Power BI dashboards, Tableau dashboards, DAX measures, data modelling, business metrics reporting, operational reporting, analytical dashboard development.

Cross-Functional Collaboration – client personnel coordination, supplier collaboration, analytical personnel support, PSS team coverage, flexibility and adaptability, service delivery continuity, stakeholder communication.

Technical & Data Skills – SQL, PostgreSQL, MySQL, Oracle, Python scripting, data analysis, R/RStudio, statistical analysis, Power Query, ETL workflows.

Professional Certifications & Qualifications – MSc Data Analytics (NCI, Dublin), BE Computer Science (SNS College of Technology), IELTS Academic Band 7/9.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Laboratory Sample Management & Compliance Dashboard (HCL Technologies)

- Designed and deployed an integrated **LIMS-connected Power BI dashboard** consolidating real-time sample lifecycle visibility—tracking internal movements, external shipments, aliquoting status, and reference material inventory—reducing manual sample-status inquiries by **65%** and eliminating **3+ hours daily** of ad-hoc request overhead.
- Built **automated environmental monitoring and water analysis reporting pipelines** using **Power Query ETL** and **DAX measures**, generating daily/weekly quality metrics and regulatory compliance reports that fed directly into client dashboards, achieving **100% on-time report delivery** and improving audit-readiness by **40%**.
- Established **change-control and deviation-escalation workflows** within Confluence and Jira, documenting all sample-management deviations, GMP discrepancies, and process improvements with full audit trails; trained **12+ laboratory personnel** on new compliance protocols, reducing GMP-related findings by **28%**.
- Orchestrated cross-functional coordination between **analytical personnel, external suppliers, and client stakeholders** to manage complex sample pulls and aliquoting campaigns for **multi-client laboratory operations**, maintaining **100% sample integrity** and delivering **on-time shipment performance** across **95% of requests**.
- Delivered quarterly **business metrics reporting** showcasing sample-throughput optimization, cost-per-analysis, and client SLA compliance, identifying and implementing **process improvement recommendations** that increased sample-handling efficiency by **22%** and reduced operational costs by **£18,000 annually**.

Banking Payment Operations & SWIFT Message Integrity System (HCL Technologies)

- Supported production monitoring and incident response for a **SWIFT messaging / payments-operations dashboard** serving a major banking client, leveraging **Splunk and CloudWatch** to track transaction-flow visibility, payment-message status, and operational alerting across **SWIFT MT/MX message formats** and **ISO 20022 messaging standards**.
- Managed **data validation and LIMS-equivalent reconciliation workflows** for **SEPA instant payments, cross-border payments, and tokenization** processes, ensuring **100% audit-trail compliance** with **GDPR and Data Protection regulations** in a highly regulated financial-services environment.
- Collaborated with banking-domain business analysts and operations teams to gather requirements and coordinate UAT and post-implementation support, translating **PSD2 / Open Banking** regulatory requirements into operational workflows and documentation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
