PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed samples throughout laboratory lifecycle including internal sample movement, external shipment coordination, complex sample pulls, and aliquoting activities using **LIMS systems** and **GMP-compliant documentation**, ensuring **100% accuracy** in sample-related records and **zero data integrity deviations** across production support workflows.
- Administered sample-related documentation by receiving, reviewing, and accurately entering external sample results onto **LIMS**, maintaining legible and timely completion of all records in line with **GMP and data integrity requirements**, supporting **20+ analytical personnel** with daily sample-pull requests and ad-hoc information queries.
- Generated environmental monitoring and water analysis reports using **Power BI dashboards** and **SQL data retrieval**, delivering agreed quality and business metrics with **95%+ on-time delivery** and proactively identifying process improvements that reduced sample-processing turnaround by **18%**.
- Managed reference material inventory throughout the laboratory lifecycle, coordinating storage, tracking, and depletion workflows while maintaining **audit-trail compliance** and **regulatory documentation** aligned with company, client, safety, and quality standards.
- Responded to ad-hoc requests for sample pulls and sample-related information, provided operational cover for other PSS team members, and ensured uninterrupted service delivery through flexible cross-functional collaboration with client personnel and suppliers to exceed client requirements and deliverables.
- Maintained all documentation, systems, and training records in accordance with company, client, safety, housekeeping, and quality standards, initiated training where appropriate, and escalated deviations or discrepancies to management—leveraging **change-control expertise** and **UAT coordination** from enterprise business-systems support to ensure **zero compliance gaps**.

SKILLS

Sample Management & Laboratory Operations – sample lifecycle management, internal sample movement, external shipment coordination, complex sample pulls, aliquoting activities, reference material inventory management, ad-hoc sample pull requests.

LIMS & Laboratory Information Systems – LIMS administration, sample result entry, documentation management, data integrity compliance, audit-trail maintenance, GMP-compliant record-keeping.

Environmental Monitoring & Water Analysis – environmental monitoring reports, water analysis reporting, quality metrics, business metrics, process optimisation, operational efficiency.

Quality, Compliance & Data Integrity – GMP compliance, data integrity requirements, regulatory documentation, change-control management, UAT support, cGMP standards, post-implementation triage.

BI & Reporting – Power BI dashboards, SQL data retrieval, metric delivery, reporting automation, data modelling.

Cross-Functional Collaboration & Operations – client personnel coordination, supplier engagement, PSS team support, flexible service delivery, process improvement identification, housekeeping standards.

Technical & Professional Development – training record management, system documentation, safety standards, professional communication, escalation procedures.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Laboratory Sample Lifecycle & Environmental Monitoring Automation Platform (HCL Technologies)

- Architected and deployed an integrated **LIMS-driven sample management system** that automated internal sample movement tracking, external shipment coordination, and reference material inventory workflows across a multi-site laboratory environment, reducing manual data entry by **65%** and eliminating **sample-tracking errors**.
- Designed **Power BI dashboards** and **SQL-based reporting infrastructure** to generate real-time environmental monitoring and water analysis reports, delivering agreed quality and business metrics to **15+ stakeholders** with **98% on-time accuracy** and enabling proactive identification of **process bottlenecks**.
- Implemented **GMP-compliant documentation workflows** and **audit-trail mechanisms** within the LIMS, ensuring all sample-related records—receipt, review, external results, aliquoting activities—were completed legibly and on time, achieving **zero regulatory deviations** during client audits.
- Built **change-control** and **UAT coordination frameworks** to support seamless system configuration updates, training-record management, and post-implementation triage, enabling **24/7 uninterrupted service delivery** across client PSS operations and eliminating downtime-related compliance gaps.
- Developed automated alert and escalation workflows for sample-pull requests, aliquoting exceptions, and reference material depletion, reducing response time to ad-hoc operational requests by **40%** and freeing **analytical personnel** to focus on high-value testing activities.

Regulatory Compliance & Data Integrity Dashboard for Pharmaceutical Laboratory Operations (HCL Technologies)

- Developed a comprehensive **Power BI dashboard** integrating **LIMS data** and **environmental monitoring metrics**, providing real-time visibility into **GMP compliance**, **data integrity status**, and **audit-trail completeness** across laboratory operations, enabling management to identify and remediate deviations within **24 hours**.
- Engineered **SQL-based data validation queries** to reconcile external sample results against LIMS records, detecting discrepancies with **99.8% accuracy** and flagging incomplete documentation for immediate correction, reducing post-audit remediation effort by **55%**.
- Collaborated with client quality and operations teams to define **quality metrics** and **business metrics** KPIs, translating regulatory requirements into automated reporting logic that supported continuous process improvement and demonstrated operational excellence to external auditors.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
